Calumet Duds 2:10 that acted so badly at Charlottetown was not entered, was sold during the exhibition by Allison Lagelle to Turner and George W. N. E. at Halifax on Tuesday he won the second heat of the 2:15 Pace...

Still another upset of the meet was the performance of Jeanne Trux 2:07 1-4, the little mare that captured the 2:14 Trot and Pace at Fredericton last fall in the first time of 2:07 1-4...

Grace Abbey, Frank Adams' three-year-old by Guy A. Volo, purchased out of the state by Ben White with a first start in 2:10, made her first start in new ownership at Halifax in the three-year-old class and was 2-2-2. Hillside Scott, Truro's winner in straight heats, no doubt after the Halifax mare gets acclimated she will show some of the form that she did prior to coming here.

Evening Sun, the daughter of Volonte 2:03 1-2 that was sold as a yearling in the 1934 Old Glory auction for \$800, took a record in a winter race in Calumet in 2:10, made her first start in new ownership at Halifax in the three-year-old class and was 2-2-2.

Billie Direct 1:55 world's champion pacer, set the Atlantic N. Y. track record at 2:01 3-4 last week. It is the fastest time ever recorded in performance was regarded as wonderful. The world's record for a half-mile track is 2:01.

Maine had not less than three foals operating last week, Presque Isle, Exeter and Damariscotta.

"When Greek meets Greek then comes the fury of war" is an old saying, and when two pacers of the class known by Billy Direct 1:55 and Little Pat 1:58 meet, as they will do in the Presque Isle, Vermont, fair Thursday, September 7th, it will be a contest worth going a long distance to see.

Remember When George Young, who gained international fame when he swam the treacherous Catalina Channel in 1927, won the Canadian National Exhibition 15-mile swim at Toronto eight years ago today. It was the only year the Toronto swimmer finished in the money.

FLOOD DAMAGE TRURO, N. S.—(CP)—Damage caused by the highest August tides in 20 years pouring through dykes has caused farmers loss of several thousands of dollars. Acres of marsh hay, ready for harvesting, have been ruined.

LABOR DAY week-end is the last big outdoor holiday of summer. For most of us, it means a trip, a week-end camp, or other special jaunt—and plenty of pictures, to remind us of summer fun during the coming winter months.

Is your camera ready? And have you made your Labor Day plans with a view to picture chances? That's always a good idea when you're planning an excursion—keep the camera in mind, and select a tour route, or holiday spot, that you know is full of picture opportunities.

The more fun and activity you can pack into the week-end, the more snapshot chances you'll have. Whenever something is going on, your camera should be ready for action. A picnic or corn roast, an amusement park, a fishing trip, a mountain hike—all these are chuck-full of picture material if you just keep your eyes open and your camera ready.

On a picnic, picture your crowd sitting the table and eating—don't wait until they get through. At the pool, or the beach, picture them swimming and diving, or enjoying some other beach sport—not posed on shore. Watch your exposures, and keep them "in step" with the prevailing light. Along shady streams, there is very little light, so you must use a large lens opening and a slow shutter speed. But on the beach, or when fishing offshore, light is bright and intense, and exposures of 1/50 second at f.11, f.16, and sometimes even f.22 are correct.

When in doubt about exposure, err on the "full" side. Correct exposure is best, but an overexposed film will usually yield a better print than an underexposed film. Good modern films, especially the "chrome" type, have enough latitude to take care of reasonable errors in judging exposure.

So, here's luck. It looks like a great week-end, and I hope you keep your camera as busy as mine will be. 247 John van Guilder
