Suspended Sentence Given On Common Assault Charge

Appearing for sentence on a charge of common assault, Ernest Carter, Charlottetown, was given a one-year suspended sentence by Magistrate A. J. Haslam in city police court yesterday.

In addition, the accused was ordered to post a bond to keep the peace, in the amount of \$500, in the charge of assaulting Mrs. Hilda Carter, by striking her on the shoulder with his fist. Counsel for the defence was Almon M. Gillin, and for the complainant, John P. Nicholson.

Convicted of being drunk and disorderly, Raymond Bernard, Charlottetown, was given a 30-day suspended sentence, for having possession of intoxicating liquor in a place other than his residence, another accused was fined \$20 and costs or 30 days in jail.

Three persons, on charges of loitering, were dealt with as follows: one was sentenced to 20 days in jail, one to 10 days, and the third was given a 20-day suspended sentence.

For leaving a motor vehicle in a metered parking space when the meter did not show time purchased, an accused was fined \$5 without costs or two days.

Of three persons convicted of being drunk and incapable, one was sent to jail for 10 days, another was remanded in custody until March 24, and the third received a 20-day suspended sentence.

Montreal Police Force Said Efficient Now

By KEN SMITH
MONTREAL (CP) — Cndr. Andre Gagnon, chief of the Montreal Police Force, said Thursday he feels Montreal's police force is on the way to becoming an effective crime fighter after what he called years of neglect.

The waterfront area, which the police expert came here at the city's invitation, was given a tour by Andre Gagnon, a former director of the Paris police, to re-evaluate the area's crime-fighting Montreal's crime wave.

He said he and Mr. Gagnon, who had been in Montreal since October, have drawn up a general plan that should give Canada's largest city a much more efficient force.

He warned, however, that it will take years to get the force "back on its feet."

But it is important that the ball is rolling, now it's up to the police director, said Gagnon, who said he and his officers to keep it going.

Cndr. Gagnon emphasized that the battle plan is a flexible one that can be changed easily by the police director as conditions in the city change.

He said that, when he arrived, he found the police force saddled with unsatisfactory conditions and ridden with apathy and distrust.

The distrust and suspicion among the police, city hall and citizens had become so prevalent that morale was being sapped. One of the first problems to be solved was to get the men interested in their jobs again.

Cndr. Gagnon said that, despite the prevalence of crime in the city, Montreal has no special problems of law enforcement. The police force had been crippled by neglect and when they neglect any organization, all sorts of undesirable things creep in.

Support Asked For N.S.-U.S. Ferry Service

OTTAWA (CP) — A Joint Canada-American delegation met Thursday to discuss the proposed Trans-Atlantic Ferry Service.

The meeting followed earlier conferences with Nova Scotia and Massachusetts officials on the proposed passenger-cargo ferry service which would supplement the existing Bar Harbor, Me., to Yarmouth, N.S., service of the ferry firm, the U.S. group included John Spencer of Boston, who was acting as personal representative of Maine Governor John Volpe.

Leo Dionne, chairman of the industrial development committee for Gloucester, and William Archibald of the Shelburne Chamber of Commerce, presented the argument for the new ferry service.

A survey being made of the proposed 240-mile route is expected to be completed later this year, they said.

Two MPs—Lloyd R. Cross (PC—Shelburne) and Pelton Legere (PC—Shelburne-Harbourville) — also attended the meeting.

Water From Mine Is Threat To Fish

OTTAWA (CP) — Fisheries Minister Maclean said Thursday efforts are being made to find a method to enable the Brunswick Mining and Smelting Corporation to pump water from a flooded mine shaft.

In a Commons reply to H. J. Roebuck (L-Gloucester), he said water in the mine, located near a one-mile shaft 20 miles south of St. John's, contains substantial quantities of heavy metal compounds such as copper, zinc and lead.

Mr. Maclean said that if the water was pumped into the Bay of Chaleur, it would be harmful to fish. The fisheries department was co-operating with the corporation to devise a safe method of disposal.

Plans Made To Preserve Peary's Cove

HALIFAX (CP) — The provincial government disclosed Thursday plans to preserve the natural scenic beauty of the Peary's Cove area on the Atlantic coast of the south-west of Nova Scotia.

The preservation of the Peary's Cove area is a joint project of the provincial and federal governments. A committee will have power to regulate the area and to establish regulations and to establish a park and facilities.

The bill says the legislation is to preserve the scenic beauty, character and atmosphere of the area, which for years has been an attraction for tourists and artists who come to view the sea and the great rock formations.

In other respects, the administration of the area would continue to be handled by the county.

New Approach Is Considered To Increase Export Trade

By ALAN DONNELLY
OTTAWA (CP) — A new approach to increased sales in Canada's biggest export market, the United States, was unveiled Thursday by Trade Minister G. J. G. Gagnon.

The idea: Bring major U.S. buyers "right into the laps" of Canadian producers.

The present plan is to transport place orders of American buyers to show marks organized in Montreal, Toronto, Winnipeg and Vancouver where Canadian manufacturers can display their wares instead of having to sample cases from store to store in the United States.

If the gambit succeeds, the Canadian sellers would be in displaying wares in an attractive showroom, instead of having to work from a sample case in a buyer's office or in a hotel showroom.

Officials indicated the first two sponsored buyers' missions will come to Montreal and Toronto late this spring, and to Winnipeg and Vancouver in September. The shows are expected to last one or two days.

Main purpose is to get Canadian goods better known to American buyers and to narrow the big trade deficit which Canada has with the United States. Last year Canadian exports to the U.S. fell \$676,000,000 short of imports from the U.S., though on over all world trade there was a small surplus.

Details Given Of U.S. Suit Against Bank

WASHINGTON (AP) — A House of Representatives subcommittee Thursday disclosed details of a U.S. government suit against the Royal Bank of Canada for unauthorized exportation of the cheque.

The report said the U.S. government, through the General Services Administration, learned of the Cuban seizure of the Royal Bank branch in New York Oct. 28, 1960, the same day the Cuban government announced expropriation of the Niagar plant.

The cheque was delivered to the Royal Bank branch in New York Oct. 28, 1960, the same day the Cuban government announced expropriation of the Niagar plant.

Tabling Of Report Asked

Cleveland Baker (L-4th Price) asked Premier Walter R. Shaw in the Legislature Wednesday if the report of the Royal Commission on Electoral Reform can be expected to be tabled during the present session.

"The report has been completed, said Premier Shaw, and the government has copies but has not had opportunity to look them over. After it has been studied and if we have the opportunity it will be tabled."

Cndr. Baker said he would like to have a chance to study it also, said Mr. Baker.

Mine Property Awaits Rail Line

OTTAWA (CP) — Transport Minister Baker told the Senate transport committee Thursday that a mineral development involving "several millions of dollars" will be launched in the Gaspe area as soon as the proposed 37-mile railway branch line program is given the go-ahead.

He said East Sullivan Mines is making arrangements with the provincial government to launch its developmental work for not stopping near, Christmas bonuses, and the for

Water From Mine Is Threat To Fish

OTTAWA (CP) — Fisheries Minister Maclean said Thursday efforts are being made to find a method to enable the Brunswick Mining and Smelting Corporation to pump water from a flooded mine shaft.

In a Commons reply to H. J. Roebuck (L-Gloucester), he said water in the mine, located near a one-mile shaft 20 miles south of St. John's, contains substantial quantities of heavy metal compounds such as copper, zinc and lead.

Mr. Maclean said that if the water was pumped into the Bay of Chaleur, it would be harmful to fish. The fisheries department was co-operating with the corporation to devise a safe method of disposal.

Liberals Fail To Obtain New Forecast

OTTAWA (CP) — The Conservative Party, rejected by the government, failed to obtain a Liberal motion that the government produce the latest economic forecast of its advisers.

Mr. Pickett (L-Bona Vista) proposed the motion, said Prime Minister Diefenbaker Jan. 20, 1962, had accepted the motion, but the economic forecast of the public by not producing the economic forecast of its advisers.

Mr. Pickett said the present situation is completely analogous to that in 1957. The country was on the eve of a recession. The Conservatives were claiming an upsurge in the economy. The Liberal government produced the document which would show whether their claim was correct.

Plans Made To Preserve Peary's Cove

HALIFAX (CP) — The provincial government disclosed Thursday plans to preserve the natural scenic beauty of the Peary's Cove area on the Atlantic coast of the south-west of Nova Scotia.

The preservation of the Peary's Cove area is a joint project of the provincial and federal governments. A committee will have power to regulate the area and to establish regulations and to establish a park and facilities.

In other respects, the administration of the area would continue to be handled by the county.

16 Coal Miners Killed In Britain

BURNLEY, England (Reuters) — Sixteen miners were killed in an underground gas explosion at the nearby Hapton colliery in northern England Thursday.

Sixty-four others were injured, most of them hurt from the explosion which occurred at a depth of some 700 feet after a morning shift of nearly 200 men had gone down the pit.

A mine spokesman said there were 1,000 men in the mine and no men were trapped.

Rescue teams used breathing apparatus to reach the injured miners and it took about four hours to bring the dead and injured to the surface.

Weeping women, many of them holding babies, scanned the faces of the men as they appeared one by one, hoping to recognize a loved one.

The Souris Credit Union Players will present a repeat performance of "When Irish Eyes Are Smiling" next Thursday evening in Souris. The play is directed by Eleanor Clinton. Three members of the cast shown above are, left to right, Herbert Cheever, Doreen Gallant and Charles MacPhee.

DAILY MARKET QUOTATIONS

SUMMARY
Toronto—Market well down; moderate trading.
New York — Market mixed; moderate trading.
Montreal — Market mainly lower; active trading.

CURRENCIES
MONTREAL (CP) — The U.S. dollar closed at a premium of 4 1/2-5 1/2 cents in terms of Canadian funds, unchanged from Wednesday's close. Pound sterling closed at \$2.35 3/16, down 1/8.

DIVIDENDS
BY THE CANADIAN PRESS
Guaranty Trust Company of Canada, 30 cents. April 16, record March 21.
Shawinigan Water and Power Company, common 20 cents. May 25, record April 13; class A common \$1.15 cents, May 15, record April 19.

NEW YORK
NEW YORK (AP) — The stock market Thursday followed a flat to a decline. Trading was irregular, trading moderate, and little excitement except for a small section of issues.

The Stocks Average of 30 stocks ended off .10 to 260.40.

Steels, chemicals, and motors showed a thoroughly scrambled picture. Drugs and numerous metals were a bit higher on balance while the trend was lower among airlines, rubbers and tobaccos.

Among Canadian issues, Datschke Securities was up and McIntyre Porcupine 1/4. International Nickel finished down 1/4 and Hudson Bay Mining was off 1/4. CPR was down 1/4.

Prices were irregular on the American Stock Exchange, with J.P. Corp. fell 1/4, and down 1/4 were Shawinigan and Scurry Rainbow Oil. Brantford Petroleum fell 1/4.

What stocks did:

| | | |
|--------------|------|------|
| Thur | Wed | |
| Advances | 467 | 416 |
| Declines | 147 | 146 |
| Unchanged | 235 | 245 |
| Total Issues | 1259 | 1289 |

MONTREAL
MONTREAL (CP) — Stocks were generally lower on Thursday. Montreal and Canadian exchanges Thursday. Trading was light among industrials but active in mines. Losses had a wide edge on gains 9/16 to 5/8.

Foundation, target of an anonymous bid for minority control at \$147.5 a share, rose in heavy trading to highlight the industrial.

An announcement by the National Trust Company that all shares deposited with it under the terms of the offer up to Thursday would be bought. Foundation shares were heavily traded at a cash settlement of \$147.5 a share, with the closing cash sale 147.5. Trading on normal days was active, but the stock added to 148 1/2.

Although the market is in active trading.

B.C. Power featuring trading shares had a gain of 1/4 to 1/2 on news the B.C. Supreme Court has placed B.C. Electric, B.C. Power subsidiary, under receivership until litigation concerning the province's role in a \$1.1-billion nationalization of the electric utility is resolved.

Shawinigan dropped 1/4 to 2 1/4, among utilities and Bank of Montreal all 9/16 and Banque

ONTARIO HYDRO Ponders Order For N.S. Coal

TORONTO (CP) — Ontario Hydro is considering an order for 100,000 tons of Nova Scotia coal last year.

He told the legislature Ontario Hydro bought 200,000 tons of Nova Scotia coal last year and is testing it now.

As a result of these tests, "I think we're about ready to place an additional order for 100,000 tons or so," he said.

Mr. Macaulay said that when the government purchased the 200,000 tons last year for \$20,000,000, it was a very excellent coal. It is being used in the power stations near Toronto, and we have an option then on a further 100,000 tons, and I believe we're going to exercise that option.

He said experience has shown the Nova Scotia product "is very excellent coal."

By 1980 — providing that no great power is not developed, to the extent Hydro thinks it will—Ontario Hydro would need 200,000 tons of coal worth \$20,000,000, Mr. Macaulay said.

Given anticipated nuclear development, however, the requirements would be about 14,000,000 tons.
