Bargain Prices Seen Higher In Hong Kong

By ROY ESSOYAN

HONG KONG (AP) — You go broke in Hong Kong buying all the things you can't afford not to buy.

That's what every tourist—yes, every single one—tells you gaily as he staggers out of town, suitcases bulging.

All you can do is smile wanly. Because tourists 'ave been saying this and acting on this premise so long it's no longer completely true.

You can still buy Swiss watches, German cameras and Japanese transistor radios here cheaper than they sell at home but the gap is rapidly narrowing.

But Hong Kong still has attractions for the visitor.

Its harbor is one of the prettiest in the world, at night a fairyland of sparkling jewels.

And for those seeking vicarious excitement, Hong Kong is still a glamorous neon-lit city of sin, smugglers and spies.

ILLICIT ATTRACTIONS

If you venture into some of the darker alleys you can still occasionally catch the whiff of opium in the air, although it was outlawed in 1945.

Professional ladies of easy virtue are also officially outlawed but gaily painted women still beckon passersby from floating sampans that snuggle embarrassingly close to the staid Royal Hong Kong Yacht Club.

Some of the biggest money here is still made smuggling gold.

And for the cloak and dagger trade, this British colony on the coast of Communist China has spies galore, Communist, anti-Communist and some who double as both.

But perhaps the most tempting attraction in Hong Kong is the food, probably the most delicious and most varied in the world.

If you tried a different dish every evening you'd have to live to 80 to taste them all—the Chinese menu spanned 80,000 dishes at last count. And they're all good, as long as you like such exotic items as baby eels simmering in oil and garlic, chicken wrapped in lotus leaves and baked in mud, roast newborn sparrow, snake soup, sea slugs or shark's fins.

CITY BOOMING

Hong Kong is currently enjoying the biggest boom in its 120-year history. The boom may be headed for a bust but no one here seems particularly worried.

The skyline is jagged with the trelliswork of factories, offices and apartment buildings soaring skyward. Towering resettlement blocks for refugees from China dot the landscape.

Despite its modern dress Hong Kong is still essentially a Chinese city of Chinese sights, smells and noises.

The streets teem with life. The shops spill onto the sidewalks. Babies play in the gutter. Wrinkled old men sit on doorsteps puffing meditatively on long bamboo pipes. And everywhere you look, slender Chinese girls click by provocatively in tight-fitting "cheongsam" dresses and high heels.

PACKED WITH REFUGEES

Hong Kong is a city of paradoxes and the biggest paradox of all is what the refugees have done to it.

They started pouring over the border when the Communists swept across the Chinese mainland 13 years ago. They presented Hong Kong with a staggering housing, feeding, nursing and education problem. But they also provided an indirect answer to that problem.

They gave birth to new industries and 70 per cent of Hong Kong's wealth today lies in these new industries, financed by refugee capital and operated by refugee enterprise using cheap refugee labor.

July Deaths In Province Show Increase Over 1961

CAPITAL BUREAU OF THE GUARDIAN

OTTAWA — The number of deaths recorded in Prince Edward Island in July was considerably higher than last year and higher than the three-year average, the Dominion Bureau of Statistics reports.

Deaths numbered 87 this July compared to 61 in July 1961 and to the three year average of 63.

So far this year, PEI deaths total 612 compared to 535 for the first seven months of 1961 and to the three year average of 559. The increase for the year to-date is 14.4 per cent over 1961 and 9.5 per cent over the last three year average.

However, number of births in PEI in July rose to 284 compared to 262 in July 1961 and to 215, the three year median. For the year to-date, births total 1,589 compared to 1,606 in the corresponding period of last year and to 1,553, the three year average.

Marriages remain about the same, 86 recorded in the island this July compared to 85 last July and to 85, the three year median. For the seven month period, marriages total 276 this year, a 5.3 per cent increase over 1961 but a 2.1 per cent drop from the three year average of 282.

Radiation Dangers Pondered

WASHINGTON (AP) — The United States, having created a new radiation belt around the earth, now is seeking to determine whether it will delay or otherwise impair the U.S. Mercury astronaut program.

A statement issued here by the defence department and the Atomic Energy Commission indicated it will not but they added that they are "making a detailed study to determine possible effects."

Also participating in this scientific study is the National Aeronautics and Space Administration, which handles the space - flight program.

The radiation belt, largely consisting of high energy electrons, was produced by the high-altitude nuclear device the United States exploded above the mid - Pacific July 9. These atomic particles, and the x-rays produced by them, could be a menace to any spaceman flying through them, unless he were suitably shielded.

However, the official statement said the "new radiation lies primarily above the path of current manned flights."

HEIGHT VARIES

The belt varies in height above the earth, from perhaps 200 miles high at some points to 500 miles at others. Both these altitudes are greater than the altitudes of the manned space flights of the United States and Russia. The U.S. astronauts' orbits ranged from about 100 to 167 miles above the earth, while the range of the Soviet cosmonauts was 100 to 145 miles, approximately.

NASA said it is proceeding as before with its plans to launch Walter Schirra into a six-orbit flight during late September or early October.

The new belt, according to preliminary studies, is about 400 miles deep and 4,000 miles wide. It stretches around the globe above the geomagnetic equator. This equator follows roughly the geographic equator.

The official statement issued here disclosed that the radiation was so powerful immediately after the July 9 nuclear blast that it damaged solar cells on three high-flying experimental satellites. It added:

"The data so far available indicates that as a whole the belt is decaying by a factor of two in a period of two to three weeks. (This means the radiation loses half its strength in that period).

CONTRACT BRIDGE

♣ J 5

The bidding:

South	West	North	East
1 ♥	Pass	1 NT	Pass
4 ♥			

Opening lead — queen of spades.

This hand is a test of technique in dummy play. Let's say you're in four hearts and West leads the queen of spades, which you duck. You then ruff the spade continuation. How would you now play the hand?

A club loser is inescapable, so the problem is to avoid losing two diamond tricks. One diamond has to be lost in any case, so the whole question is finding the line of play that has the best chance of avoiding the other.

Several facts stand out. If the trumps are divided 2-2, you can make the hand by drawing them and playing the A-K and another diamond. The fourth diamond can be ruffed in dummy if the suit breaks badly.

Likewise, the hand is makable if the diamonds are divided 3-3, whether trumps are drawn early or not.

So you therefore proceed on the basis that both suits will break badly —otherwise, there is no problem— and do what you can to guard against the worst division.

Note that you cannot afford to test the trump situaion by firs drawing two rounds. If you did his and then played the A-K and another diamond, you would be defeated by a trump return.

The best way to guard against all possibilities is to cash one high trump at trick three and then lead a low diamond. This gives you the maximum amount of protection against bad breaks.

Assume the diamond is taken and a spade is returned. You ruff and now cash a second round of trumps, hoping the suit is divided evenly. But when West shows out, you lead the A-K of diamonds, hoping that the suit is 3-3.

It isn't, but you get a lucky break when it turns out that Eas is the one wih the diamond lengh. This permits you to ruff the fourth diamond in dummy and thus make the contract.

At no point were you sure you'd make the hand, but at least you followed the method of play designed to offer the best chance.

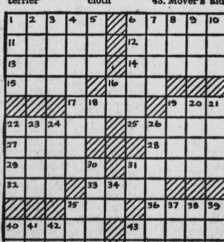
Yesterday's Answer



8-28

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
