

# Who Says There's No Jobs Out There?

By Martha McCARDLE

How many of you are looking for a job right now? In the next few months? Upon graduation? Well, your job search has just gotten easier. Your career development centre here at UPEI offers this great internet job search web site:

www.workopolisCampus.com. This job site is specifically geared towards post-secondary students and recent graduates. You can conduct a search for jobs in any field of study and get all the information you need to apply.

What other services does www.workopolisCampus.com offer you as a student?

•Online Resumes: Students can enter a detailed resume online which is available to thousands of employers who search the

workopolisCampus.com database regularly. Students can also print a professionally formatted copy of the resume.

•Job Posting: Students/alumni can search through hundreds of employment opportunities advertised through our Targeted Job Posting feature. Students can also apply online to these positions, as per request of the employer.

To access this website, just log on to www.workopolisCampus.com, register as a new seeker, and enter UPEI's access code - jobsforme.

As your workopolis intern on campus, please feel free to contact me by email at mmccardle@upeii.ca or drop by the Student Services Centre for an appointment, if you have any questions.
