

# CO-ED RESIDENCE

All you guys and gals who love togetherness may try but for our Co-ed Residence at Montgomery Hall. The boys on the second floor were moved to the third floor in order to make room for approximately twenty-five females.

Mrs. Bullman, the House Mother, will be staying with the girls on second floor, in the hopes that, through her watchful eyes nothing

mischievous will occur. (persnickity)

Mr. Stevenson, the business manager, stated that the University is losing approximately thirty-five dollars per day at Montgomery Hall in food services only. It is hoped that a sufficient numbers of students will be attracted to rectify the loss.

Home Economic students

will find that staying at MONTY HALL would be convenient due to its close proximity to their Home Ec classes at Holland College. Girls from Marion Hall and Bernadine are invited to move to Monty Hall. Students from Dalton Hall, Main and Memorial, also have the opportunity to switch to the Co-Ed Residence.

(Esq.)

## premier's visit

On Friday, October 8th, Premier Campbell appeared before a Political Science class in one of the sterile rooms of the "New Building". He was introduced, unintentionally, by D. Frank Sigsworth a part time lecturer in the Political Science Department.

After five minutes of confusion, in which, the whole Department looked very unorganized, Mr. Campbell got on with his discussion, which was based, primarily, on the 'Development Plan'. The Premier had a few very interesting points to make. One point was, to fully understand the Comprehensive Development Plan, one would have to be a member of the present government. The fact that one has to be a government member to understand the plan, is based upon the presumption that the common people of P.E.I. do not know the reasons it is being implemented.

He also passed off some other very impressive comments throughout the hour he was before the class. For example, there will be no Maritime Union in the next ten years, this point was made very strongly by our Premier.

The Premier brought us back to reality when he commented on the Media. He made it quite clear to the whole class, that Newspapers only represent minorities, and the majority of people are very content, thus never getting their pictures in the papers. It appeared that he was making subtle reference to the way the media, so courageously, backed the farmers in their bid to save the 'Island' from Corporate Farms.

On the whole he was as 'Spit and Polished' as ever, except for one brief moment when a student asked him a specific question about the Department of Fisheries. Here he tried to hand the blame off on the Federal Government without success, finally he consented to the fact that, possibly he does not know everything that goes on in the depths of his highly over administered regime.

He closed the appearance by tossing out a few bland compliments to the audience and left, surrounded by the hierarchy of the Political Science Department, namely the four learned professors of that department.

As one student so rightly put it, when asked what Campbell had to say, ..... nothing.
