St. Peter's Church.

CONFIRMATION.

IN St. Peter's Church, on Saturday evening, the Bishop of Nova Scotia administered the rite of Confirmation to a number of candidates. His Lordship delivered an impressive address on the occasion.

CONSECRATION OF THE CHURCH.

On Sunday morning the chief object of the Bishop's visit at this time was accomplished, in the consecration of St. Peter's Church. His Lordship, accompanied by the Rev. Drs. Maynard and Jarvis, entered the main door of the Church at eleven o'clock. Inside he was met by the Priest Incumbent, the Church Wardens, E. J. Hodgson, Esq., who acted as Chancellor, and the Choir. T. H. Haviland, Church Warden, formally stated that the Church had been relieved of financial incumbrances, and desired that it should be consecrated to the service of God. The Bishop complied with the request, and forthwith proceeded to the chancel, accompanied by the choir, singing the 24th Psalm. After explaining, in a forcible and impressive address, the meaning and intent of the rite, he proceeded with the consecration—signing the deed of consecration in the presence of the congregation, and directing the Priest Incumbent to have it registered in the Registry office of the Diocese. With the exception of a special epistle and gospel and some special prayers, the rest of the ceremony did not differ from the Communion service.

THE RECENT IMPROVEMENTS.

The interior of St. Peter's Church has undergone a complete change in appearance. Inside it is now perhaps the most handsomely finished church in the city. The rough framing of the beams and rafters in the roof has been nicely ceiled with narrow boards of a uniform width, and the openings in the framework filled in with tracery. An interior ceiling, formed of narrow boards and light framework, has been constructed within the old roof—thus considerably lowering the altitude of the air space. It is expected that this alteration will result in giving more comfort in the winter season, as the quantity of air to be heated will be less than formerly. The acoustic properties of the building are greatly improved by the new ceiling, which has the same effect as a sounding board. The whole of the interior walls and roof have been painted in oil, the nave furnished in light colours, and the chancel in stronger and deeper tints. A new arrangement of the gas jets on the walls immediately above the corbels, and in the back part of the chancel screen, keeps the light from striking injuriously upon the eyes of the congregation, and, at the same time, permits the smallest print to be distinctly seen. During the summer a stained-glass window is to be placed in the chancel wall. The gable end of the building, lately rough-boarded, has been finished with lancet windows and a pointed entrance porch. The contract for carpenter work was performed by Mr. Walter Lowe, and the painting by Mr. John Meikle. The gas-fitting arrangements were put in by Mr. Milner. Messrs. Sterling & Harris were the architects. In design and workmanship the improvements are highly creditable.

We are pleased to see that the "Fish and Game Society" of this Province is accomplishing the ends for which it was established. On Friday last, Mr. W. C. Hobkirk—Vice-President of the "Fish and Game Society"—while fishing in the Morell River, fell upon three poachers, with an elaborate horse-hair net spread across that valuable fishing stream. He immediately seized the net and secured the names of the poachers. On his return to the city, he reported the occurrence to the society, and steps are now being taken to have those unlawful and greedy sportsmen rightfully punished.

SUPREME COURT.—In the case of the Queen at the prosecution of Peter Connolly vs. Peter Donnelly for stealing a horse and two geese, the jury returned a verdict of "guilty." In the case of James Beales vs. A. P. Mills' judgment was returned for the plaintiff by order of the Court, for the sum of \$220.47. The case now before the Court is John Sullivan vs. Alex. Chiverie in action to recover the value of 50 mackerel barrels.

St. Dunstan's College.

The examination of the students of St. Dunstan's College took place on Friday last. Among those present were His Lordship Bishop McIntyre, the Rev. Dr. McDonald, Rev. Dr. O'Brien, Rev. Thomas Phelan, Rev. P. Doyle, Rev. Mr. Trudelle, a number of other clergymen, and quite a number of ladies; Judge Reddin, E. Hackett, Esq., M. P.; A. C. Macdonald, Esq., M. P.; Dr. Conroy, J. W. Hughes, Esq., J. Dorion, Esq., and Mr. Hermans. The examination was highly interesting, and the students acquitted themselves creditably. At the close, His Lordship Bishop McIntyre and Dr. O'Brien delivered short addresses. The following is the prize list:—

Magnificent Gold Discovery at Montague, N. S.

Mr. George W. Stewart, of Montague, brought to the city yesterday a brick of gold weighing 50 oz., the product of 127 days work at a new mine lately discovered by Mr. Stewart at Montague. The "lead" is pronounced by old gold miners one of the richest ever discovered in this Province. It is what has been known for many years among gold miners as the "Rose lead" from the rose color of the quartz. Ever since gold mining commenced at Montague, the miners have from time to time found, in detached boulders on the surface, quartz of the color named, rich in gold deposits. The "lead" from which these boulders came has long been a matter of search, but has never been struck until about six weeks ago, when Mr. Stewart, after several weeks continued prospecting and fortunately found the long sought for treasure. The lead at the top was only 4 inches, and the quartz at the first only yielded 2 1/2 oz. per ton. After working six weeks the mine has immensely developed. In going down 15 feet the lead has widened to 13 inches, and the richness of the quartz has increased to 6 oz. of gold to the ton. As from various indications the lead is believed to be very large, and as its richness is already established beyond question, Mr. Stewart and his three associates who own the mine are in great spirits, while all those experienced in gold mining, who have visited the mine pronounce it a "big bonanza." We heartily congratulate our Montague friends on their good luck, and hope to hear of their continued good fortune.—Herald.

A BEAR, on Friday night of last week, came out looking for fresh meat for himself, and killed a fine cow in the barnyard of Albert Oakes, Esq., Postmaster, New Albany, and who, in setting a steel trap next day for the bear, accidentally got caught by the ankle in the trap, which was a powerful one, requiring jack-screws to set it. The only wonder was the leg was not broken; but, although badly injured, we are glad to learn that Mr. Oakes is doing well.—Eridgetown N. S. Monitor.

A Burglar Abroad.

McNEVIN—the prisoner who gave evidence in conjunction with Davy against Rapsom, and whose sentence was commuted at the instance of sundry influential and sympathetic persons—has lately been living at Wood Islands, in the capacity of a servant, under the name of McNeill. It was discovered that he had assumed his name, suspicious respecting his connection with some petty larcenies about the place were aroused, and Mr. McNevin alias McNeill, finds it advisable to leave his master's employ. On Saturday night week the store of Mr. Crawford, at Wood Islands, was broken into, and a quantity of goods was stolen. On the following Monday, Mr. Philips hired a boat to go to Rocky Point. The boat was taken outside of the harbor; and Mr. Philips had to send a man in another boat after it. The missing boat was traced to Pownal, and thence to Point Prim, when it was found in the possession of our friend McNevin, who had been waiting for a fair wind to make a clean pair of heels for Nova Scotia; but who, on the principle that conscience makes cowards of us all, hesitated to trust himself alone upon the briny deep. In the boat were some of Mr. Crawford's goods and a quantity of coats and pants not yet identified. McNevin was arrested; but, on the night following, he succeeded in making his escape, and he is now at large.

Salmon Fishery.

DEPARTMENT OF MARINE AND FISHERIES, FISHERIES BRANCH, Ottawa, 16th June, 1879.

PUBLIC NOTICE is directed to the following Fishery Regulation, adopted by the Governor General in Council on the 11th inst., relative to the Salmon Fishery:—"Fishing for Salmon in the Dominion of Canada, excepting under the authority of Leases or Licenses from the Department of Marine and Fisheries, is hereby prohibited."

By Order.

W. F. WHITCHER, Commissioner of Fisheries.

June 30—

Canadian Inshore Fisheries.

DEPARTMENT OF MARINE AND FISHERIES, FISHERIES BRANCH, OTTAWA, 6th June, 1879.

PUBLIC NOTICE, and particularly the attention of DEEP SEA and INSHORE FISHERMEN, is directed to the following provisions of the Statute, 31 Vic. Cap. 63 known as the "Fisheries Act," passed on the 22nd May, 1868:—

1. Section 14: Prohibits the throwing overboard or leaving of dead or decaying fish, or remains of offal of fish, or other marine animals, within any water where fishing is carried on, or upon any fishing bank; also forbids leaving the same in any net or other fishing apparatus.

2. Section 14, Sub-section 2: Provides that dead or decaying fish, or any other deleterious substance, shall not be drawn into, or allowed to pass into, or be left, or remain in any water frequented by any kinds of fish mentioned in the fishery laws.

3. Section 13, Sub-section 7: Bag-nets and Rab-nets and fish-pounds are prohibited, excepting under special license.

Besides the fines imposed by said Statute, any offender against the Fishery Laws is liable to the forfeiture of the nets, materials, implements or appliances used in connection with the offence.

Fishery Officers may seize upon their own view, or on complaint, any fishing gear subject to confiscation, and fine offenders forthwith.

British and foreign fishermen alike are required to conform to the Canadian fishery laws.

It having been established in evidence that certain kinds of nets used for mackerel and other fish are fished in contravention of the fishery laws, by destroying quantities of small fish, besides mature fishes which are thrown away dead or dying, or are left to decay on the fishing grounds, or within the inshore waters; the fishery officers are instructed to strictly enforce the fishery laws passed to prevent such illegal and injurious practices.

They are also instructed that British subjects, when fishing in British waters, are bound to conform in every respect to the Canadian fishery laws, and that foreigners fishing within three miles of the coasts of Canada, under treaties, in comm. on with British subjects, are required to do so in conformity with the fishery laws which govern the operations of British fishermen.

By order, W. F. WHITCHER, Commissioner of Fisheries.
