

NO CRUMBS FOR P.E.I. FROM THE RICH OTTAWA TABLE

THE LIBERAL PARTY AT THE LAST SESSION OF PARLIAMENT VOTED

\$100,000,000.00
ONE HUNDRED MILLION DOLLARS !!!!
FOR WHAT ? FOR "CULTURE"

From the Parliamentary reports it would appear that a large part of this huge amount of money will be spent on the training of actors and actresses, ballet dancers, poets, authors, playwrights and Grand Opera personnel.

THE SAME LIBERAL PARTY ALSO VOTED

\$885,000.00
EIGHT HUNDRED AND EIGHTY-FIVE THOUSAND DOLLARS

for 4 pictures to be hung in the National Gallery at Ottawa.

A small fraction of this money could have been used to great advantage by the almost bankrupt province of Prince Edward Island

BUT

What did the people of the province receive from our Liberal Governments?

HERE ARE SOME OF THEM:

1. A bill for \$1,400,000 from the Dominion Government.
2. A bill for \$13,500.00 from the local government to pay for an increase of \$450.00 in each members' sessional allowance.
3. An increase of 3 cents per gallon in the cost of gasoline.
4. An increase of 1 cent per package for cigarettes.
5. A colossal 20 cents per day increase in Old Age Pensions.
6. A stupendous 3 1-3 cents per day increase in Family Allowances.
7. A curt "take it or leave it" from the Dominion Government in respect to tax-sharing agreements.
8. A refusal of any action to assist the farmers and potato growers to obtain fair prices for their products and a fair share of national income

**A PROGRESSIVE CONSERVATIVE GOVERNMENT
 IS PLEDGED TO**

1. Take action to improve the condition of agriculture by, among other things, maintaining a flexible price support program to ensure an adequate return for agricultural producers based on a fair price-cost relationship, and by safe guarding our producers from unwarranted importations of agricultural products, such as butter & potatoes;
2. Review immediately all national labour legislation and provide for increased benefits and extension of the benefit period to 52 weeks under the Unemployment Insurance Act;
3. Increase Old Age Pensions to a figure high enough to meet the needs of our older citizens, and make the necessary adjustments thereafter on a cost-of-living basis;
4. Provide a hospital insurance scheme ensuring fair treatment to all patients, regardless of the type of illness;
5. Reduce those taxes which bear heavily on persons in the low income bracket;
6. Provide for a more equitable share of tax yields for the provinces and municipalities.
