The Empire State Building is the tallest building in the world, 1,472 feet high or 100 stories tall. From the observatory on the 86th floor you can see a diameter of 60 or 80 miles, an area in which one of every ten Americans lives and works.

Nestling at the foot of fabulous 42nd street are the United Nations Buildings wherein the countries of the world seek peace in a turbulent century. In the background can be seen the world's two tallest buildings—the Empire State and the Chrysler Building.
