Premier Castro Admits Red Tape Stunts Economy

HAVANA (AP) — Premier Fidel Castro has acknowledged the Cuban economy has been stunted by excessive bureaucracy, red tape and centralization of authority. He suggested Cuban workers borrow from the "good organization" methods practiced by "imperialists."

Speaking to a meeting of the Cuban water resources institute, Castro placed emphasis on "more organization" and said decentralization of authority would help solve many economic problems.

He said the government is taking a close look at current organization to eliminate all wasted manpower and red tape.

He said he knew of several cases where "institutes were set up with large numbers of employees without functions."

"Since the administrators have their salary assured, they don't bother to attend to the public," Castro said. "That is neither revolution nor socialism, it is bungling."

Castro said there has been bungling, too, in the National Agrarian Reform Institute (INRA), one of his regime's mainstay organizations.

CITES SLOW ACTION

He cited cases of slow action by the institute, and declared: "The comrades of INRA should not get angry when someone asks their co-operation. We must end this."

"The imperialists had good organization, selected people, demanded responsibility, functioned well. We have to apply correct methods of organization."

When Cuba was under capitalism, Castro said, "We had embezzlers as employees. Now we have plain misusers of public funds, throwing away money without reason and planning."

But he said Cuba would catch up with the capitalist nations.

"When we speak critically of ourselves, the imperialists publish it there (in their country), believing they are doing us harm," he said.

"Within 10 years we shall see what our position is and that of the countries that follow the Alliance of Progress."

NEED IRRIGATION

Castro called for increased irrigation.

"Let not a single river or creek go without being used," he told cheering hydraulics workers.

"We expect to have a sugar harvest of 8,000,000 or 9,000,000 tons in 1970 through irrigation," he said.

This year's sugar, Cuba's principal crop, was less than 4,000,000 tons, the smallest in 30 years.

In a speech Friday night, Castro predicted to an association of small farmers that within 25 to 30 years, 70 per cent of all farm land would pass into government hands and the rest will be retained by small farmers.

He said the Cuban regime plans eventually to nationalize all large farms which still are in the control of landowners.

New Metal Industry Process Is Studied By Researchers

SASKATOON (CP) — A process that reduces cost of cutting and forming metal industrial parts by up to 90 per cent is being studied by researchers at the University of Saskatchewan.

It employs a pressurized rubber pad as a substitute for either the punch or the die both used in conventional metal-working processes.

The time required to be in production using the flexible pad can be cut to one day from several weeks.

P. B. Hertz, a lecturer in the department of mechanical engineering, is directing the project. Financial assistance for the research has come from the National Research Council and the American Society of Tool and Manufacturing Engineers.

Mr. Hertz said rubber has been used in sheet metal press work for many years but it has been on a trial-and-error basis and many problems have been associated with the method.

"We are attempting to determine the significant variables and how to control them so that the results can be consistently good."

The process requires use of a mass of solid rubber confined in a heavy retainer.

The rubber is forced by a power press against a piston which holds the sheet metal and various moulds, punches or dies.

As a result, the rubber becomes pressurized like a hydraulic fluid and conforms to the outline of the components on the piston.

When the pressure is released, the rubber resumes its previous shape and the parts and scrap are removed from the retainer.

The method has been used in making parts for the aircraft, missile and electronics industries comprised light gauge metal.

West Germany Makes Plans To Sign Test Ban Treaty

BONN (Reuters)—The West German government has made a provisional decision to sign the partial nuclear test - ban treaty.

A spokesman said after a special session of the cabinet here that the cabinet's decision for West Germany to join the treaty is conditional on the Bonn government's being satisfied on two matters.

One, he said, is U.S. State Secretary Dean Rusk's testimony before the Senate foreign relations committee in Washington concerning the pact hammered out by the United States, Russia and Britain.

The other, the spokesman said, is West German Foreign Minister Gerhard Schroeder's talks in London Wednesday with the British foreign minister, the Earl of Home.

The Bonn cabinet is slated to discuss the issue again Friday.

Earlier, chief governme nt spokesman Karl-Guenther von Hase left no doubt in the minds of correspondents that the Adenauer government has agreed to sign the treaty with the proviso that Washington and London give promised reassurances on Communist East Germany.

WORRIED OVER STATUS

Bonn has been worried that the treaty might enhance the status of East Germany. The Communist East German regime is among those that have signed the pact.

West Germany sought firm guarantees that East Germany would not use the agreement to obtain Western recognition, denied in the past.

Rusk stopped off in Bonn Saturday on his way back from the treaty-signing in Russia and was reported to have given the West Germans reassurance.

Von Hase said the cabinet also discussed the exploratory talks Rusk had with Russian leaders in Moscow and at Premier Khrushchev's vacation villa on the Black Sea.

"No change in the Soviet attitude on Germany and Berlin is perceptible," he said.

Salary Increase For Congressmen Is Recommended

WASHINGTON (AP)—A presidential advisory panel has recommended that the $25,000 annual salaries of cabinet members be doubled and that pay of congress members be raised to $35,000 from $22,500.

The group, headed by Clarence B. Randall, former Inland Steel Company Board Chairman, also suggested congress raise to $60,000 from $35,000 pay for Supreme Court justices, the vice-president and speaker of the House of Representatives.

In a report to President Kennedy, the 12-man panel followed many of the recommendations made by the National Civil Service League last April. The report arose from a request by Kennedy to the Budget Bureau and the Civil Service Commission.

The bidding:

North	East	South	West
1♠	Pass	4NT	Pass
5♥	Pass	6♠	

Opening lead — five of diamonds

The Blackwood convention, properly used, is extremely valuable in bidding or avoiding slam contracts. It is of tremendous help to those hands where the number of aces held by the partnership is the key to how many tricks can be made.

Let's say you're South in this hand, taken from a tournament, and your partner opens the bidding with a club. The question of whether there is a slam in the hand rests largely on the number of aces partner has.

Without Blackwood, or a similar convention, you would be up a tree. North could have, say, an 18-point hand containing one ace, or he could have, also, a 13-point hand containing three aces. In the latter case you could make a grand slam, while in the former case the most you could make is eleven tricks.

By using Blackwood directly over one club you learn exactly where you stand. In the actual case, partner responds five hearts, showing two aces and you therefore close the bidding with six spades, knowing the opponents have one ace.

That's the way the bidding went at most tables where the sound contract of six spades was reached. However, at one table where the bidding proceeded this way, North decided to go all out for a top score and converted six spades to six notrump, which South passed.

East led the ace of diamonds and continued with the three when West signaled with the seven. As a result of this line of defense, North went down three tricks— 300 points.

It was only after the play was over that North-South realized that East had led the ace of diamonds out of turn and that South should have been the declarer instead of North. South had bid notrump first and West should have made the opening lead.

If South had realized that East had led out of turn originally, he could have, as declarer, forbidden West to lead a diamond. In that case, he would have made seven notrump

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X R
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three X's, X for the two O's, etc. Single letters, apostrophes, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
