

Sure U.S. Will Whip Recession

WASHINGTON (AP) — President Eisenhower expressed full confidence Tuesday that the American people will whip the recession and get back "once more on the road to ever-higher levels of prosperity."

He also pledged that his administration will do everything needed, including the cutting of taxes, if that "should prove desirable and necessary."

Eisenhower made these declarations in a speech to a conference of Republican women.

DECISION IN MAY?

Earlier, Senator William Knowland of California said it might well be two months before the administration makes a decision on cutting taxes. Last week the word was that it might come in one month.

Knowland, Republican leader of the senate, gave his estimate after he and other Republican congressional leaders had talked with Eisenhower at the White House about tax-cut possibilities, and the chance that other measures might whip the economic slump by themselves.

Some Democrats in the House of Representatives talked meanwhile of cutting taxes by \$7,000,000,000, and Speaker Sam Rayburn (Dem. Tex.) told reporters:

"There are all kinds of schemes going around and in the air."

Eisenhower, in promising any necessary action, said he is flatly opposed to slow-moving projects designed just to make work. He added:

"The hardships to individuals and their families of a temporary downturn in employment are bad enough."

"But this administration is not

going to be panicked by alarmists into activities that could actually make those hardships not temporary but chronic."

Eisenhower divided into two parts what he called the Republican principle on the relation of

the government of the economy. "We believe," he said, "that the government has a never-ending responsibility to keep abreast of the facts of economic activity, and to be prepared, whenever an economic downturn occurs, to do whatever it can to help bring about a healthy increase in employment and business activity."

"But another part of the same principle also holds that the real mainspring of our kind of economy is not government, but the built-in thrust and vigor of private enterprise."
