EQUIPMENT CHANGE

What a difference a day (or two) makes, was in the minds of a number of Battle Creek, Mich., residents last week. Among them, Robert D. Cartwright shown mowing the grass in front of his home last Tuesday in mild, springlike weather. At right he swings a shovel to clear a path after Thursday's heavy snowfall. (AP Wirephoto)

Compromise Indications Seen In ECM

BRUSSELS (AP) — Britain's top Common Market negotiator is returning to the conference table today with cautious hopes that the six Market members now may be ready to show a greater spirit of compromise and urgency.

Lord Privy Seal Edward Heath is too old a hand at the complex Brussels bargaining to expect any overnight change will smooth Britain's difficult path into Europe. But the atmosphere has improved since last month.

The French, whose Brussels brinkmanship has seemed to be based on telling their partners to hold out and Britain would enter on the toughest terms, are being slightly more flexible.

They are yielding to pressure from their partners—West Germany, Italy, Belgium, The Netherlands and Luxembourg.

The Dutch and Belgians, in particular, want the negotiations speeded. They may be in a position to get their way. Joseph Luns, the Dutch foreign minister, is chairman for December meetings. Paul - Henri Spaak, Belgian foreign minister will succeed him. Both are friends of Britain.

Tiny Nematode Found In Nfld.

ST. JOHN'S, Nfld. (CP) — Potato root ellworm has been discovered in eastern Newfoundland, the first occurrence of the golden nematode in Canada, the plant protective division of the federal agriculture department said today.

So tiny it is barely visible, the golden nematode can remain undetected for years until its numbers multiply to the point where damage to potato plants becomes noticeable, the department said in a statement.

So far the Newfoundland infestation is in a small area of Conception Bay from Harbor Grace to Manuels. Crops produced in this area are consumed in the St. John's market. Newfoundland is already under quarantine because of potato wart, which has prohibited export of Newfoundland potatoes since 1910.

LONG BRIDGE

The International bridge linking Canada and the United States at Sault Ste. Marie has an over-all length of 2¾ miles.

Science Now Shrinks Piles Without Pain Or Discomfort

Finds Healing Substance That Relieves Pain And Itching As It Shrinks Hemorrhoids

Toronto, Ont. (Special)—For the first time science has found a new healing substance with the ability to shrink hemorrhoids and to relieve pain and itching. Thousands have been relieved with this inexpensive substance right in the privacy of their own home without any discomfort or inconvenience.

In one hemorrhoid case after another, "very striking improvement" was reported and verified by doctors' observations.

Pain was promptly relieved. And while gently relieving pain, actual reduction or retraction (shrinking) took place.

And most amazing of all—this improvement was maintained in cases where doctors' observations were continued over a period of many months!

In fact, results were so thorough that sufferers were able to make such statements as "Piles have ceased to be a problem!" And among these sufferers were a very wide variety of hemorrhoid conditions, some of even 10 to 20 years' standing.

All this, without the use of narcotics, anesthetics or astringents of any kind. The secret is a new healing substance (Bio-Dyne) — the discovery of a famous scientific institute. Already, Bio-Dyne is in wide use for healing injured tissue on all parts of the body.

This new healing substance is offered in *suppository or ointment* form called *Preparation H*. Ask for individually sealed convenient Preparation H Suppositories or Preparation H ointment with special applicator. Preparation H is sold at all drug stores. Satisfaction guaranteed or money refunded.
