GO TO

J. B. MACDONALD'S,
Queen Street.

Oct. 11, 1880.

THE DAILY EXAMINER.

OCTOBER 20, 1880.

THE English Agricultural Delegates received much attention in St. John. The *Sun* says that "Nova Scotia, as an agricultural Province, seems to have hardly come up to their expectations. They were pleased with the appearance of the country about Truro, and highly delighted with Cornwallis and the marsh lands of King's County. They were also well pleased with some portions of the Annapolis Valley, and were struck with its capabilities as a fruit growing region. They were, however, less enthusiastic over Nova Scotia as a whole than some people expected they would be." But, according to the *Sun*, they were delighted with everything they saw and heard in New Brunswick, and especially in St. John! Regarding their impressions of the other Provinces, the *St. John Telegraph* reports:—

"They were very much delighted with the soil and sward of Prince Edward Island, with its productiveness, climate, etc. The rotation of crops, and their relation to each other—especially the want of sufficient root crops and other matters require revision. Moreover, the products of the field should be fed to stock instead of being exported. They thought well of the horses and sheep of the Island, but thought the cattle might be greatly improved. If sheep farming is extended, an industry to which the Island is well adapted, they would recommend the introduction of Shropshires, of the Down variety. They grow large, yield a liberal supply of wool, and their flesh is of good flavor. The Shorthorn is the Professor's favorite stock, as well for milk as for flesh. He is not insensible to the quality of the beef of the Herefords, and to their thrifty character, but he believes the Shorthorns are, on the whole, calculated to be of greater service to our breeders."

Sir Charles Tupper and the Pacific Railway Contract.

In his telling speech at Brome, Ont., Sir Charles Tupper referred to the beneficial effect the visit of Sir John MacDonald to England, last year, had upon British public opinion, and said:—

"When the Ministers went back to England (this year) they found that the whole sentiment of the country was changed in reference to Canada; that the people with capital were ready to come to the North West, and that they could go back to their original policy, which they had never wholly abandoned. They were enabled to make a contract with capitalists representing houses in Great Britain, Germany, France and the United States, that they would have the utmost pride in laying before the Assembled Parliament at the earliest period consistent with the public interests of the country. The Government of Sir John MacDonald stood in the same position in reference to the policy of constructing the Canadian Pacific Railway as it did in 1871-2, when its policy was adopted in Parliament, and of which Mr. McKenzie said that to talk about building the road for fifty million acres of land and thirty millions of dollars, they might as well talk about doing it for \$10. They would be in the position to tell the Parliament that, although only two years in power, the condition of the country was so changed in the estimation of the capitalists of the world that arrangements had been made upon terms which would secure the construction of the Pacific Railway. The policy of the Government had from the outset been that the land of the North West should pay for the construction of the railway; that would be fulfilled, and by using the credit of the Government for raising some of the money needed, and by a comparatively moderate portion of land, the construction of the railway within ten years had been secured, and secured upon terms which, at no distant day, would relieve the people of Canada of any charge, any debt in connection with that great work. (Applause.)

A CASE of considerable interest to newspaper subscribers came up at the recent Division Court held at Welland. The *Telegraph* sued a subscriber for arrears. Defendant claimed that he had paid the former publisher \$1 in 1874, after which he did not subscribe. He afterwards moved his residence and for over two years had not had it. The Judge ruled that he was liable for the whole amount, and gave judgment accordingly, the defendant having acknowledged being a subscriber by taking part of the papers out of the post office. His Honor said the law was very distinct on this point.

THE sky at night during this month is very beautiful. The planets appear very large. Jupiter is near to the earth and will not appear so large again during our decade. He is almost at his nearest point to our world. Saturn, too, is comparatively near the earth, but his brightness is not so conspicuous as it would be if Jupiter were not his great rival. Both planets are moving south. Meteors and northern lights may now be looked for.

A Surplus Promised.

At Brome, Sir Charles Tupper said: "The Government's most sanguine expectations had been realized and they would close the present financial year with a handsome surplus, the first that had occurred for five years in the history of Canada. Sir Leonard Tilley would be able to redeem the pledge they gave and to apply the surplus to the reduction of taxation upon articles of common consumption—tea and coffee—such as could not be produced within the country itself."

Marriage Laws.

Within the last two years ten marriages have been performed in the United States by telegraph. Says the *Methodist*:—"A serious doubt exists whether such marriages are legal. The parties were in every case in different States and the laws of both have to be complied with. The witnesses saw but half of the marriage (if they saw any of it), as only one of the parties was in their presence. No person with a particle of sound sense would engage in such a farce since it is not probable that any court would declare such a marriage to be legal. It is wicked trifling with the interests of possible children."

Prosperity.

At Brome, Sir Charles Tupper said: "He had no hesitation in stating, and he risked his character as a public man upon the statement, that Canada was entering upon an era of prosperity such as she had never seen before, and the most sanguine of them had never ventured to anticipate. They had an evidence of this in the shipping in the harbor of Montreal. In 1873 it amounted to 412,478 tons; it fell to 197,000 tons in 1878, in 1879 it was over 500,000 tons, whilst this year up to the present time it was some seven thousand tons in excess of what it was for the whole of that year, and the revenue of the Harbor Board had increased by some \$58,000."

Clippings.

Dr. Tanner is just the man to be the guest of a country editor for a week or so. —*Modern Argosy*.

Goat milk should be termed buttermilk, because the goat is an acknowledged butter. —*Lowell Sun*.

The editor of this paper is wifeless, and in a measure homeless, and is open for a limited number of applications to go out and take tea. —*Mitchell Recorder*.

Jinks says he discovered several new asteroids, stars and comets the other evening. It was pretty dark, and he tried to split a tree with his nose. —*Waterloo Observer*.

"Why, Franky," exclaimed a mother at the summer boarding house, I never knew you to ask for a second piece of pie at home." "I knew 't was no use," replied Franky quietly, as he proceeded with his pie eating. —*Boston Transcript*.

A rural chap who witnessed the unloading of Cleopatra's Needle, says he don't wonder that the dusky Queen committed suicide by taking a viper to her bosom, if she had to sew buttons on Mark Antony's pantaloons with a needle nearly seventy feet long, or make shirts for the Jew dealers of Egypt at five cents a shirt. —*Binghampton Republican*.

God created the cat for a purpose. —*Govand Enterprise*. That's fur-fetched. —*Port Chester Journal*. Our cat is mew-sing over it. —*Govand Enterprise*. You folks are kitten too smart for anything, and we join in concert for a paw. —*Friendship Register*. Enough to harrow up the felin's of a mewl. —*Randolph Courant*. That completes the cat egory. —*Ec*. And finishes the cat-ologue.

Hartmann, the Nihilist, telegraphs to the *Paris Intransigent*, a full description of the mine which was to have blown up the imperial train at Alexandro. He explains that the plot failed because an hour before the passage of the train came along the line and cut the wires connecting the dynamite with the battery. Hartmann asserts that there are 13,000,000 of organized radicals in Russia.

THE shipments of cattle from Montreal during the week ending Saturday, amounts to 1,332 head, which shows a falling off of 226 cattle as compared with the previous week. The shipments of sheep are 2,005 head against 1,185 last week.

THE tonnage of English sailing vessels has decreased by about 500,000 tons since 1870, but steam tonnage has increased by about 1,400,000 tons.

The American People.

No people in the world suffer so much with Dyspepsia as Americans. Although years of experience in medicine had failed to accomplish a certain and sure remedy for this disease and its effects, such as Sour Stomach, Heart-burn, Water-brash, Sick Headache, Costiveness, palpitation of the Heart, Liver Complaint, coming up of the food, low spirits, general debility, etc., yet since the introduction of Green's August Flower we believe there is no case of Dyspepsia that cannot be immediately relieved. 50,000 dozen sold last year without one case of failure reported. Go to your Druggist and get a sample bottle for 10 cents and try it. Two doses will relieve you. Regular size 75 cents.
