THE "REAUME" PLOW.

The effect of the Jointer or Skim-plow, is to throw Grass, Weeds, Manure, Etc., into the bottom of the furrow where it is completely buried; and by dividing the furrow-slice, to more thoroughly pulverize the soil.

Also the "CLIPPER"
Sod plow, and other
plows, adapted to every
description of work and
variety of soil.
Catalogues free on
application.

A light two-horse
Jointer Plow, after the
most approved American
pattern. The best gen-
eral-purpose Plow made.
Furnished with patent
board. Share ten inches wide. Remov-
able shin-piece. Coulter as well as Skim-
plow, and Wheel.

It is claimed for the "REAUME"
that it draws lighter than any other
style of plow, plowing the same width of
furrow.

Progress of Oddfellowship.

The following extract from the opening address of the Grand Sirs of the Sovereign Grand Lodge, I. O. O. F., will be of interest to members of the order in this city:—

I congratulate you and the order that, after a session in Providence, that land sacred to toleration, and another session at the sources of the Mississippi, among its wonders of modern civilization, you have returned to this ancient jurisdiction and original birthplace of American Oddfellowship. I welcome you to this historic and traditional hall, whose walls commemorate the line of your illustrious leaders, beneath whose roof your beautiful rites and fraternal work have been constantly exhibited for over fifty-four years. Around you are the firm foundations of your present prosperity, laid in the cement of Friendship, Love and Truth; and, although the workmen are yet dust, their work remains as an imperishable memorial of their love for humanity. Twenty years ago you came to unveil the monument to Wilsey; you will now receive and approve the monument to the intellectual and moral founder. The one a tribute to a great soul and a mighty laborer, the other a tribute to an intellectual and moral leader, whose varied accomplishments and wonderful diplomacy have made landmarks of our Order. Other localities may surpass ours in numerical influence and material progress in Oddfellowship, but this is sacred soil. Here is the first Oddfellows' hall built and occupied by our Order. Here are the sites upon which the first American Oddfellows were initiated, and from which Wilsey went forth to his immortal conquests. Here Wilsey and Ridgely met as types of "Justice and Truth," when "righteousness and peace" may be said "to have kissed each other" in a solemn covenant which concerned the world. Here repose the fathers, in great peace, their labors ended—with grateful tongues, in many languages, inditing their glorious epitaphs. I welcome you, therefore, to this city as to the Mecca of our order.

As required by the constitution, I report the details of my administration as your executive since the last session, and submit my official actions and decisions for your consideration.

These are not prosperous days on either side of the Atlantic. We live in a period of extremes—in which capital and labor have not adjusted their differences; when money, or its representative, is plentiful, but the channels for its distribution are not freely open to industry and enterprise. Yet the indomitable energy of our countrymen is conspicuously manifest in all directions, and the country, though depressed, is vigorously at work to recuperate and prosper. For these reasons we cannot boast of much material progress, but it is a source of pride and encouragement that we have kept our great body in healthy activity and find and report it sound and full of vitality.

Odd Fellows' Memorial.

UNVEILING OF A MONUMENT TO THE LATE SECRETARY OF THE SOVEREIGN GRAND LODGE.

The unveiling of the monument in Harlem Park, Baltimore Md., to the memory of the late James L. Ridgely, Secretary to the Sovereign Grand Lodge of Odd Fellows, took place on the afternoon of the 22nd, in the presence of an immense throng. A procession was formed in front of the hall of the Order and was proceeded by a platoon of police. These were followed by the Chief Marshal of the Order, John James, and Staff. The line was in eight divisions; consisting of uniformed patriarchs from all jurisdictions, aged Odd Fellows in carriages, and last, the mayor and city council with officers and members of the Sovereign Grand Lodge occupying the post of honor. The line moved through the principal streets in Harlem Park. The monument was unveiled by Sovereign Grand Sir Garvey, who made an appropriate address on the late Mr. Ridgely.

The Recession of Niagara.

Sir Charles Lyell, in 1841 and 1842, estimated the gradual recession of Niagara Falls by the undermining of its brink at the rate of about 1 foot per annum. Recent investigations of the subject by a commission for the establishment of a State reservation at the Falls have, however, shown that this and other estimates are more or less erroneous. A map, based on surveys of the Falls made in 1833 by Mr. Thomas Evershed for the New York State Surveyor, has shown that in the forty-one years ending 1883 the annual rate of maximum recession has been 6 1/2 feet. For the eight years ending 1883 this rate is given as 16 1/2 feet, so that the rate of recession has been higher of late. These results were obtained from the Canadian Fall while the American Fall was found to have receded at the rate of 10 inches per annum during the forty-one years ending 1883. It has been shown by the surveys that these two falls were once united; and that, supposing the rate of recession to continue, the Niagara gorge will be cut through in some 10,000 years. Lyell's estimate was 35,000 years. Of course these attempts to calculate the outting of the entire gorge, which terminates at the heights near Lake Ontario, assume that the hardness of the shale and lime rocks, volume of water, and height of the fall continue much the same as they are now.

A Colored Man Appointed United States Minister to Liberia.

Moses A. Hopkins, of North Carolina, has been appointed Minister Resident and Consul-General of the United States to Liberia. Mr. Hopkins was born a slave in Montgomery County, Virginia, and after gaining his freedom graduated from Lincoln University, in the State of Pennsylvania, and the Auburn Theological Seminary, in the State of New York. He has since been engaged in educational pursuits, and as a preacher of the Presbyterian Church. His appointment was recommended by the leading men of both races in North Carolina and pleases all political parties. The appointment is rather a significant one since made by the democratic party—the party that combined all the elements hostile to the colored people's welfare and advancement a few years ago—or the offspring of the old pro-slavery party. It is indeed a happy augury and shows that a true spirit of reform is abroad in the democratic ranks as well as that, under a determined impartial ruler like President Cleveland, though a professed democrat, no class of citizens need have any fear of their rights being slighted or passed over with contempt.

The colored people are an important factor in the politics of the United States. They number nearly eight millions; and in the Southern States are represented in the electoral College by 38 electoral votes. In their politics they are almost all Republicans; the Republicans being more considerate of their rights as well as being the party that made them free citizens. Hence, they have stood almost as a unit for the Republican party North and South. That was while the Republican party was organized and organized in consequence of the nomination of Mr. Blaine for President the colored people, divided as never before; large numbers of them followed their old and tried Republican friends into the ranks of the so-called Reform Democratic party, under Mr. Cleveland, and by these Democrats, Mr. Cleveland was elected as President of the nation. Perhaps he is mindful of this opportune accident, and makes his opportunity accordingly.

Queen Victoria's Will.

(From London Truth.)

The recent changes in the Royal Family must at least have proved highly profitable to the lawyers concerned. Last year the Queen made a fresh settlement of her private property after the Duke of Albany's death, and now I hear that entirely new testamentary arrangements have been made by Her Majesty. The amount of the Queen's private property is unknown, but I am told that, including the Prince Consort's fortune and Mr. Nield's, it exceeds four millions, and besides these, there are the estates in Aberdeenshire, which extend to 33,000 acres; the Claremont property, which Her Majesty purchased from the country three years ago at a very inadequate price; and the Osborne estate, which has enormously increased in value, to say nothing of property at Baden-Baden and at Coburg. It is probable that the bulk of the Isle of Wight property will be left by the Queen to the Duke of Connaught; and Balmoral and most of the Scotch property to Princess Beatrice, who also will probably get Claremont. They will be Her Majesty's principal heirs, and a very handsome provision has been made for the children of the Duchess of Albany, and for the families of Prince Christian and the Grand Duke of Hesse.

How Bees Predict the Winter.

No. 17 of Die Natur contains an article by Herr Emmerig, of Laningen, a German bee as summer warner. From numerous observations, the writer advances tentatively the theory that, on the approach of thunder storms, bees, otherwise gentle and harmless, become excited and exceedingly irritable, and will at once attack anyone, even their usual attendant, approaching their hives. A succession of instances are given in which the barometer and hygrometer foretold a storm, the bees remaining quiet, and no storm occurred; or the instruments gave no intimation of a storm, but the bees for hours before were irritable, and the storm came. He concludes, therefore, that the conduct of bees is a trustworthy indication whether a storm is impending over a certain district or not, and that, whatever the appearances, if bees are still, one need not fear a storm.—Scientific American.

Microscopic Animals in Bricks.

The weathering of brick into a friable state is usually attributed to the action of heat, wet and frost; but from recent observations of M. Parize, the real destroyer is a microscopic creature, and the action played by the weather is only secondary. He has examined the red dust of crumbling bricks under the microscope, and found it to consist largely of minute living organisms. A sample of solid brick also showed from the heart of a solid brick also showed the same animalcule, but in smaller numbers. The magnifying power of the instrument was 300 diameters. Every decaying brick showed the same kind of population, but the harder the brick the fewer were noticed.

NOTES.

Not the promissory, but facts about WELCOME SOAP, an article that does not contain one particle of the adulterations used to reduce the cost of "Pure Goods," but does possess the value of legitimate Washing Qualities, the demand for which proves the advantage gained by the use of the genuine over Soaps of doubtful character. None should be deceived even by Red and Yellow Wrappers, or any of the imitations of the WELCOME, as a pair of clasped hands is stamped on every bar. Made by CURTIS, DAVIS & Co.
