The presidents of the Prince Edward Island Diocesan Board of the Women's Auxiliary elected yesterday afternoon at the con-

## U.K. Listens To Canada, Begins Tooting Own Horn

By KEN METHERAL  
Canadian Press Staff Writer

LONDON (CP)—Britain, acting in friendly advice from Canada, Tuesday began tooting their own trumpet.

With a ceremonial flourish in the members dining room of the House of Commons, she launched the annual review of British industries for 1958, a glossy 136-page report that fairly sings with pride as it relates the achievements of British inventors, scientists, engineers and technologists.

Publication of the review comes less than 24 hours after the release of the report of the 50-man Canadian trade mission which visited Britain last year. The report praised British craftsmanship but said British manufacturers had not told Canadians in Canada sufficiently often or loudly what they had to sell.

R. Reader Harris, Conservative Member of Parliament and one of the men responsible for publication of the review, said one of the reasons it was produced

including session of the annual meeting. (Left to right): Mrs. Eric Lowther, Crapaud, 3rd. Vice Pres. Mrs. Leigh Paynter, Burlington, 2nd. Vice Pres. Mrs. George Wood, 1st Vice Pres. Mrs. W. E. Champion, President. Mrs. A. B. Cosh, Hon. President.

was because of complaints from North America that "we don't blow our own trumpet loud enough."

"Well, we're blowing it now," he said.

Foreign Secretary Lloyd presented copies of the review to George Drew, Canadian high commissioner to the United Kingdom, and to Ambassador John Hay (Jack) Whitney of the United States. He asked that the copies be forwarded to Prime Minister Diefenbaker and President Eisenhower.

Drew said his copy would be taken to Canada Thursday by Sir William Rouses, chairman of the Dollar Exports Council who is heading an 11-man British trade mission to Canada. The publication is to be handed to the Canadian prime minister Friday morning.

Drew said Canada offered "unlimited business opportunities" for United Kingdom manufacturers. But they must "get right down to the purchaser in Canada" to be successful.

## Provincial Home And School Executive Met Yesterday

"Should Prince Edward Island have its own Conference on Education?" Will be the subject of discussion by a panel at the evening session of the Prince Edward Island Federation of Home and School Associations on Thursday, February 22nd. The Associations in Prince and Kings Counties will have a short questionnaire to answer at the afternoon session.

The executive met yesterday afternoon in the City School Board office. Mr. Reginald McNutt presiding. Mr. McNutt was

## Baptist Church Senior Choir Honored At Annual Dinner

Members of the Senior Choir of the Charlottetown Baptist Church were honored on Monday evening on the occasion of the annual choir banquet tendered them by the congregation. The chairman of the function, Rev. H. L. Mitton, explained that for the last number of years it has been customary for the church to express its appreciation to the choir annually by making them guests of honor at a turkey dinner.

In addition to the choir members and their escorts, the following were welcomed as special guests: Mrs. David Cox, Mrs. John Edwards and daughter, Mrs. J. W. Bailem, and Miss Helen Wilson. As part of the program drawn up by Mrs. Ralph Manning and Mrs. Bernice Fetter, Mrs. David Cox and Miss Faye Edwards sang two selections respectively.

Mrs. Ralph Manning, a member of the music committee, voiced the appreciation of the congregation to the Senior Choir for their faithfulness throughout the year to which tribute Miss Mary Newton, president of the choir, fittingly responded.

Mr. Harold Jenkins then expressed the appreciation of the

Department of Public Works in the Province.

Mr. Currie's address to the students was arranged by Clair Callaghan, B. Eng. professor of engineering at St. Dunstan's, who also introduced the speaker.

In his address Mr. Currie, who is an authority on coastal engineering, stressed the need and value of the engineer in modern society, and pointed out some of the major problems met in coastal engineering on P.E.I. and explained how they were solved. He also outlined some of the recent developments in coastal engineering and in other branches of civil engineering.

During his visit to St. Dunstan's yesterday Mr. Currie also presented a volume on engineering to the University library on behalf of the Engineering Institute of Canada. The book, "Daylight Through The Mountain", contains an account of the life and letters of two outstanding Canadian engineers of the 19th century, Walter and Francis Shanly.

The late Mrs. Hutchinson was a sister of Mr. G. D. FitzGerald, City.

Word was received of the sudden passing at Halifax of Mrs. Guard Chaisson, mother of Mrs. (Dr.) John Theriault, of Charlottetown. Mrs. Chaisson passed away Tuesday after having been admitted to a Halifax Hospital Sunday evening. She was in her 67th year.

Born in Magdalen Islands, Mrs. Chaisson was the former Eva Forrest of Grindstone Island.

She was well known in Charlottetown where she often visited in her earlier years with her husband, a Magdalen Islands merchant on business trips. For the past 25 years they had made their home in Halifax and was a yearly visitor to Charlottetown.

Besides her husband she leaves to mourn three sons, Gerald, Jerome and Norman of Halifax and five daughters, Juliette, Irma and Yvonne of Halifax Rita of Charlottetown and Alice of Whitehorse, Yukon. Funeral arrangements have not yet been finalized.

SHOTS HUSBAND  
DETROIT (AP)—A young father was shot and killed Sunday and police said Mrs. Dorothy Syme, 23, admitted shooting her husband, James, 28, when angered because he called her "a lousy cook" and tossed his plate of food on the floor. Mrs. Syme, mother of three children, was taken into custody for investigation of murder.

BLACK-LEG  
Blackleg is a highly infectious and contagious disease affecting cattle and sheep. It generally affects young cattle but can affect cattle of any age. The symptoms are generally so sudden in their onset that they are not observed. The first sign is usually finding dead animals in the pasture. It is caused by a soil borne germ which can live in and about the premises from thirty to fifty years. Just because you did not have blackleg last year or for the last few years does not say that it is not on your premises and that your cattle are not vulnerable.

Protect against the ravages of this disease and the high financial loss by having your calves inoculated against Blackleg prior to going out on pasture. Consult your district Veterinarian for action.

SMUT FREE SEED  
Most varieties of barley, oats and wheat are susceptible to smut and careful and regular seed treatment offers the only method of controlling this disease.

Freedom from seed-borne diseases such as smut is usually considered to be one of the important characteristics of registered and certified seed, and purchasers of this seed, relying upon its quality, frequently sow it without treatment. Yet, even seed of the highest quality, showing a trace of smut, may produce a smutty

## Parkdale H. & S. Met Last Night

At the regular meeting of the Parkdale Home and School Association held last night, Mrs. Arthur Love and Mrs. Stewart MacKay on behalf of Lucy Maude Montgomery Chapter, I.O.D.E. presented Mr. Frank Costello with a portrait of H.R.H. Queen Elizabeth.

The attendance prize for the month was won by Miss McGinn's class. Volunteers to chaperone the youth club were named. They are: Mrs. Eugene Daly, Mrs. MacNeill, Mrs. MacDonald, Mrs. Westhaver, Mrs. Charles Small, Mrs. Doucette, Mr. and Mrs. Charles Small.

Mr. John Martin of the National Film Board showed a film entitled, "Who is Sylvia." A group discussion was held following the showing of the film.

A minute's silence was observed in memory of the late Gordon Rice who for a number of years was supervisor of School Unit No. 1.

## Says Yukon Has Not Yet Begun To Grow

VANCOUVER (CP)—A Vancouver geologist who spent five seasons in the rugged terrain of the Yukon said Tuesday that the territory, with its vast water-power potential and untapped mineral wealth has not yet really begun to grow.

In an address to the geology division of the Canadian Institute of Mining and Metallurgy convention, Aaro E. Aho said most of the Yukon is within a 400-mile radius of Skagway, Alaska, or other potential ocean ports in ice-free coastal fjords giving access to world commerce.

The hydro-electric power potential of the coastal area near Tagish and Atlin lakes alone was reported to be 4,900,000 horsepower, one of the largest sources of cheap hydro power in the world.

Despite the remoteness, lack of population and transportation, some 22,000,000 tons of base metal reserves valued at about \$600,000,000 had been discovered in the four years prior to 1956 at an exploration cost of about \$9,000,000 or about 40 cents a ton of indicated reserves. To the geologist this was a low net cost.

The Supreme Court of Ontario Tuesday ruled that proceeds from the sale of the house be divided among Mrs. Heather's relatives.

SOUTHERN DOMINION  
Population of New Zealand reached 2,174,000 in 1956, including 137,000 native Maoris.

## Find Weather Balloon At Orwell Cove

A weather balloon, carrying instruments for measuring high stratospheric disturbances was found by Jerry Kamphuis of Charlottetown and Nico Visser of Orwell Cove, on Sunday about 25 miles from Charlottetown.

When they first discovered the balloon, they mistook it for a tangled mess of fishing net.

Upon further investigation however, they discovered the tangled cordage of two parachutes. Nearby, in a cardboard box, were the remains of what was a weather balloon. Inside the box were various types of apparatus used for measuring atmospheric conditions.

Information in the box showed that the apparatus was the property of Electrical Engineering Research of Tuft's University in Boston, Mass. A tag attached to one of the pieces of equipment showed that the balloon had been launched on February 2nd of this year.

In about two days, the findings will be on the way back to the research department of Tuft's University where scientists continue to study the atmospheric conditions that surround the earth's surface.

## Kitchener Turns Down Free House

TORONTO (CP)—Kitchener doesn't want the house where former prime minister Mackenzie King once lived, so the house will be sold and the proceeds divided among the relatives of the late owner.

The house of the former Liberal leader was offered to the city as a museum in the will of the late Wilhelmine Heather but was turned down on the grounds that it would cost the city maintenance.

The Supreme Court of Ontario Tuesday ruled that proceeds from the sale of the house be divided among Mrs. Heather's relatives.

Population of New Zealand reached 2,174,000 in 1956, including 137,000 native Maoris.

## Woman Running Again In Controversial Nfld. Contest

CLARENVILLE, Nfld. (CP)—Thirteen candidates including controversial Mrs. Harry (Blackie) Drover, Wednesday offered to contest nine town council seats in a municipal election slated for May 16.

The nominees included seven who were elected to council Nov. 12, 1957, and lost their jobs the following December when Municipal Affairs Minister Abbott declared the election "null and void" because nomination day had been illegally deferred.

Mrs. Drover polled the largest number of votes in the Nov. 12 election and many people thought she should have been named Newfoundland's first woman mayor. But the council voted 6-3 to give the job to Boyce Smith.

Newfoundland communities voted only for councillors and by tradition the councillor polling the largest number of votes is elected mayor. However, the law says the council is free to choose its own mayor.

STORM OF PROTEST  
The appointment of Mr. Smith brought a storm of protest from some citizens who signed a petition asking Mr. Smith to resign in favor of Mrs. Drover. As a result Mr. Smith and five councillors resigned leaving councillor Lewis Moore, deputy mayor Harry Drover and his wife.

The deputy mayor then put his wife in "her rightful place" as mayor. Mr. Moore and the Drovers expected the municipal affairs department to appoint two councillors to give them a work-

ing quorum and call a by-election to fill the vacant seats. However, Mr. Abbott declared the election "null and void" because nomination day had been deferred to give hesitant candidates time to step forward.

Nominations were also deferred in three other communities but no action was taken against them.

In the running again this year are the Drovers, Mr. Moore, Mr. Smith, Ernest Drover, R. C. Gulliford and William M. Brustert. Other candidates include Lloyd Durant, Phillip Stanley and Alex Duffett who ran in elections previous to Nov. 12, 1957.

Residents now are wondering what will happen if Mrs. Drover once again polls the largest number

OPPOSES POLICY  
THE HAGUE (Reuters)—Capt. Marah Junus, Indonesian deputy military attaché here, has asked to be relieved of his post, well-informed sources said Monday. He is said to have disagreed with the central government's policy on the rebellion in Sumatra.

## AGRICULTURAL NEWS

P.E.I. Department of Agriculture

### N.B. ANNUAL

Five members of the Executive of the Prince Edward Island Artificial Breeding Association attended last week the annual meeting of the New Brunswick Central Artificial Breeding Co-operative in Fredericton. The delegation was headed by the President, Smith MacFarlane, York and District Club along with the Vice-president, Ralph Adams, O'Leary and District Club. The Prince County Representative Earl Clark, Kensington, Kings County Representative, Harold Anear, Montague and the Secretary-Treasurer, Dr. George C. Fisher.

Dr. D.G. Moore manager of the Central Bull Battery in the course of his remarks observed that during 1957, 18,688 cattle were bred in New Brunswick while 11,647 cattle were bred in Prince Edward Island. He went on to point out the rapid increase in P.E.I. He said "this is particularly so when you consider that the first Club only commenced operation June 8th 1955. Since that time twelve other Clubs have been organized. It is of interest to note the number of cattle bred to each breed. The Holsteins head the list with 4468 followed by Shorthorns 3460, Herefords 1981, Ayrshires 857, Gurneseys 350, Jerseys 224 followed by bulls not at center 271 and Red Poll and Angus. These figures are on cattle bred on Prince Edward Island during 1957.

NEW DEVELOPMENT  
The new Laboratory was occupied and put into operation in the early part of 1957. It is equipped with the latest in machines for the processing and freezing of semen. It can be considered as one of the most modern Laboratories for such purposes in

COMING EVENTS  
Dance Millview Hall, every Friday night.

Mt. Stewart variety concert to be held in Covehead Hall, April 25th. Sale of Candy.

Cleaning grain until May 15. Timothy seed May 16 and 17. Wilfred Pickering, Clinton.

Marie Variety concert, Holy Name Hall, St. Peters, Monday, April 28.

Annual meetings Grand Orange Lodges L. O. A. and L. O. B.A. Charlottetown, Thursday May 15.

Ellis Bros. Hunter River, unloading car of bran 2.20 at car and shorts, 2.25 at car. Tuesday April 22 and Wednesday morning.

Indian River Players will be presenting a three act play. Path Across the Hills. Stella Maris Hall, Thursday, April 24, at 8.00 p.m.

See the play "The Path Across the Hill" St. Mary's Hall, Souris, Tuesday, April 29th by Indian River players.

Come to Harrington Hall Friday April 25th and see the New Glasgow Junior Farmers concert Sponsored by Brackley 4-H Clubs. Lunches and drinks sold.

canada.

The binocular microscopes with the most modern accessories were purchased. A new printing and labeling machine for frozen semen ampules was purchased. A new type ampule has been acquired to get over the difficulty of tip breakage and incomplete sealing the type first used for frozen semen. A new annual sealing machine was acquired at a very low fee from the Ontario Veterinary College on a recent trip made to that institution by Dr. Moore.

A storage unit 10 cu. ft. size mechanical refrigeration was installed in the month of August and in operation since that time. In January 1958 an auxiliary generator for the unit was installed. In February 1958 one of the most modern processing unit available was installed at the center.

At the present time four storage units of the large size are in operation in both New Brunswick and Prince Edward Island and it is anticipated that more will be added to the local Clubs in each province this coming year.

NB. HOLSTEINS:  
The annual meeting of the New Brunswick Holstein-Friesian Association was held Friday morning, afternoon and included with a banquet on the same evening at Fredericton. During the morning the guest speakers were: Dr. George C. Fisher, Director of Veterinary Services Charlottetown; Dr. D.G. Moore, N.B. Department of Agriculture and Mr. J.C. Bennett, Director of Livestock. These meetings were largely attended by Holstein breeders from all over the Province. The Honorable C.B. Sherwood, Past-National President of the Holstein-Friesian Association of Canada and Minister of Agriculture for New Brunswick participated in the meetings.

Word was received of the sudden passing at Halifax of Mrs. Guard Chaisson, mother of Mrs. (Dr.) John Theriault, of Charlottetown. Mrs. Chaisson passed away Tuesday after having been admitted to a Halifax Hospital Sunday evening. She was in her 67th year.

## Receive News Of Sudden Death

The sad news was received by telegram of the sudden passing of Mr. Fergus Hutchinson of New Liskeard, Ont., on Saturday April 19th.

The late Mr. Hutchinson was a visitor to this Province last summer, accompanied by his wife, the former Geraldine FitzGerald of this City, where they renewed many old acquaintances. Mrs. Hutchinson predeceased her husband last fall only a short time after returning to their home after their visit here.

The late Mrs. Hutchinson was a sister of Mr. G. D. FitzGerald, City.

Word was received of the sudden passing at Halifax of Mrs. Guard Chaisson, mother of Mrs. (Dr.) John Theriault, of Charlottetown. Mrs. Chaisson passed away Tuesday after having been admitted to a Halifax Hospital Sunday evening. She was in her 67th year.
