R. M. H. S.

Testimonial From Duluth, Minnesota.

DEAR MRS. ROSS.—Having tested your "MAGIC HEALER," I wish to express my gratitude to you by this testimonial, which you can use, if you think it will assist you in selling it. Having cut my hand severely with a chisel, the corner of the chisel having entered the palm of my hand, making a long and deep cut, I applied your "MAGIC HEALER" at once, and after three applications I was able to go to work, and in three days the cut was healed up.

Yours truly,
ALONZO H. LAVERS.

LETTERS TO THE EDITOR.

The Egg Trade.

SIR,—At no time in the past history of Canada did the different questions arising in turn demand so much of our cool judgment and active study as the present. Not that we are in any great danger from outside legislation or commercial competition more than before. Whilst we are always more or less in danger from internal sources and divisions, and from those who seek their own individual or party aggrandizement rather than that of their country or nation's goods—and that we are an important nation, both in area and progress, none will deny—in extent we are greater than the United States (with Alaska out), and for progress and general development during the past twenty years Canada is second to none in the world's history in any age. Twenty years ago a little over two thousand miles of old-styled railway traversed our land; now nearly 14,000 miles, with a paid-up invested capital of \$800,000,000 from all sources, mark our progress, together with a canal system of vast benefit aggregating \$55,000,000, and lines of steamers skimming both oceans, subsidized by England to the extent of over \$300,000 annually, and so sided by Canada as to cause such lines to completely revolutionize the carrying trade on both seas, and to change the former centres of commerce from San Francisco and other U. S. ports to those of our own shores in the west. Twenty years ago we knew but little of our country's wealth and vastness—with no means of traveling or studying its capabilities and resources. Now we can do so (witness the European iron kings' recent visit) in a few days, with all ease and comfort, from ocean to ocean. From Yokohama via C. P. R., over Canadian soil, being the bridge connecting the two great oceans, is now but a journey of a few days, and easily made, to Europe, and once there we are in the world's greatest market. Yet some say that Canada is handicapped by reason of our tariff being protective, whilst that of our neighbor's is now almost prohibitory, a fact, and circumstance, over which Canada had no control. Such is the power of the United States people themselves. A power used in the late election for Congressmen evidently in great earnestness of some change, as we find the chief author of the McKinley Bill among others slain in the contest. To Canadians the McKinley or any other bill and future legislation at Washington, ought to be a matter of civil indifference. We cannot expect the Democrats to do anything for Canada, that the Republicans want. We must look to means independent of those ever likely to be given by Yankee enactments. It is no part of their duty to legislate for Canada at their own cost. Hence their late higher and increased tariff law, made in their own interest, as they consider. As to the form of interest and gain intended by the McKinley Bill it is not very clear. Whilst it savors of additional protection, it has strong symptoms of conquest in its make up, possibly that of forcing some sort of union about, and thus gobble Canada up ere she grows greater in wealth and commerce. As to the form of union, it matters little whether it be commercial or political union, or annexation, either would be acceptable, and all of which forms have been agitated and proposed in the past, and most ingeniously put forth by such agencies as certain Toronto newspapers, Messrs. Wiman and Goldwin Smith, who, it is said, have been urged on by Sir Richard and other able and interested promoters in the back ground. Hence the McKinley Bill; but what was really intended by its passage is as yet an open question, susceptible of various interpretations, possibly the *Mail* and *Globe* could answer. At present the "young nursing" bids fair to be a white elephant on the hands of its promoters rather than a commercial injury to Canada. While its legality is doubted by the United States people, its provisions are severely criticised by all nations and peoples of Europe, as well as in the tropics and the antipodes.

The following tabulated statistics, as compiled, are taken from those of Great Britain and Canada, and so extended as to deal with the Canadian hen and her productions. In this the writer has reduced the commercial figures given by the united kingdom, and also our own, to their practical relationship to Canada's egg trade for the year 1889:—

Statement of eggs imported into England for year 1889, showing quantities, whence imported, value, and average price per dozen:

From	Doz.	Value	Rate per doz
Spain	134,860	\$26,965	20cts
France	29,995,860	5,748,204	19.08
Portugal	178,190	30,762	17.02
Holland	224,060	37,084	16.05
Sweden	81,090	12,931	15.09
Belgium	18,270,070	2,764,048	15.01
Denmark	9,467,196	1,369,349	14.07
Germany	30,450,550	4,359,419	14.05
Russia	6,230,360	810,378	13.
All other foreign	8,710	1,693	19.05
Channel Islands & British possessions	174,140	37,696	18.04
General average per dozen			16.08 cents.

For that year: Canada exported to the United States 14,011,017 dozen, valued at \$2,156,725, being 15.03c. per dozen; and of that total, P. E. Island exported 2,147,775 dozen, realizing but \$309,183, or an average of 14.3c. per dozen. Thus we find the total average in England about 15 cents better than that of the United States in dealing with Canada's total export, and about 2c. cents better than the average realized by P. E. Island stock in the United States. Had P. E. Island realized the general English average price per dozen that year, the sum of \$53,694.37 would be the additional gain—about 50 cents a head of the population, which is a nice little gain in store for the Island hen next season, now that every facility for the English market is being provided, cold storage, etc., and a

uniform rate of 15s. stg. per ton freight, which is equal to 18c. cents per hundred pounds weight of eggs. In other words, 800 dozen costs \$3.65 freight, giving a rate below a half cent per dozen, which may possibly be increased by weight of packing cases to nearly one cent per doz. This will be the Atlantic charge. Another pleasing feature of the prospective egg trade with England is the fact that Canadian stock generally, and P. E. Island eggs especially, are quite up to the standard weight, viz., 40.40 ounces to the score.

Much interest is directed towards securing markets for our Canadian products at present. A delegation from Antigua and others of the Leeward Islands, British West Indies, have had interviews with our government with a view to additional trade in that direction, the same may be said of Great Britain and other places, and all as it were courting our Canadian means of exchange in the products of these several countries; for our meats, fowl, butter, cheese, flour, etc., etc. Heretofore we have exported no flour to the British West Indies by reason of the fact, as made known by E. J. Walsh, Esq., Chief Government Engineer of Antigua to our government last week, that the Consular agents on each of these islands are acting in the capacity of commercial agents and recommend those people where to buy, and what goods to import, and at the same time setting forth that Canada cannot produce flour to suit on these islands; but such stratagem is now virtually dead. Canada is to take a hand in this deal and is sure of getting a centre on these so-called consular agents, especially in the article of flour.

In this province I may say, that, horses, lambs, potatoes, eggs and barley, commands as good prices as before, and, hoping the same for my Island home,

I remain,
J. W. HUGHES.

P. S. The average weight of P. E. Island eggs has been given by P. Blake, Esq., M.P.P., speaker, etc., Charlottetown, and is now being used as a guide to value, etc., of Canadian exports. Mr. Blake did so by request of J. W. H.

Ottawa, Ont., Nov. 18th, 1890.

Boston Markets.

BOSTON, Nov. 20.

POTATOES.—Receipts have been liberal this week and demand less active. Prices are ruling lower for everything except choice Aroostook and Houlton Hebrons, which are not in oversupply and held steady at 80 and 83. Burbanks in good supply at about 75c. Receipts of Chenagos heavy, and they are moving only fairly at 73 and 75c. Silver Dollars have to be strictly choice to bring 75c.

EGGS.—The market is still heavily supplied with everything except fancy fresh-laid, and the tone is generally dull and easy. Strictly fancy fresh near-by and eastern sell in a small way at full prices. N. S. N. B. and P. E. I. slow at 26c. Strictly extra fresh Michigan bring 27c., with other fresh western at 24 and 26c. as to quality. Ice house held stock plenty and dull at 18 to 21c, for fair to good marks with some poor down to 14 and 15c. Lined plenty at 19c.

FISH.—The market has a steady tone, prices ruling about as last quoted. The supply of codfish just about equals the demand. Barrel herring firm. Box herring selling fairly at steady prices. Mackerel in pretty good supply, and selling fairly at quotations.

News Notes.

The Indian scare in North Dakota is said to have subsided.

There has been considerable decline in pig iron at Glasgow.

Manitoba wheat dealers are anxious over the panicky state of the Chicago market.

It is proposed to pave King street, Toronto, with asphalt, at a cost of \$322,000.

The Lake Winnipeg catch of fish has been unusually large during the past season.

Austria and Germany have agreed upon the conditions of the tariffs of the respective countries.

The fire in the C. P. R. coal heap at Fort William continues to increase, and no coal will be saved except by removal.

As a reward for his services in the interests of medical science, the Emperor will probably confer a title of nobility upon Prof. Koch.

Lady Rosebery died in Paris a few days ago. She was a daughter of the late Baron Meyer de Rothschild and the wife of Lord Rosebery.

Since September 1 there have been on an average 700 cases of smallpox per week in Madrid, and the disease is spreading in the provinces.

A mortgage for \$75,000,000 has been recorded at Peru, Indiana, by the Pittsburg, Cincinnati, Chicago and St. Louis railway in favor of the New York Trust Company, covering all operated and leased Pennsylvania lines west of Pittsburg.

It is told of Abbe Liszt that on one of his concert tours through Germany he was tendered a banquet at a small town by his admirers. When it was found that thirteen were seated at the table the general embarrassment was checked by Liszt remarking: "Do not be alarmed at such trifles. I can eat for two persons."

The decreased postal rates between Great Britain and the Australasian colonies will go into force at the beginning of the new year. After that date the letter rate will be: for letters not exceeding half an ounce, 2½d. and for post-cards 2d. It is to be hoped that as business connections between this country and Australia multiply in number and importance the postal rates will likewise decrease.

To the Deaf.

A person cured of Deafness and noises in the head of 23 years' standing by a Simple Remedy, will send a description of it to any person who applies to NICHOLSON, 177 McDougall Street, New York. Sep 4 dy law
