Ottawa Stops Payment To Federal Architect

By DAVE McINTOSH
Canadian Press Staff Writer
OTTAWA (CP) — Maj. Gen. Hugh A. Young, deputy works minister, testified Friday before the Commons public accounts committee that he has stopped payment of \$60,000 to Montreal architect Ernest Cormier, because of faults discovered in the government printing bureau's air conditioning system.

He said Mr. Cormier has already been paid \$548,000 as consulting architect for the bureau. The original air-conditioning system, which cost 500,000 to \$600,000, has to be overhauled at an estimated cost of \$700,000, he said.

Gen. Young said the bureau, in neighboring Hull, Que., should have been completed under "ordinary circumstances" in 1952, three years after start of construction. It still is not finished although in use almost three years. Total cost now is \$1,200,000 against an original estimate of \$6,000,000.

CHIEF FAULT
Gen. Young said the "chief fault" lay in the fact that construction was started before final plans and specifications were made and that the "onus" for this rested with Mr. Cormier.

"Who ran this show?" asked David J. Walker (PC — Toronto Rosedale).

Gen. Young named Hon. Alphonse Fournier, former Liberal public works minister and now a judge of the exchequer court; E. P. Murphy, former deputy works minister; Mr. Cormier; Edmond Cloutier, Queen's Printer; and W. E. Powers, consulting engineer.

(Mr. Murphy and Mr. Cloutier declined comment. The other persons were unavailable for comment).

Gen. Young said the original floor of the bureau had to be raised above the water level of a subterranean creek. There now was a space under the floor from which water had to be pumped regularly.

Gen. Young said Miron Freres was paid some \$230,000 for the original excavation although it accepted low tender for the job was \$55,000.

UNIT COST CHANGE
He said 110,000 cubic yards of earth was excavated for \$55,000 and the next 116,000 cubic yards for \$175,000. The unit cost had been altered from 50 cents a cubic yard to \$1.50 and \$2 a cubic yard without new tenders being

mainly to repair the airconditioning system.

Gen. Young said Concrete Construction Company of Montreal was awarded a \$7,999,000 contract for main construction of the bureau but was paid \$8,693,000 because of changes and additions to the original plans. Other bids for the contract were \$8,440,000; \$8,500,000; and \$8,622,000, all less than the final payment to Concrete Construction.

Gen. Young, who became deputy minister in 1953, added that changes and additions were necessary—eight separate additional contracts went to Concrete Construction.

The change in unit price, he said, was "unusual." The change had been arranged verbally between Miron Freres and Mr. Murphy.

Alan Macnaughton (L — Montreal Mount Royal), committee chairman, said at the end of the testimony—to be continued Tuesday—that "if there is any skulduggery it will come out in due course" but that there was "not any evidence of this yet."

Costs of bureau construction being investigated by the committee all occurred under the former Liberal administration with the exception of this year's \$800,000.

structions—but that Mr. Cormier should have known that changes would be needed.

Mr. Walker said the more money was spent on the bureau, the more Mr. Cormier would receive. His fee was five per cent of the bureau's cost.
