

THE DAILY EXAMINER. JUNE 26, 1884.

The Late Mrs. Gordon, Georgetown.

A BRIEF notice of the death of this estimable lady has already appeared in our obituary list. We feel, however, that something more than a mere formal record of her decease is due to the departed. Retiring and unassuming in her disposition, she shewed her faith by her works in untiring deeds of charity to those who needed assistance. In her, the poor has lost a friend who felt delight in feeding the hungry and clothing the destitute, and who allowed none to go empty away. The deceased lady always took a deep interest in the welfare of the Georgetown Presbyterian Church. By her counsel, her means, and active personal effort, she did much to promote its best interests.

She also took special pleasure in entertaining clergymen and their families. Her last illness was tedious and often painful, yet she bore it with patient resignation to the Divine Will; and when the end came, passed peacefully away. Mrs. Gordon leaves two daughters, the eldest of whom is the wife of Mr. H. McLeod, at present manager of the Merchants' Bank at Amherst, N. S.

Her youngest daughter was married only a short time ago to Mr. Weir, a talented and rising young member of the Halifax Press.

She also leaves one son, who is a clerk in his father's store. To her respected husband, the Hon. D. Gordon, and all the members of his family, we tender our deepest sympathy in their sore bereavement.

Aerial Navigation.

AND now electricity is spoken of as the true motive power for navigating the air. Capt. Fred Burnaby, in a most interesting article in the Fortnightly Review, on the "Possibilities of Ballooning," in which he graphically relates the whole story of ballooning from its early inception to the present time, says that "so far as the solution of the problem of how to navigate the air is concerned," we believe that balloons have done more harm than good. The attention of inventors has been diverted from what is possibly the only feasible way to obtain the desired end—namely, the construction of a machine which, itself heavier than the atmosphere, will be able to strike a blow on the air in excess of its own weight. Machinery worked by steam is much too heavy for this purpose; electricity some day, perhaps, will be available. An engineer, who has made electricity his study, recently informed an assembly of gentlemen that, in the course of the next ten years, he believed it would be possible to compress enough electricity in a substance the size of an egg-shell to drive an express train from London to Liverpool. Science has not arrived at this point yet, but who can tell, after the telephone, the phonograph, and other marvellous discoveries of Edison, what it may do in the future. Inventors should never forget that a bird is heavier than the air, and that the bird flies because its strength enables it to overcome the difference between its weight and that of the atmosphere it displaces. To put the case in a nutshell, aerial navigation is a mere question of lightness and force. This latter saying of Capt. Burnaby is as concise and appropriate to the science he treats of, as is the famous apothegm of Matthew Arnold in reference to literature and culture.

—The Patriot is exceedingly anxious that the Hon. Donald Ferguson should be Lieut. Governor. It would, no doubt, please those who inspire the Patriot to have their abject opponent shelved. As a farmer, Mr. Ferguson has a strong claim to the sympathy of this agricultural Province, and as a debater of political questions, he can beat anyone the Grits can bring forward out of sight. Yes, it would be well (for the Opposition Party) if he were shelved; but we are mistaken in the man if he is yet ready to be shelved—even in Government House.

—A correspondent of the Montreal Herald recommends New Brunswick and Prince Edward Island as places of summer resort, and says,—

"A steamer leaves Shediac for Summerside, P. E. I., every day, and another leaves Summerside for Shediac, at about the same time daily (Sunday's excepted), so that communication, in summer at least, is constant and rapid, and the island province—one of the most fertile and prosperous in the Dominion—suffers sadly in winter."

—The Patriot says:—"No reply yet to our article on 'Tariff Definitions,' therefore we must conclude that it was unanswerable." Or else, the Patriot might have added, not worth noticing.

The King of Cambodia has transferred the administration of his kingdom to the French Governor of Saigon.

Serious anti-Semitic disorders have occurred at Krivavoge, Russia. Many houses occupied by Jews were wrecked.

England is negotiating to have a British officer appointed to the supreme control of all troops in Egypt.

Colorado democrats want unlimited silver coinage.

THE PUBLIC SCHOOLS.

Midsummer Examination—List of Prizes.

PRINCE STREET SCHOOL. THE closing exercises of this school were well attended. Among the visitors were Messrs. A. Kennedy, T. Handrahan, J. B. McDonald, and D. Farquharson, of the Board of School Trustees; Mr. D. Montgomery, Superintendent of Education; Messrs. Caven and LePage, of Prince of Wales College and Normal School; Mr. P. Blake, M. P. P. Rev. K. McLennan and Mrs. McLennan, Rev. Mr. Wadman, Rev. Mr. McKenzie, Dr. Taylor, Mr. Oxenham, Hon. A. A. McDonald, R. K. Fitzgerald, Esq., Mr. Davis, of the Patriot staff, Mr. Bowers, and a large number of ladies.

The staff of Upper Prince Street School consists of Mr. Mellish (Principal), Miss Snaddon, Miss Barr, Miss J. McNeill, Miss Boswell, Miss Eliza McNeill, Miss Wade, Miss Mutch, Miss McLeod and Miss McKinlay; and the scholars in attendance number about five hundred.

The primary and most important classes are in charge of Miss McKinlay, and Miss McLeod. In these classes there are boys and girls, in about equal numbers. They seemed to be well up in the "extension motions," a part of juvenile drill which has been too much neglected; and it was evident, from the examination, that pains are taken to give them a firm grounding on the first principles of literature and arithmetic. Miss Mutch has a nice mixed class in a very pleasant room; and her scholars did good work in the examination. The same may be said of Miss Eliza McNeill's class, which is composed of boys only—indeed, the school seems to be much more boyish than in former years, and it may be that influences are at work in our town to restore the proportion between the sexes.

At any rate, Miss McNeill's boys showed that they can do simple sums in mental arithmetic with quickness and accuracy, and when examined by Mr. Duncan, demonstrated that they knew well how to use their slates and pencils. We regret that THE EXAMINER'S representative had not time to see under examination the classes taught by Misses Wade and Boswell; but we are enabled to say that the manner in which the pupils of Miss J. McNeill, Miss Barr and Miss Snaddon, passed the ordeal, reflected great credit on themselves and on their respective teachers. The Principal's class was not so full at it has been. It was examined by Messrs. Montgomery, Caven and others, and the young ladies showed a ready acquaintance with history and grammar. The readings were very good. The course of instruction in the Principal's department includes the English branches, Mathematics, Latin and French.

At twelve o'clock Mr. Kennedy, who acted as chairman, called a very large audience in the upper hall of the school to order; and said, in effect, that the Board of Trustees were much pleased with the school. The entertainment which preceded the giving away of the prizes was excellent of its kind,—the singing of the little girls being particularly fine and worthy of commendation. The following is the programme as rendered:—

TO-MORROW. Queen Square School is to be examined to-morrow.

Queen Square. The ornamentation of this public place is rapidly progressing. The plants so handsomely contributed by Mr. Alderman Stephen, Chairman of the Halifax Public Gardens Committee, and carefully packed by Mr. Powers, the chief gardener, arrived in good condition, and a promise of further aid and assistance in beautifying the Square, has been kindly offered to Mr. Newbery in letters received from Alderman Stephen and Mr. Powers. Little more than a month has elapsed since the movement was inaugurated. On the 24th May numbers of our worthiest citizens planted the trees, which will, in a few years, adorn by their foliage and give the comfort of their shade to the passengers using the various walks, with which the Square is intersected.

More than 400 loads of material have been used in the formation of these roads, which are so designed as to give the greatest amount of accommodation to the persons using them. Considering that a few years must elapse before the newly planted trees would become ornamental, the Committee resolved to anticipate the arrival of that time by planting a suitable number of flower beds; and, as we have previously observed, Mr. Arthur Newbery was deputed to secure the services of a gardener, experienced in landscape work, if possible, both at home and abroad, and from numerous applicants he selected Mr. G. Fletcher, of Leicester, England, and late manager for Mr. Temple, Boston Back Bay Park, who entered upon his duties on the 7th instant, and has designed and planted numerous beds, including the three national emblems—rose, thistle and shamrock. It is probable that, by the end of the week, this part of the work will be completed, after which, time can be given to bring into order the edges of turf and roughly finished walks, etc.

The applications for special flower beds have been so numerous that compliance with all could not be granted, every household appearing to want one opposite his property; a sure sign of approval. The Patriot sounds a note of alarm lest the

flower planting should be overdone, but in estimating the space occupied by the beds on the north side the writer has overdone it with a vengeance. Instead of "one-half," not one-fifth has been appropriated. In making the erroneous statement the writer must have mistaken the newly graded patches, which are at present bare of grass, although they will not long continue so; as they are sown with a suitable mixture of lawn seeds.

It is a pity that such careless statements should be given by editorial authority, calculated, as they are, to hinder the progress of a work promising so many advantages, moral and material, to this city. Already it is gratifying to learn that not a single plant of the many hundreds set out, is missing, or has been damaged wilfully. We may summarize briefly the results hoped for by the committee:

1. A spread of taste for the beautiful in nature, and its application for home adornment; and the tendency of which is toward greater mental and moral refinement and to diverting through such simple pleasures the gloom and discontent which so frequently exists in homes where nothing but what is only useful or necessary finds place.

2. A feeling of satisfaction that we may be able to show our visitors this kindred attractions, of which we have hitherto been destitute, an opportunity will arise some five weeks hence, when Lord Lansdowne is to visit us.

Thirdly and lastly that an increase in the value of property contiguous to the square cannot fail to ensue. So, Floreat Charlotetown!! and the "Garden of the Gulf."

N. B.—The expense of the current year will be the largest to be incurred, comprising, as it does, the heavy works alluded to, but the future cost of maintenance will be quite within the means of those who take an interest therein.

Supreme Court. THURSDAY, JUNE 26.

The Grand Jury to-day returned true Bills as follows:— The Queen vs. John Doyle (orngoose) for housebreaking, and stealing from the premises of Donald Nicholson, tailor. The Queen vs. Alfred Farmer, John Doyle and Patrick Dunn for housebreaking and stealing from the premises of the keeper of Sherwood Cemetery. The Queen vs. James Leonard, South Shore, for committing an assault with a pitchfork on James Curtis, while in the execution of his duty as Deputy Sheriff. A bill presented against James Stewart for arson was not found.

Previous to their discharge to-day, the Grand Jury made the following presentments:— GRAND JURY ROOM, Trinity Term, June, 1884.

The attention of the Grand Jury has been called to the necessity of some proper and suitable place being set apart and appropriated for the use of the Magistrates of Queen's County, in the discharge of their duties as such. That since the introduction of the Dominion law, the duties and powers of Justices of the Peace have been greatly extended, and thereby a large saving in the public expenditure for criminal trials before the Supreme Court has been effected.

We would, therefore, request your Lordship to call the attention of the Government to this matter at your earliest convenience. For self and fellows, CHAS. C. GARDINER, Foreman.

The Grand Jury respectfully call the attention of the Court to the dangerous condition of the crushing machine, the property of the local Government, as it now exists, by the side of the most public thoroughfare near the city, on the Malpeque Road. As persons are constantly passing the road by day and night, a very serious accident may happen at any moment by the sudden giving way of a single prop, which should be remedied forthwith. For self and others, CHAS. C. GARDINER, Foreman.

GRAND ORANGE TEA At Pownal.

A PUBLIC TEA will be held at Pownal, on the 12th Day of July, under the auspices of Prince Edward Lodge, on the beautiful grounds of Alexander McKee, Esq., which he has kindly given for the occasion.

The steamer Southport will leave Ferry Wharf at half past ten o'clock, to convey persons to and from the grounds, at one single fare.

The Committee in charge will spare no pains to make this the Tea of the season. A new lot of games and sports will be introduced, and many other ways of amusement will be on hand to make all enjoy themselves. No spirituous liquors will be allowed at or near the grounds.

The location for the Tea is in a very eligible place, commanding a fine view of the harbor and in a very picturesque part of the country. The sister Lodges are cordially invited to attend.
