are using

COTTOLENE

instead of lard. Not but the
purest, healthiest and cleanest
ingredients go to make up Cotto-
lene. Lard isn't healthy, and is
not always clean. Those who use
Cottolene will be healthier and
wealthier than those who use
lard—Healthier because they will
get "shorter" bread; wealthier
because they will get "shorter"
grocery bills—for Cottolene costs
no more than lard and goes twice
as far—is it but half as expensive.

What the Beer Business Does for
the Country.

Let us carefully summarize what has
been said elsewhere in reference to the
financial results to the country of moderate
beer drinking.

A workman who drinks daily two
lasses of beer at five cents each, will this
year spend annually \$36 50.
This represents about 45 gallons of beer.
This represents about 3 1/2 bushels of
barley.

For this barley the farmer gets about
\$2 45.
The balance of the workman's \$36 50
stays in the hands of the brewer and liquor
seller. The workman has swallowed
his beer and has nothing of value to show
for his money. He may have weaker
nerves, a less clear brain and a dangerous
appetite, but we leave these out of our cal-
culations now, and say he has literally
nothing.

Suppose that prohibition became law,
and the workman did not spend this
\$36 50 for beer, it would be available, and
would be spent in needful articles for his
home. The bread, the butter, the cheese,
the meat, the vegetables, the woollen
clothes that it would purchase, are all
directly or indirectly the produce of the
farm. If we allow the manufacturers and
dealers in these articles 40 per cent of their
selling price for profit, the farmer will still
get \$21.90, and the traders have \$14.60
but it must be noticed that now the work-
man has had something to show for his
money. Food in his cupboard, clothing
for his family to the full value of \$36 50.
And it must not be imagined that the far-
mer has failed to sell his barley. He has
exported it either in grain or changed to
beer, and has received the \$2 45 for it all
the same, but with this difference, that the
country has in it \$2 45 more than it would
have if its workman had drunk that
barley in the shape of beer.

Let us put these calculations in the form
of a comparative table, showing what is the
result of the workman's \$36.50 in these
different cases:—

UNDER LICENSE.
The farmer gets for his barley.....\$ 2 45
The farmer gets for other produce..... 0 00
The merchant and manufacturer get..... 0 00
The workman has left..... 0 00

Total for farmer, trader, workman.....\$ 2 45
Balance for brewer and liquor seller... 34 05

Total of money and value held by all...\$36 50

UNDER PROHIBITION.
The farmer gets for his barley.....\$ 2 45
The farmer gets for other produce..... 21 90
The merchant and manufacturer get... 14 60
The workman has goods value for... 39 50

Total for farmer, trader, workman...\$75 45
Balance for brewer and liquor seller... 0 00

Total of money and value held by all...\$75 45

Some one will be ready to ask, "Do not
the brewer and liquor dealer in the first
case use this money in employing men and
paying production?" The reply is,
"Yes, but not nearly to the same extent as
the farmer and trader in the second
case."

The great brewing and distilling interests
of Canada are not only preventing the
accumulation of wealth by the people, they
are absorbing and locking up in their pos-
session the little wealth that does exist.

The second case may be made even
stronger.—The liquor seller will be driven
under prohibition to engage in some better
business that will bless the country instead
of cursing it. The wealth they produce
and hold will not be represented by \$0.00,
and the aggregate \$75.45 will be still fur-
ther increased; but, in the first case, under
the beer system, there can be no change in
any of the items of \$0.00, as the out-
come of the workman's expenditure of \$36.50.

Looking for Manufacturers.

THE SUCCESS THAT ATTENDED THREE MONTHS
BUSINESS OF A NEW CONCERN.

A chosen committee of shrewd business
men of the St. John Board of Trade, met a
few days ago to consider in what way the
City could induce more manufacturing; to
talk over the possibilities of their town for
manufactures, and to make known its
advantages.

This is one of the signs that the people
of St. John are alive and seeking to in-
crease its business and manufacturing out-
put. Another sign is the success that some
of the later manufacturers are meeting
with. This is notably the case with the
Hawker Medicine Company, which has just
completed its first quarter of business.
Let fall say the formation of this company
which includes among its stockholders
gentlemen who have been foremost in the
business world of the province, who have
not been afraid to be enterprising and to
operate extensively, fearlessly and con-
fidently when they did enter upon an un-
dertaking.

That is the spirit with which these men
took hold of the Hawker remedies, and the
push and ability shown by the directorate
and management since the first of January
has been such that at the end of March the
showing was such as to surprise even the
most sanguine directors. When it is stated
that the sales were so large that one quar-
ter of their value paid their entire news-
paper advertising which appeared in seventy-
five newspapers in the maritime provinces,
then some idea can be formed of the popu-
larity of the goods.

Much of this is due to good advertising,
to practical travellers and to energetic
management; but at this would have been
in vain had not the Remedies themselves
possessed the true secret of popularity—
they are what they are represented to be.

If you are in poor health, and are in
doubt what to take to restore your health
try Hawker's remedies. They are endorsed
by all classes.

Paul Society.

SEVENTH ANNUAL REPORT.

The first meeting for re-organizing the
society for work was held on the fourth of
November when the following office-bearers
were elected: President, Mrs. Reddin;
Treasurer, Rev. Father Reid; Secretary,
Miss Katie Caven. The total number of
active members was twenty-three. There
were fifteen meetings held with an average
attendance of fourteen members at each
meeting. The honorary members were ten.

The amount of money and the sources
from which it was derived are as follows:
From members and friends.....\$ 81.10
By Concert given by Cathedral Choir. 83 10

Donation from Mr. A. McEachern... 5 00

\$187.60

The expenditure is comprehended under
the following items:—
Paid for boots.....\$ 53 50
Cash to deserving poor..... 20 50
Cotton, cloth and dress goods..... 97 68
Rent of Lyceum and expenses of
Concert..... 14 25

\$186 23

Leaving a balance on hand of \$1.37.
The society has also to thank Mrs. J. B.
McDonald for two pieces of cloth, Mrs.
Handrahan for shirting, Mrs. James Mc-
Leod for a piece of cloth, Mrs. B. Callaghan
for socks and stockings, Mrs. Young for a
number of children's hats, and several
members of the congregation for left off
clothing.

The following is a list of the clothing
distributed to the poor:—

Boots, 66 pairs; socks and stockings, 29 do;
mitts, 18 do; drawers, 6 do; coats, 23 do;

Query.

SIR,—Will some of the school teachers
throughout the Island answer the following
questions:

Which of those three words is the proper
one to go in the blank space in the following
sentences, viz., "to," "till" or "until" ?
First sentence—I will be absent from home
from 6 p. m. of March 28th—midnight of
the same date.

Second sentence—I am going away for a
few days; take care of my horse—I come
back, or—return.

If someone will kindly answer the above
questions, they will greatly oblige a subscrib-
er.

APLOT AGAIN.—For some time back
Captain Simon Cheverie, with a crew of
men, has been at work repairing the
wrecked schr. Georgia Harold, which was
driven ashore at Souris last fall.
On Wednesday last she was floated off the
rock and her sails hoisted to the westerly
breezes which sent her, just as the ice was
leaving the shore, in shelter of the break-
water, where she now rides safely at anchor.
Captain Cheverie displayed skill and sound
judgment in getting this schooner off and
into shelter just at the right time. Any-
thing he can't do in taking off wrecks it
would seem useless for others to attempt.

Nineteen Boxes.

BRANTFORD, March 20.—The Expositor last
week published an article on the case of Archie
Kymal, of this city, which has caused consid-
erable excitement in Brantford and district. It
appears Mr. Kymal has had more than his
share of suffering during the past few years, so
far as he has run down from kidney disease that
he had lost the power of his limbs and back.
He could only get around with the aid of two
crutches, or when assisted by kind hands. His
death was daily expected. On the advice of
his wife he tried Dodd's Kidney Pills, and
took in all nineteen boxes. His improvement
was marked from the second box. He is now
completely cured, and a living testimony of
the curative powers of that wonderful remedy.

THAT HAY.—The Patriot a short time
ago—in referring to the fact that a large
number of farmers in the eastern part of
the Island are short of fodder for their
cattle—gave its readers to understand that
the Local Government contemplated purchas-
ing hay and sending it east for sale at
cost and charges on credit to those in want
of the same. About the same time petitions
were passed around for signature. Mr.
Premier Peters, it was said, was anxious to
give a hay grant, but wanted something to
work on. Hence petitions were needed.
These were promptly signed and forwarded
to the Government. But alas for the poor
farmers. After being told that the hay was
sure to come for the asking, nothing has
been done yet by way of supplying it.
Was the whole thing only a political dodge
from first? It certainly looks very much
like it, but it is too cruel a dodge to prac-
tise on honest farmers, and is sure to meet
the resentment it deserves.

In reply to oft repeated questions, it may
be well to state, Scott's Emulsion acts as a
food as well as a medicine, building up the
wasted tissues and restoring perfect health
after wasting fever.
