Disaster at Sea.

SAN FRANCISCO, Aug. 21.

The Merchant's Exchange of this city has just received the following particulars of the loss of the British ship Haddingtonshire. The vessel left Astoria on July 6th. She got down as far as the equator, when she was struck by a heavy gale which so disabled her as to oblige the captain to put back to San Francisco for repairs. In the gale he lost four seamen and the chronometers. When off this port last night they encountered a heavy fog, and while groping around ran on the rocks near Point Reyes. The vessel and cargo are totally wrecked, and all on board except one sailor and a cabin boy drowned.

LETTERS TO THE EDITOR.

Fish Exhibit.

SIR,—As the Upper Provinces can be made, to some extent, a market for fish, would it not be good policy for our Local Government to have a neat exhibit of fish put up for the London (Ont.) Exhibition? Quite a large outlay was incurred some years ago in forwarding cattle to Montreal. As far as any material benefits would follow, as well send coals to Newcastle. With fish the case is different, as the Upper Provinces now buy a large portion of their supply of salt water fish in the United States.

Yours respectfully,
H. F. COOMBS.

The Water Works Question.

SIR,—Your article on the Water Works in yesterday's issue, wherein Mr. Gamble's opinions on the question are pretty fully explained, affords much valuable and interesting information to our citizens. It would, indeed, be highly satisfactory to know that an abundant supply of pure water can be had within a distance to warrant the cost of its introduction into the city. That question once settled, would be so far very well. But yet another grave question stares us in the face and requires the most serious consideration, and that is: whether a complete system of sewerage, in connection with such Water Works, would be an absolute necessity. Why has not Mr. Gamble's opinions on that important matter been elicited by our Council Board? It would be well also to ascertain if he is a competent authority to decide on such a vital question to our citizens. It is currently reported that Mr. Gamble has already admitted, in presence of some Councilors, that a system of Water Works for Charlottetown would necessitate a system of sewerage. But whether he did make the admission or not matters little, the facts will remain the same—that sewerage will, if we have a water supply, become an absolute necessity. Let us hear from those who think otherwise through your columns.
