Take me to your Admiral dealer

...we hear that Admiral TV for '59 is out of this world

Take a look at Admiral TV for '59 and you'll be saying the same thing. It's like watching TV for the very first time . . . discovering that wonderful things have been happening since TV first came into your life. It's finding that Admiral gives you a picture so clear and bright and realistic that it's almost 3-dimensional . . . that Admiral sound is High Fidelity sound . . . that Admiral controls have done away with all the little irritations you've been putting up with for years. It's the enjoyment of having TV that's an attractive piece of modern furniture . . . as Admiral TV for '59 introduces "decorator approved" originals that are even slimmer than the first Admiral slimline models.

Take one look *inside* Admiral TV for '59, and you'll see some of the things that have made these advances possible. There's the 110° picture tube . . . the shorter tube that has banished the old-style "bustle" in the back that once marred the appearance of your TV. There's the horizontal chassis that reduces operating temperature, lengthens the effective life of components, helps to make possible that slimmer-than-ever cabinet. There's the power transformer that delivers more consistent power, steps-up voltage delivered to the picture tube.

There are so many new Admiral features in the '59 line. But they all add up to viewing that's away ahead of anything you've yet experienced. So if *you* want to get the most out of viewing, see your Admiral dealer . . . let him *show* you just what we mean. Then believe your eyes . . . if you can . . . and enter your own new world of TV entertainment with Admiral TV for '59.
