A Hard Profession.

Old Dr. Johnson once said, addressing a class of medical students, that the study of medicine was a most arduous undertaking; that the most comprehensive mind and the most inquisitive student could scarcely do more than explore the portals to medical knowledge during the brief time allotted to study before commencing practice, but that throughout his whole life the responsibilities of his profession should rest upon him like a nightmare.

He should explore every avenue of natural knowledge, must become familiar with chemistry, natural philosophy and natural history, but, above all, he must learn the construction of his own frame, the means by which he lives, moves and has his being. He must understand the nature of all those influences by which health is broken down and restored, and by what means disease, suffering and death may be averted.

The good that men do in this life lives after them. During the lifetime of old Dr. Johnson he invented what is known as Johnson's Anodyne Liniment, a standard family remedy of surpassing merit. This liniment is both for internal and external use and it is safe to say that no single remedy ever discovered has done so much good as this one. It is inexpensive, ready at a moment's notice night or day and may be used with absolute confidence in the thousand and one ailments that afflict humanity. In the cure of severe cramps or pains in the stomach or bowels, dysentery, diarrhoea, it is certainly worth its weight in gold. It has been known to cure cases from ten to fifteen years standing after the sufferers had been given up.

Toronto, April 14.—In his address at the opening of the synod of the diocese of Toronto yesterday, Bishop Sweatman said Toronto would have the honor of being the place of holding the 5th synod of the Church in Canada, which will open on September 13th. His lordship spoke regretfully of the way the churches are sending money abroad, while he had to borrow money to carry on the affairs of the church at home. The debt on St. Alban's cathedral is \$50,000, and the diocese should at least help to wipe it off.

Physician Heal Thyself.

Toronto, June 5th.—A physician of the County of Leeds has written to a friend in this city about his complete cure of an aggravated form of diabetes by Dodd's Kidney Pills. The doctor in question would not for the world have his learned brethren of the Ontario Medical Council know that he had given countenance to a patent medicine. He humbly admits that some of them would deem it unprofessional conduct for him to take the pills; and to be cured by them—why that is the grossest breach of professional etiquette. But cured he has been, and he is now prescribing them to his patients. Modern physicians admit that diseases such as dropsy, diabetes, bright's disease, neuritis, rheumatism, female weakness, and kindred blood troubles are caused by the deranged action of the kidneys, and that these diseases are only to be cured by an agent that acts directly on the seat of disorder. This is why Dodd's kidney pills have proved a certain cure to all who have tried them.

WINNIPEG, June 14.—The Northwest is experiencing terrible heat this week—probably the hottest June weather in years. With the previous plenitude of moisture, the waridays are rushing growth, and crop reports still continue of the brightest character.

As Old as Antiquity.

Either by acquired talent or heredity, the old fees, Sorfula and Consumption, must be faced generation after generation, but you may meet them with the odds in your favor by the help of Scott's Emulsion.

OTTAWA, June 14.—Green goods circles are again being poured into the country through the market. It will be Canadians that they have nothing to do with the business, as the Dominion law is very strict.

PARIS, June 14.—A report from Calais says cholera is confined to the town and in widespread epidemic is feared. Cholera has disappeared from the department of Morbihan.

Rev. Wm. Lawson, speaking of Hawker's Tonic says: It gives me great pleasure to add my testimony to the restoring, toning and building up properties of your justly celebrated Nerve and Stomach Tonic.

MONCTON, June 14.—Carter and Connolly, the two prisoners who escaped from Dorchester penitentiary, were captured this afternoon at Meadow Brook, nearly twenty miles away. They had travelled mostly through woods and had a rough time of it.

C. Nicholl, of St. John, says that Hawker's Tonic is the best medicine he ever took. He strongly recommends it to all.

LONDON, June 14.—The House of Commons yesterday passed the third clause of section 1 of the Irish Home Rule Bill. The debate on this clause commenced on May 30th.

A Paris despatch reports that there will probably be an American Princess. It is said that a young Vanderbilt is to be the happy groom, and a daughter of the house of Borghese the blushing bride. The only impediment to the union seems to be the religious scruples of the Italians. The Borghese who claim the distinction of having a saint among their ancestors, and a sainted Pope at that (Paul V. in 1623), can hardly afford to mix with a family of disbelievers, as they call them in Rome. They are also somewhat chagrined over the fact that the Vanderbilts cannot go back further than a steamboat captain. The Vanderbilt, on the other hand, have recalled the fact that one of the best known of the family, Camillo Borghese, married the widow of a commoner, though she was the sister of Napoleon Bonaparte, to which the Borghese reply that Camillo separated from his wife after the overthrow of Napoleon, and broke off all communication with the family of the Corsican.

The Telephone Company

P. E. ISLAND.

Parties using the Telephone would find it talking much more satisfactory if they would observe the following rules: 1st. Speak with the mouth about four inches from the transmitter. 2nd. Speak in a moderate tone of voice, not too loud and distinctly. 3rd. Place the telephone so as to cover the ear just as if you wished to shut out all other sounds. Do not press too hard on the ear. It is possible to talk and be heard when standing back two or three feet from the transmitter, if you speak loud enough, but it is not a pleasant mode of conversation, is entirely unnecessary, and is a useless waste of wind and lungs, besides being very annoying to all within range of your voice.
