

Sons' of Temperance.

GRAND WORTHY PATRIARCH'S REPORT. To the Officers and Members of the Grand Division of P. E. Island, S. of T.

WORTHY REPRESENTATIVES.—By the favour of Divine Providence we are again met under favourable circumstances to attend to the duties devolving upon us, in connection with the Grand Division, in the hospitable and prosperous village of New Glasgow.

Since our annual meeting in October we have passed through what is always a trying season to the cause of Temperance—the Christmas and New Year festivals. But we have cause to be thankful that the high standard of good sense and morality which obtains in our Province, through the teaching of Righteousness and Temperance, restrains to a great degree the free and unlimited use of intoxicating beverages, as was formerly the case at this happy season.

In reviewing the past quarter there is not much to record. Our Order and the cause of Temperance in this Island is progressing. Our Divisions in general seem to be in a healthy condition, and doing good work. We have received very encouraging reports from a number of our deputies. The true spirit of Temperance seems to prevail to a large degree throughout our Divisions, and it gives us pleasure to know that we have in our ranks good men and true, who can be relied on to do their duty.

During the quarter we have organized one new Division at Montague, under very favorable auspices, having 29 charter members. I regret that, through the delay of the trains, I was not permitted to be present at its organization, but feel sure that my absence was fully made up by the presence of our indefatigable Grand Scribe.

I lately received a communication from a good brother of Crystal Spring Division, which has not met since July last, stating that they intend calling a meeting shortly with the view of having the Division reconstituted, and I hope soon to see that Division again in good working order.

Our Order does not more depend for success in opening up new ground than in keeping and successfully utilizing what we have already attained. It is a very unwise policy to let our Divisions go down. They are like strongholds in an enemy's country: every one which we abandon is a victory for the enemy. We should, therefore, use every means to keep up and improve our Divisions. Every man is expected to do his duty.

The cause of Temperance is passing through a trying time on this Island. The Canada Temperance Act, which we hailed with such pleasure, and from which we expected such happy results, has not fulfilled our expectations.—Not from any defect in the Act itself, but from the failure of having it put into successful operation. The question raised in Queen's and Prince counties as to the legality of the Temperance election is still, I believe, undecided, and this want of decision in our judges and those whose duty it is to see that the law is properly executed, is much to be deplored.

As true sons of temperance we have much to do. Our work is not half accomplished. Because we have succeeded in securing the election of the Canada Temperance Act we must not be satisfied, but must work unceasingly until it is generally recognized and respected, or until we have obtained prohibition.

Let onward be our motto; to give up now would be to acknowledge defeat; remember the foes of temperance and the friends alike judge the cause by us, and are influenced by our example.

I would therefore recommend that some special effort be made without delay for the accomplishment of this object, and suggest that a certain session of this meeting of the Grand Division be set apart for its discussion, with this object in view. And that a special committee be appointed to report at that session on the best means to be adopted.

Brethren and sisters, we welcome you to this meeting of the Grand Division, and trust that in coming here you have been inspired by one motive—the advancement and prosperity of our noble order. With this in view, lay aside every other consideration. We entreat you to approach every subject which may be advanced for your consideration in a true brotherly spirit, fully realizing our responsibility, and the importance of the work in which we are engaged, and fully assured that we are in the right, and with truth, mercy, and God on our side we must succeed.

And may the Great Patriarch above direct us in all our deliberations for the advancement of the cause in which we are associated.

Submitted in L. P. & F. G. W. BENTLEY, G. W. P.

A Few Suggestions.

To the Chief Engineer of the Fire Department of the City of Charlottetown.

1. The Steam and Hand Engine Houses should be visited at least once a week, for the express purpose of having the hose unreeled and put on again, and another length put next the centre each time. The Chief will see the propriety of this suggestion when he comes to consider the facts, that the part of the hose which comes next the centre of the reel are actually so "kinked," that it is next thing to impossible to straighten them out in less than five minutes, and time is very important in a case of fire, when property—yes, and life—is sometimes at stake.

2. A nozzle should be procured, with an elbow formed in the butt. The importance of this will appear when we come to consider. For instance: A building is on fire, and the only access to the part on fire, with the hose, is by the second-storey window. Then, in many cases, the fire is five or ten feet to one side of the window, and it is impossible to bend the hose for water to play on the fire, without sinking the hose and consequently stopping the flowing of the water. In this case I know whereof I affirm; for on many an occasion I have seen the pipemen utterly helpless in trying to stop the fire in such cases.

3. The organization of a Salvage Corps is of great importance, for, as at present, property in case of fire is thrown out upon the streets, and in many cases destroyed by peccators.

Hoping these suggestions will be acted upon and not treated with contempt because I offer them. I remain yours etc., JOHN McMASTERS.

Ch'town, Jan. 1781.

W. C. HOBKIRK, Secretary. Jan. 20, 1882.

NOTICE

THE BELL TELEPHONE COMPANY OF CANADA will apply to the Parliament of Canada at its next session for amendments to its Act of Incorporation 43rd Vic. ch. 67, whereby the Company shall be empowered to issue Bonds, for the purposes stated in the second section of said Act, in sums of not less than \$25 each, and to manufacture besides the articles referred to in such second section, such other articles or things as the Company may deem advisable, also to transmit messages by telegraph as well as by telephone, also to purchase telegraph as well as telephone lines, and whereby it shall also be declared that the Company shall have power to extend its telegraph and telephone lines from any one to any other of the Provinces in the Dominion and whereby also it shall be declared that said Act of Incorporation and its amendments and the works thereunder authorized are for the general advantage of Canada.

BETHUNE & BETHUNE, Solicitors for said Company. Montreal, January 17, 1882—1m

TO THE PUBLIC.

AT the Chicago Convention, held in December last, a Resolution was adopted guaranteeing a special levy of \$250,000, to be forwarded to Ireland immediately. A circular has been received from the Irish National Land League of the United States recommending each Branch to adopt measures to raise a special contribution to this sum. Accordingly at the last meeting of the Charlottetown Land League action was taken on the matter, and a Committee of ten—two for each Ward—was appointed to canvass the City, to receive subscriptions from all sympathizing with the object of Ireland. In accordance with the wish of this meeting, I would ask a generous response to the call of the gentlemen who will, in the course of a few days, wait on you. The object of this appeal to your generosity is one which I hope will recommend itself to your sympathy. It is to dry the tears of a nation, to aid and comfort the homeless and homeless, and, if possible, to finally obtain for the people of Ireland what the tillers of the soil on this Island now happily enjoy—namely, free lands and happy homes.

M. P. HOGAN, President Charlottetown Land League. January 18, 1882.

CHARLOTTETOWN BUSINESS COLLEGE,

(ESTABLISHED 1873.) Welsh & Owen's Brick Building, Corner of King and Queen Streets, Charlottetown, P. E. I.

REAGH & MILLER, - - Proprietors. Designed to Educate Young Men for Business.

OUR SYSTEM is conducted on Actual Business and Scientific Principles, and embraces all subjects necessary for a thorough Commercial Education. Our facilities for teaching those are the most complete that have ever been devised. Theory and practice are combined, and the whole course rendered so interesting and practical that the duller student cannot fail to be largely benefited. The course of study is short, practical, useful and reasonable; it is just what every MAN needs and will use, no matter what his calling or profession is to be.

The youth commencing a business life with only industry and integrity as his capital, the clerk engaged during business hours, but desirous by evening study to repair the defects in his education, each have the advantage offered by our session occupying DAY AND EVENING. Morning Session, 9.30 to 12 and 2 to 4 p. m. Evening Session, 7.30 to 9.30.

Diplomas granted to such as pass satisfactory examinations. Students may enter at any time. No entrance examination required. Business men and others are cordially invited to call and examine our system.

Teach your sons what they will practice when they become men.

Full particulars concerning Terms, Tuition, Scholarships, &c., &c., on application to L. B. MILLER, Principal. Jan. 7, '81—e. o. d.

MORE LIGHT!

THE Charlottetown Gas Light Company have imported some of "BRAY'S BURNERS," which they will supply and fit on Gas Brackets, etc., at a moderate cost to consumers.

These Burners are reported to be the best Flat Flame Burner yet produced, and will give a far greater amount of light than any other Burner with the same consumption of Gas.

Dr. Wallace, F. R. S. E., F. C. S. E., Gas Examiner to the City of Glasgow, in a lecture delivered by him, calculated that £110,000 (\$650,000) a year are thrown away in Glasgow by the use of imperfect fittings. On the subject of Gas Burners he says: "Another and as I think a better Burner is that called Bray's regulator, and as I consider these the best union Burners attainable at moderate cost, I have selected them for a series of experiments."

The report of the Committee of the British Association of Science to enquire as to the best means for the development of light from Coal Gas of different qualities—comprising Dr. William Wallace, Professor Dittmar, and Mr. Thomas Wills, F. C. S. E., F. I. C. E., showed that Bray's Burner yielded the greatest amount of light of all the two or three score of Burners reported upon, which included all the Burners of repute in the market.

In a pamphlet upon Light and Heat, published by R. B. Tauer, A. M., he says: "The cost of Gas as compared with other illuminants is much more economical when rightly used, than many suppose. From experiments made for this purpose, the following results have been obtained. They were made by burning samples of Devco's Brilliant Oil and ordinary Oil, and testing their illuminating power. It was found that Coal Gas costing one cent at \$3 per thousand feet, gave a light equal to 18 candles; while Devco's Brilliant Oil, containing 27.4 grains costing half a cent, gave a light equal to 9 candles. A good Argand or Johnson's Burner, the Burner's used in the last experiment, will therefore give the light of 2 ordinary Oil Burners in direct comparison, at no greater expense in the case of the finer and safer grades of Oil. Lights, however, on the authority of scientists, are not to be compared in direct proportion, but in proportion to the squares of their powers, and such a comparison with the case of the use of Gas, its cleanliness, freedom from odor and danger, renders its use desirable wherever it can be introduced."

As the above experiments were made with Gas at \$3 per 1000 feet, and not consumed through Bray's Burners, it will readily be seen how much more economical it is to consume Gas instead of Oil, when its price is only \$2.63 per 1000 feet as now charged here when consumed, more especially through Bray's Burners.

Messrs. Goodwin & Co., of Philadelphia, the well-known manufacturers of Scientific Instruments for testing the illuminating power of Coal Gas, etc., say in their Circular to Gas Companies: "In presenting the Bray's Standard Patent Silt Union Burners and Lanterns, for which we are the sole Agents in the United States, to the attention of the public, we are convinced that we are fitting a want long felt." They further state: "The yield of light from these Burners is 12 to 20 per cent greater per cubic foot of Gas consumed than that from any flat flame Burner hitherto introduced."

Wanted for the DAILY EXAMINER. Subscriptions and most Newspaper Publishers in the Province.
