## Byelections Please Prov. Liberal Leader

Referring to Premier Walter R. Shaw's announcement that by-elections will be held Feb. 9 in 5th Prince and 1st Kings, Provincial Liberal Leader A.W. Matheson said yesterday he is pleased that the Summerside area will again be fully represented in the Legislative Assembly.

The Prince County seat has been vacant since April, 1963, when Lorne Monkley resigned to run in the federal election. The death of House Speaker John MacLean last fall created the 1st Kings vacancy.

Mr. Matheson said it was "strange that the by-elections have been called at this time." He said "all along the premier has been maintaining that the Summerside area was adequately represented in government."

Premier Shaw said yesterday it was almost impossible to hold an election early in 1964 because of centennial activities.

He said it was the general feeling of persons in both elec-

toral districts that the elections should be held as soon as possible.

The by-elections will be carried out under old legislation and not the Election Act that was passed by the Legislature two years ago but which has not been proclaimed.

"Carrying out the forthcoming elections under the new Election Act would upset the status quo," the premier said.

**CONTEST FOR COUNCILLOR**  
Since the Prince County seat is for councillor, only property owners will be eligible to vote in that by-election. The Kings seat is for assemblyman and both property owners and non-property owners may vote.

The unproclaimed Election Act would give a vote to everyone over 21 years of age.

Premier Shaw indicated today that the by-elections will have a bearing on the opening date of the 1965 session of the Legislature. He said "We will keep the introduction of the two new members in mind when we set the opening date."

## SHIVERING STRIPERS

What's black and white and blue all over? Rocky and Robi, that's what. The zebra, native to the warm Kenya country of Africa, are bred by owner Bruce Wisely on his snowcovered farm on the outskirts of Vancouver. There's little relief in sight from the cold snap which has gripped the West Coast of Canada for weeks. (CP Wirephoto)

Another speaker said "if you wait for economists' results you'll wait 'til hell freezes over."

**HOW DOES IT COMPARE?**  
How does fishing compare as a resource in multi-purpose bodies of water (dams, irrigation, power, pulp mills, logging, and how can preservation of fish and "eco-existence" be worked out?

Dr. N. H. Morse, head of the economics and sociology department at Acadia University, Wolfville, N.S., expressed some puzzlement at use of the terms "value and benefit-costs."

"It has been said of economists that if you laid them all end to end they'd still point in all directions," he said.

## FALSE TEETH

That Loosen  
Need Not Embarrass

Many wearers of false teeth have suffered real embarrassment because their plates dropped, slipped or wobbled at just the wrong time. Do not live in fear of this happening to you. Just sprinkle a little PASTETITE, the alkaline (non-acid) powder, on your plates. Hold false teeth more firmly, so they feel more comfortable. Does not sour. Checks "plate odor breath". Get PASTETITE at drug counters everywhere.

## New-comfort as DEEP HEAT helps rub away arthritic pain

DEEP HEAT relief begins in mere minutes. This fast acting Rub helps bring welcome relief from arthritic, rheumatic, or muscular pains. You find you can move, work, do all you usually do with much greater comfort.

DEEP HEAT gives these twin benefits to help rub away your pain: Deep Heat penetrates below the surface of your skin, and a pain-reliever acts fast.

DEEP HEAT stimulates local circulation where you feel a tingling warm glow that's so soothing. Pleasant to use. Greaseless, stainless. Economical.

## JAYCEES PREPARE 'DO-IT-NOW' CAMPAIGN

Members of the Charlottetown Junior Chamber of Commerce are busy preparing for the annual "Do-It-Now" winter employment campaign, which gets underway here Saturday. Looking over stacks of promotional material at the

## Impaired Cases Heard; One Is Given Dismissal

SOURIS — James Louis Clooney of Dundee was fined \$100 and costs on an impaired driving charge before Magistrate James B. Johnston, QC, in Kings County Magistrate's Court here yesterday. Crown prosecutor was J.A. McGuigan, QC.

Louis Phillip Carter, Souris, charged with possession of homemade beer, was fined \$35 and costs or 30 days.

Charged with attempted theft of a can of beef from Souris Co-op, David Earl Gregory, Souris, was fined \$35 and costs or 15 days.

John William Jarvis, Souris, was fined \$5 and costs or five days on an assault charge.

Michael Bernard McCormack, and Daniel Gerard MacDonald, Harmony Junction, pleaded guilty to theft valued at less than \$50. Their cases were adjourned to Jan. 20 for sentencing.

**CASE DISMISSED**  
Daniel John Laybolt, Dingwell's Mills, appeared on a charge of impaired driving, to which he had previously pleaded not guilty. Following testimony

by Cst. William Rowan and Cpl. Colin Craig, both of Souris RCMP detachment, the case was dismissed.

Roy Thomas MacDonald, Albany Cross, also pleaded not guilty to impaired driving. Evidence was heard from Cst. Kenneth Lynn of the RCMP and Cst. Mark Murphy, Georgetown police. The case was adjourned to Feb. 3. M.J. MacQuaid is representing the accused.

Frederick William MacEwen, Morell, pleaded not guilty to driving while his license was suspended. The case was adjourned to Feb. 3 for hearing.

The case of Hilda Pauline Longphee, Little Harbor, charged with theft of an automobile, was adjourned to Jan. 20, with no plea being taken. Defence counsel is M.J. MacQuaid.

The case of Raymond Joseph MacKinnon, Forest Hill, charged with possession of a still, was adjourned without plea to Jan. 13 in Georgetown.

Three persons charged with illegal possession of liquor were each fined \$20 and costs or 30 days, and one person charged with intoxication in a public place was fined \$20 and costs or 15 days.

## LOCAL BRIEFS

**SATISFACTORY**  
Theodore (Ted) MacArthur, caretaker of West Kent School, underwent an operation in the Charlottetown Hospital Tuesday. His condition is reported satisfactory.

**IN MEMORIAM HOSP.**  
Elvert Godsoe, Montague, is a patient in the King's County Memorial Hospital.

**RETURNS HOME**  
Edward Quigley has returned to his home in St. Peter's after having been confined to the Prince Edward Island Hospital for treatment.

**SPEEDER FINED**  
Charged with speeding, Willard Lank of West Royalty was fined \$10 and costs by Magistrate James B. Johnston, QC, in Queens County Magistrate's Court yesterday. Intoxication in a public place cost one accused \$20 and costs.

**CITY COURT**  
In three cases before Magistrate A. J. Haslam, QC, in city police court yesterday, one drunk and incapable was fined \$20, another was sentenced to 30 days in jail with sentence suspended, and a motorist was fined \$10 for failing to dim his headlights.

**TO HAVE SURGERY**  
George Raymond Perry, Spring Park Road, Charlottetown, is a patient in the Charlottetown Hospital. He will be undergoing surgery in a few days.

**CARD PARTY HELD**  
Following are the results of Wednesday night's card party at the Basilica Recreation Centre: Ladies' first, Mrs. John MacIsaac; second, Mrs. Joseph Roche; gentlemen's first, Harry Hughes; second, Joseph Roche; freeroute, Mrs. Joseph Roche and John Coady; special, Mrs. Ambrose Doyle; door prize, Mrs. John Chumley.

## Souris' First 1965 Mother Given Gift

SOURIS — Mrs. Stewart Cameron of East Point, mother of the first baby of the new year born in Souris, was presented with a silver mug yesterday by the hospital auxiliary.

A girl was born to Mr. and Mrs. Cameron Sunday. It was their fifth child.

The presentation, made annually by the auxiliary to the mother of the first child of the new year, was made by Mrs. Clarence MacDonald, Souris, auxiliary president.

## Relatives Die In Accident

Mrs. Ray Leard, Souris, has received the news of the death of her cousins, Mrs. Lewis Haslam and daughter Elsiebeth, Mrs. Odell Lane, both of Mobile, Alabama, in an auto accident on Dec. 21.

Mrs. Lane, only daughter of the late Lewis Haslam of Florida and granddaughter of the late Mr. and Mrs. Joseph Haslam of Hampton, P.E.I., is survived by her husband and three children, David, Nancy and Meredith.

An aunt, Mrs. Muriel Galvin resides in Bristol, Rhode Island.

## WORLD POPULATION

The population of the world in mid-1964 was 3,283,000,000.

## French conversion of dollars into gold would only make economic sense if this were to hasten a devaluation of the dollar.

**REACHED A HIGH**  
In Paris, the French finance ministry said the nation's reserves in gold and currency reached a high of \$5,201,000,000 francs (\$5,040,000,000) at the end of 1964.

In December, the ministry said the government may begin gradually converting about \$300,000,000 of currency reserves into gold in order to restore a normal 75-per-cent gold holding in the treasury reserves.

An accumulation of currency has cut the gold proportion down to about 70 per cent, the sources said.

French conversion of dollars into gold would only make economic sense if this were to hasten a devaluation of the dollar.

**REACHED A HIGH**  
In Paris, the French finance ministry said the nation's reserves in gold and currency reached a high of \$5,201,000,000 francs (\$5,040,000,000) at the end of 1964.

In December, the ministry said the government may begin gradually converting about \$300,000,000 of currency reserves into gold in order to restore a normal 75-per-cent gold holding in the treasury reserves.

An accumulation of currency has cut the gold proportion down to about 70 per cent, the sources said.

French conversion of dollars into gold would only make economic sense if this were to hasten a devaluation of the dollar.

London brokers said the market has been active for some time now, and activity in Paris following confirmation of the French government intends to convert a substantial slice of its dollar holdings into gold is just one more factor. These sources said an early price decline seems unlikely.

The Times at London says the French conversion of dollars will not directly affect the open gold market. The central bankers' buying pool is unlikely to have retained large undistributed stocks of gold—especially since the latest purchases of gold from the Soviet Union took place last spring and almost all commercial offerings in the intervening period have been absorbed by private buying.

The conversion would therefore go through the ordinary channel via the Federal Reserve Bank in New York or agents of the United States Treasury. The Times says, adding: "In other words, the reaction of private buyers to the planned

## Amateur Fishermen Seen Giving Data To Biologists

By PAUL DUNN  
OTTAWA (CP)—With scientists at a symposium on sport fishing a gathering there's a dearth of knowledge on the topic, one economist wants to see amateur anglers "put to work" adding the professionals.

Professor A. D. Scott of the University of British Columbia noted the help amateurs provide in astronomy, ornithology, meteorology and other sciences.

"Why couldn't fishermen help biologists? They could collect water samples, report on levels, interview visiting fishermen."

Other speakers at the three-day symposium of biologists and economists on the economic aspects of sport fishing agreed the fisherman, not the fish, should be the ones emphasized.

Dr. P. A. Larkin, director of the Fisheries Research Board station at Nanaimo, B.C., said the papers heard to date "show an emphasis on the social aspects" of the sport fishing problem.

**BETTER FOR FISHING**  
"It may well be that the world would be a better place to live in if everyone went fishing... or a better place because of sport fishermen—liars that they may be."

Expanding this theme, he said sport fishing took "virtually no skill, anyone can do it." There was a high element of luck and "the fellow with the least experience and the least expensive tackle can catch the best fish."

Dr. Larkin and other speakers agreed it was important to know a lot about the fisherman—where he fishes and why.

In preserving the sport fishing environment "you preserve it for many other outdoor activities, future generations may appreciate our preservation for entirely different reasons," Dr. Larkin said.

Dr. L. A. Walford, director of the Atlantic laboratory of the U.S. department of the interior at Highlands, N.J., said his country has used amateurs in its programs "since the beginning."

**DRUGGERY INVOLVED**  
"The work involves a certain amount of druggerly but some students and housewives come to the laboratories and work gratuitously through the year."

A number of anglers helped with tagging "including sharks along the Atlantic Coast."

That's a rather slow business, tagging an eight-foot shark.

Amateur skindivers had been organized into a "kind of underwater Audubon Society, only they're fish watchers." It was

difficult to identify species underwater.

Professionals were lowered in metal cages into the ocean because of the shark threat and because "it's hard to get biologists."

Professor Scott summed up the research needs. The scientists had expressed after two days discussion on the sport-fish topic and the questions that must be answered:

**WHAT ARE MOTIVES?**  
—What makes people fish? What are their motives and the cost factors?

—What is the quality of this resource (does an area with a higher success ratio draw more fishermen)?

—What is the cost of the various levels of quality of fishing?

—How much of a factor is access (more visitors, same visitors more frequently, length of stay)?

—What are fishermen's incomes, occupations and how

know a lot about the fisherman—where he fishes and why.

In preserving the sport fishing environment "you preserve it for many other outdoor activities, future generations may appreciate our preservation for entirely different reasons," Dr. Larkin said.
