

THE DAILY EXAMINER.

OCTOBER 24, 1889.

Notes and Clippings.

The Sultan of Zanzibar has issued a comprehensive decree, promising to ensure the abolition of slavery.

The monetary situation is easier at all the financial centres of the world, and there seems no good reason why this tendency should not increase.

Estimates made by competent and careful persons put the amount of money annually spent in Europe by American tourists at a round \$100,000,000.

The standard in Japan is gold, and the gold yen is intended to be par with our gold dollar. Silver, however, is the main metallic currency, and the silver yen in circulation is worth about 75 cents, intrinsically, or 5 per cent. more than our silver dollar.

It is estimated, says the Calgary Tribune, that Sir John Lester Kaye will have about 120,000 bushels of grain on his farms this year, which will leave a surplus of at least 40,000 bushels, after supplying the farms with food and seed. This is not so bad for the first season.

The "break" in the potato market is due to be regretted. It is due to large consignments from the Western States. Prices of other things are fairly well maintained, and if our people are only reasonably economical and prudent, their prosperity will, without doubt, go on unchecked.

The editor of a Konigsberg journal has been sent to prison for a month because his paper contained an article reflecting upon the Empress Frederick. As he had simply reproduced the article from another paper in order to denounce and refute it, the editor, no doubt, is now reflecting bitterly upon the imperfection of human justice.

The Reichstag, of Germany, is again in session. In the course of the opening speech Emperor William said: "The active attention of the present Reichstag has been especially directed to the securing of peace abroad and at home, and the tasks of the forthcoming session will be in the same direction."

The Canadian Colonization Company has purchased 26,000 acres of land near Qu'Appelle, Assa. The intention is to establish a number of farms, to be worked by the Company. Families will be brought from England to work the farms, with a view to their becoming actual settlers at the end of one year. Prof. Tanner is at the head of the enterprise.

In the United States the general trade situation continues favorable. There is less activity in the eastern trade centres, but the distributive movement throughout the interior is still going on favorably, under the stimulus of good weather. The great industries of the country are all in excellent condition, and iron and steel are showing increased activity, indicating a heavy consumption. The price also has advanced materially, and the productive capacity of some of the mills and foundries has been sold ahead for several months. This fact will tend to stimulate the iron industries of Canada.

In a lecture delivered this month by the Rev. D. V. Lucas, at Vancouver, B. C., he made the following remarks: "He had read editorials in certain papers in which it was stated that the idea of a confederated empire was a glorious dream which could not be realized. But glorious dreams had been realized, and so they would again. 'I look back,' said the lecturer, 'to the days of the Heptarchy, and methinks I see sitting on a stone resting an old warrior, scarred, maimed and weary. He had been fighting in the battles of these days, and is tired of the struggle to keep a king on the throne of a seventh part of England, and I say: 'My dear man, do you think the time will ever come when these seven kingdoms will be united into one, and all will sing together, "God save our King!" 'Sir, he replies, 'it is a glorious dream, but it can never be realized.'"

Japan has a representative in Canada, in the person of Mr. F. Yamashita, who is accredited as consul to Vancouver for that Government. This gentleman, on a recent visit to Winnipeg, stated the desire of his Government to develop a larger commerce with Canada, both in exports and imports. Japan requires grain, flour, lumber, cottons, and other manufactured goods, and is able to supply in turn tea, rice, silks, syrups, and such ingenious articles of Japanese manufacture as we are all familiar with. He thinks the principal trade of Japan with Canada will be with the region west of our great lakes. This may be true of Canadian exports, but the imports from Japan must necessarily go further east, where the great body of consumers are to be found. At any rate, this must be true for some time to come; in future, a large consuming population will be found on our western prairies and in British Columbia. Mr. Yamashita makes careful enquiries about the elements of the trade which he is anxious to see established between Japan and Canada.

Summerside Journal: During the past season we have visited many sections of the Province and are pleased to note evidences of prosperity on all sides. There is hardly a village or settlement in Prince Edward Island where there are not new houses, barns and other buildings in course of erection or completion, and all of a class far superior to those erected in former years. Better fences, more orchards, neater premises, a greater acreage of cultivated fields, better methods of farming, improved seeding and farming implements, and larger herds of improved and pure-bred stock, are everywhere visible, while the people are better educated and better dressed than their predecessors, and their houses furnished in a superior manner. In the great majority of farm houses one will find a piano or an organ, with accompanying evidence of refinement and prosperity. These things all go to show that the country is making steady and solid progress, and the savings bank returns show that our farmers are not only living within their means, but are actually, while improving and beautifying their farms and dwellings, laying up money. These gratifying indications of real and substantial prosperity are incontestable, and they are evident to every observant person, and even those who claim that the country is not prospering, speak contrary to their own intelligence, observation and conscience.

In Memoriam.

MRS. E. J. HODGSON.

Droopeth the flower of the summer, Fast waneeth the glory of day; Voices around us are telling, All earthly doth wither away. Here the rich strains of rare music, Borne upwards of summer's soft gale, Are lost in the sigh of earth's sorrows, And sunk in bereavement's sad wail. There shall dear households long severed Rejoice in the anthem sublime; Joy-peals of spirits united Shall echo o'er dirges of time. Sickness and pain shall vanish, The years, fraught of sorrow shall cease; O'er the glad souls of the ransomed, Eternity rolleth in peace. Charlottetown, Oct. 23rd, 1889.

On the Death of Mrs. Edward Hodgson.

Another dear friend has passed away, Once more a kind voice is still; How sad to think of the vacant place None other so well could fill. In many a home there are saddened hearts For the one just laid to rest; But God, in His infinite goodness, called— And He surely knows what is best. We'll think of her now, as to sleep she is laid, From sickness and sorrow free; And none will forget her—the blank that is made Is marked wherever you be. How much in the church will her absence be felt? She'll be missed by the sick and the poor; But our loss is her gain; she is free from all pain! Still we miss her—the friend who's no more. A FRIEND.

An Important Meeting.

The annual meeting of the stockholders of the Charlottetown Driving Park and Exhibition Association, was held in J. D. McLeod's Hall last evening. There was a good attendance.

The directors submitted their report for the year, which was adopted. Messrs. Gardiner, Blake, Fitzgerald, Davies, Rogers, Sutherland and Lange were re-elected directors.

It was decided that the thirty-two shares still unsubscribed, should be open to farmers only up to New Year's, after which date any shares not disposed of may be taken by others than farmers.

The directors report is very interesting, and we regret that we are unable to find space for it in THE EXAMINER. After showing the financial standing of the Association and the result of the two calls made upon the shareholders, they refer to the excellence of the park appointments and the success of the recent races which brought in a net profit of \$609.17 to the Association. Taken together the profits from the races and the ordinary account would represent a dividend of about 4 per cent on the total paid up capital. On capital account the expenditure has been greater than the receipts by some \$3,382.20, and the unfinished contracts upon the grand stand will increase this sum to a total of some \$4,757.20. The profits from the races and ordinary account will lessen this amount, while the balance due on the second call, together with the final call now made, will pay every liability now accrued or to accrue, i. e., finish the work now under contract, and leave a surplus of about \$1,200.

For the further purposes of the Association, the directors report that there are the following resources available:— (1) Balance from calls (2nd and 3rd)—races, etc., say \$1,200. (2) Thirty-two shares stock, not yet subscribed, and worth \$3,200. (3) Lands, outside of Park fence, which the directors estimate to be worth from \$5,000 to \$6,000, or some \$10,000 in all, a sum which, with a small addition, they consider will be sufficient to erect exhibition buildings and stables on the grounds. It is suggested that arrangements be at once made with the Government for the taking over of the exhibit tions, and the erection of the necessary buildings.

On the whole, the report is a very satisfactory one.

Cardigan Notes.

Business is brisk at Cardigan Bridge. Eight schooners were loaded last week and sailed, and seven more have arrived. The brigantine Willie is loading at Morson & Morgan's wharf, and the brigantine Corsican will finish this week.

Among the late arrivals is the schooner Laburnum, of Shelburne, to load for Mr. Minto. This handsome vessel is newly launched, and is now taking her first cargo. She is about 115 tons, and is said to have been built in six weeks.

George E. Goff, Esq., Cardigan, shipped 1600 bushels potatoes off his farm in three days last week, getting 24 cents per bushel cash; and in four days stocked over \$500 for potatoes, oats and turnips. Cardigan is the right place for farming.

A general subject of remark with the farmers is the excellence of the roads this fall. The Patriot and its jaundiced correspondents may mourn about the uselessness of the local Government; but so long as the farmers can haul such immense loads as they do this fall, and their sons can speed their horses at a three minute clip over our highways in the month of October, there will be little attention given to the wails of the hungry in the Opposition camp. With good roads and no taxes, the people are quite satisfied to let the present quiet continue. If the Opposition had the reins, none of these things would be, and the people, knowing when they have a competent, honest and economical Government, will vote for their return to power every time they get a chance. Let one of the Opposition resign and see if these are not the facts.

One of the strongest signs that the age of revolutions has disappeared from Mexico, never to return, is the organization of new banks all over the country. Capital is proverbially timid.

TREMONT, Ohio, Oct. 22.—In the village of Woodville, in this county, nearly one-third of 800 people are victims of typhoid fever and diphtheria. Last week there were ten deaths from typhoid fever and nearly that number from diphtheria. Business is entirely suspended.

Fresh sausages of the usual quality made daily at the Fish Market. oct23 3i

Horse Notes.

The following is a copy of a letter to Mr. James Guard, of Southport, from T. Ewart, Esq., manager of the Dunsmore Stud Farm, Rugby, England, relating to the shire horse "Dunsmore Gay Lad," imported by Mr. Guard in August last. The letter shows what success the horse's relatives are attaining in the shows throughout England:—

DEAR MR. GUARD,—Many thanks for your letter, which I received all right. I was pleased to hear you had landed the horse in such good condition. I am pleased to hear that Gay Lad has so many admirers, as I quite expected he would. I trust he may cause so much sensation that the name of Mr. Guard's Gay Lad will shortly become so well known for miles around that his name will be familiar to every farmer. I have just sold a sucking filly foal from a mare by Canute for £105—a handsome price, is it not?

We did good showing after you left, particularly so at Coventry. We almost cleared the board, winning first and second prize in the two year old stallion class, one of the prize takers being a full brother to Gay Lad. We took the following prizes in other classes: First, second and third prizes in one-year-old stallion class. Second prize in one-year-old mare class; 1st prize in two-year-old mare class; 2d prize in four-year-old mare class; 2d and 3d prizes in brood mares; champion prize for best foal in the show, (all the above six by Canute, and half sisters to Gay Lad, except second prize brood mare.) First prize extra stock (three-year-old stallion, a full brother in blood to Gay Lad, being by Canute and out of a mare by William the Conqueror, 2343.

A letter from you whenever convenient will be most interesting, as I shall always be pleased to know how you are getting on.

I remain, Yours respectfully, T. EWART, Manager Dunsmore Stud Farm.

P. S.—Pedigree certificate enclosed herewith. T. E.

The Journal says: Twenty horses belonging to Mr. James Keegan, of Augusta, Me., who is a present ill in Charlottetown, were shipped by the Princess on Monday morning for Maine.

Henry Noble, the owner of Aleryon, has signified his intention of backing either Aleryon or Nelson against Middleton's gelding Jack, for \$2,000 a side. It is believed that Middleton will accept the barrier, and the race may be trotted this week.

The Moncton Times says: Messrs. Jones and Delehunt, owners of the running horse Hopeful, have accepted the challenge of Mr. Benj. Charters, owner of May Queen. A part of the money, \$50 a side, was deposited last night with Mr. George McSweeney, and the race will take place on the Moncton Driving Park, Nov. 17th.

The Maritime Agriculturist says: Dr. John Berryman possesses Belle Robin, a celebrated Island mare, 14 years old, color, brown. Sired by Bush Messenger, dam, Flying Frenchman, record, 2.35. This mare has a colt three months old, by Administrator. The doctor also owns a six months' All Right pacer, which promises to be very fast.

The Queen of running ringers has been campaigning in the mountain towns this season, and racked off considerable money for her owners. Her name is Cayuse Molly, alias Grey Molly and Mormon Ann. She is 7 years old, and is credited with three-eighths of a mile in 1.31. At Glenwood Springs, Colorado, she beat Kitty Ward in a race and won \$7,000 by the performance.

The first of the get of the stallion Silver Cloud, 2 22j, to be trained, is a two-year-old colt that either trots or paces at the will of his driver. The youngster has shown a half on a pace in 1.15, and done the distance trotting in 1.19, which is a creditable performance. Silver Cloud is a son of Fisk's Mambrino Chief, and, as his record shows, able to hold his own in fast company.

The Moncton Transcript reports that conductor John Coffey has sold his matched team by All Right, 5817, to O. C. Cummings, of Truro, N. S. Mr. Coffey has a fine brood mare, 5 years old, weighing 1100 lbs., sired by Goldleaf; grand-sired by Rysdyck, 653, great-grand-sired by Hambletonian, 10, the sire of forty horses in the 2.30 or better class. She has proved herself a breeder and has now by her side a fine filly by Dearborn, 840, and is now safe in foal to Dearborn again. Dearborn is by Gen. Hancock, 1165, he by George Wilkes, 519, the sire of 65 or more horses in the 2.30 or better class.

Telegraphic Odds and Ends.

A BUDGET OF GENERAL NEWS FROM ALL PARTS OF THE WORLD.

NEW HAVEN, Conn., Oct. 22.—Typhoid symptoms among Yale students are causing increased uneasiness. Nothing to indicate an unusual amount of sickness is yet developed, nor is a serious outbreak threatened. To-day several men showed symptoms of typhoid, and several suffering from typhoid malaria were sent home to recuperate.

SAN FRANCISCO, Oct. 22.—Steamer Belgic arrived last night from Hong Kong and Yokohama. Japanese papers state that complete returns from one prefecture of Aichi show that 685 people were drowned and 121 injured during the floods of September 11, and that over one thousand houses were swept away and thousands of acres of crops were destroyed. In a review of the calamities caused by the floods during the year 1889, the Japan Mail says: "Returns show 12 prefectures have been devastated, 2,419 people killed, 155 wounded and over 90,000 deprived of the means of subsistence, more than 50,000 houses have been swept away or submerged, 150,000 acres of crops destroyed, about 6,000 bridges washed away and some hundreds of miles of road broken up."

BERLIN, Oct. 22.—German protectorate has been proclaimed over the east coast of Africa, from Vitu to Kismayu, with the consent of the native chiefs. The rights of foreigners are preserved.

BELOGRADE, Oct. 22.—Serbia has abolished a Servian consulship in Germany and entrusted all consular business to Russian consuls. A Servian consul has been appointed at Moscow.

MONTREAL, Oct. 22.—The Witness asserts that a line of smuggling schooners has been built for the St. Lawrence trade in wines, brandies of all brands, jewelry, books and tobacco. Smuggled goods are placed on the beach in the night and soon removed. Boats come up as far as Quebec and even to Montreal. The boats are provided with false bottoms, and a regular system is indulged in.

TO LET.—That Brick House on the corner of Prince and Dorchester Streets, containing nine rooms, will be rented with or without the Shop. Supplied with water. On build ups in connection. Apply to Miss Costello, on the premises. Oct 23 2w.

SOON TO BE OUT.

The Boston Monthly Magazine, A New Popular Magazine of the First Class.

THE BOSTON MONTHLY MAGAZINE is designed to meet a want in popular literature that has not yet been filled, viz., a periodical that will rank with the leading magazines of the day, and yet—without falling below their standard of literary merit, moral tone, or general excellence—reach the great mass of the people.

The proprietors of the new Magazine believe that this can be accomplished "by discarding subjects not of universal interest, and by carefully avoiding dry and tedious or too lengthy treatment of topics selected.

But, while intended to be of a character that will make it an enlightening companion and a welcome visitor in the homes of the lowly, it will appeal distinctly to the tastes of the educated, well-to-do, and cultured classes of the country.

The new Magazine will cover the general field of literature, presenting each month the brightest and best productions in Fiction, Poetry, Biography, Travel, Popular Science, Art, Politics, etc., and will treat in a breezy and vigorous, yet non-partisan, manner all timely topics of general interest to the American public.

It will consist of upwards of 100 pages—each issue, with descriptive illustrations, printed in large leader type, on the best quality paper, and bound in a cover of tasteful design.

The first issue will appear early in October, and will be for sale by all booksellers and at newsstands throughout the country.

THE BOSTON MONTHLY MAGAZINE offers unrivaled inducements to advertisers, as its rates are low, and a large circulation is guaranteed from the start. Orders should be placed at once, to take advantage of the special attention always given to the "First Number" of a new magazine.

Subscription price, \$3.00 a year, in advance. Single Numbers, 25 cents.

Boston Publishing Corporation, 48 Winter Street, Boston, Mass.
