Historical Society Member Discovers Early Strait Boat

One of the first forms of transportation between Prince Edward Island and the mainland has been uncovered by a member of the Prince Edward Island Historical Society.

The 20-foot wooden boat was found in a poor state of repair at Borden by F. A. S. Jones. Efforts will be made by Mr. Jones and Earle Taylor to find a second boat and have it preserved.

The first fall executive meeting of the society was held at Prince of Wales College with the president, Dr. Frank MacKinnon presiding. Others attending included Mr. Jones, Mrs. Gordon MacDonald, Judge H. L. Palmer, Frank Tinney, Lorne Callbeck and John Morris.

Items under discussion ranged from the survey to be carried out by the federal government of the Fort Amherst historic site at Rocky Point, to the necessity of obtaining the services of an archivist.

The main function of an archivist, it was explained, would be to collect historical items which originally were commonplace in year's past.

Committees to obtain past history, tape recordings from Island residents who remember Confederation and early settlements will be arranged during the winter months ahead.

The report of the historical display which was located in the YMCA in Charlottetown during the summer months was presented by Judge Palmer. He commended Mrs. W. J. Brehaut for her many hours of unselfish service to more than 1,600 visitors to the display.

Car Demolished By Trailer Truck

Malcolm MacSwain, Malpeque Road, is a patient in the Prince Edward Island Hospital following a highway accident in which his 1956 Dodge was demolished in a collision with a high trailer transport last night.

Mr. MacSwain had apparently pulled out onto the Trans-Canada Highway from a driveway in the Clyde River district when he was struck by a 13-ton loaded transport operated by Lloyd Diamond of Winsloe.

The transport went out of control and overturned crosswise in the ditch. The driver was not injured.

Mr. MacSwain, though not considered to be seriously injured, was taken to hospital for observation. His wrecked car was towed away by Falter Burhoe.

The transport's load was transferred to another Diamond Transport while members of the Royal Canadian Mounted Police investigated the accident and kept the highway clear of traffic.

National Accreditation Body Slated For June Discussion

The feasibility of establishing a national accrediting body designed to upgrade nursing education in Canada will be considered at the 30th biennial meeting of the Canadian Nurses Association next June. Participation in the scheme would be on a voluntary basis.

This plan was disclosed during a symposium on "Evaluation and Accreditation of Schools of Nursing" presented yesterday during the afternoon session of the annual meeting of the nurses association of Prince Edward Island.

of yesterday's meeting was the adoption of a revision in by-laws of the Association. One significant change was a new category of membership, that of honorary membership for non-nurses.

Honorary membership may now be conferred on any person whom the association of nurses of Prince Edward Island wishes to recognize for some outstanding contribution to nursing, or other public service.

A new by-law which has implications for the evaluation of Nursing Education Programmes provincially has to do with the establishing of a School of Nursing advisory committee.

Duties of this group will be to act in an advisory capacity to the School of Nursing Advisor; to make recommendations to the council regarding the standards for approval of schools of nursing.

An interesting disclosure which stemmed from the Public Relations Committee report was that
