

Counts of Common Species Observed During
the Mid-Winter Waterfowl Inventories

Year	Species				
	Black Duck	Goldeneye	Merganser	Oldsquaw	Canada Goose
1971	2250	2100	1020	1820	3
1972	4280	1930	2400	31	1
1973	2430	1380	1110	78	8
1974	2770	1420	890	5	3
1975	3080	1770	1500	141	210
1976	2820	1070	2490	200	-
1977	2360	780	2570	35	16
1978	5220	890	2770	8	110

The above information showing fluctuations in numbers of common waterfowl species wintering on Prince Edward Island over the past eight years was submitted by the census taker:

Randy Dibblee
Waterfowl and Furbearer Biologist
Prince Edward Island
Fish and Wildlife Division

Canadian Nature Federation

Membership benefits:

- A subscription to *Nature Canada* — our beautiful quarterly magazine.
- Discounts on books, records, binoculars, cards, etc., from the Nature Canada Bookshop, our large mail-order operation.
- An invitation to participate in and vote at our Annual Conference.
- An opportunity to nominate and elect our Board of Directors.
- A national voice on environmental issues.
- International representation through our membership in the International Union for the Conservation of Nature and Natural Resources.
- A unique opportunity to visit exotic areas of Canada and the world with Canadian Nature Tours.
