

THE DAILY EXAMINER.

MAY 30, 1894.

THE FEED PROBLEM.

Too many of our farmers have, in recent years, been sorely tried and troubled by reason of want of sufficient food for their cattle. It is impossible to farm well without a good, large stock. But it is necessary to have to go over the country in March and April searching for fodder and paying exorbitant prices for it.

The question, then, is how to obtain plenty of fodder to maintain in excellent condition the animals kept upon the farm. It is possible—some are able to do so—to grow plenty of hay. But clover is an uncertain crop, and timothy is exhaustive of the soil; while a good many farmers find it impossible to obtain a sufficient quantity to satisfy the wants of their cattle. Turnip and other roots, with straw and hay, help to keep the animals in good condition, and to keep the barns from becoming empty before the right time. All these things are good, and not to be hastily given up. But, in addition to all these things, something else is, year after year, needed. This is found in the silo lately introduced here upon the recommendation of Professor Robertson.

In respect to corn, which has been, in many cases, the only, and in all cases, the principal thing kept in a silo, it is objected that corn is a "risky crop" here. It has, at all events, been over and over again proved that corn will grow well here in a warm and dry season. That is the season in which hay and straw are always short, and in which additional fodder is most urgently needed. In a damp and cool season other things are abundant, and a failure of corn will not do much matter. Another point to be noted is that corn is easily cultivated in good land and yields a greater bulk of fodder to the acre than anything else that can be grown. We have the testimony of some of our best farmers to the fact that corn ensilage is capital food for cattle. Indeed, those who have had it will have brought their cattle through in fine form, while those who have had it not have been compelled to go buying fodder.

Professor Robertson recommends, as a result of his experiments at the Central Experimental Farm, a mixture of corn, horse beans and sudanese. According to his plan the horse beans are to be grown in the same field together with the corn, while the sudanese are grown apart and the seeds added when the silo is being filled. Horse beans have for years past been successfully grown here in small quantities by Mr. Joseph Stretch, of West River, and others. The horse bean attains in Canada a height of from 3 feet to 6 feet. It bears pods from within 6 to 8 inches from the base of the stalk. It is somewhat like the broad bean; and bean and haulm are alike relied by the cattle. We are informed that horse beans have been grown and used successfully on St. Dunstan's College farm that the authorities there have this year ordered five bushels of seed to be planted with corn and incorporated with the ensilage. Of sudanese seeds we need make no remark. Everyone knows that they grow here to perfection and that they are of an oily nature, calculated to make cattle feel good and look well.

The point to be made in this article is that just now (not much later) is the right time to plant both fodder corn and horse beans. We earnestly recommend all farmers, especially those interested in the cheese factories, to try the silo and the Robertson Mixture. But if a successful trial is to be made, no time ought to be lost in the planting. The seed may be obtained from our leading seedsmen, and a silo built in the course of the summer.

NOTES AND COMMENTS.

—And now they are making electricity by means of wind. —The Guardian says, "The Landlordism is the cause of the poverty." Why not say, "The poverty is the cause of the landlordism." This is just as true and sounds just as well. —Toronto News: There is at least one case in which the exports of Canada compare favorably with those of the United States, and this is in the trade of the two countries with Great Britain. While the Americans outnumber us by over thirteen to one, they only send seven times more produce to Great Britain than we do. In other words, our exports per capita are almost double theirs. In this case, at all events, commerce does appear to follow the flag. —The standard of the ocean liners is raised every year now and not even the experts venture to predict what state of perfection these greyhounds of the sea will finally reach. It is now stated that the North German Lloyd steamship company is to build four new steamships, to develop even greater speed than the Campania and Lucania. The new vessels will be about the size of the Teutonic and Majestic. The vessels have not been contracted for as yet, though it is likely that Harlan & Wolff, of Belfast, the constructors of the Teutonic and Majestic, will do the work. The keels of the new vessels will be laid this summer and the steamships completed next season. —Hard times in Australia are forcing its people to put forth additional efforts to make trade. Thousands of tons of Australian butter are now finding a ready market in Great Britain. An experimental shipment of Australian poultry to England gives promise of a trade being established, and a despatch from Melbourne of date May 15th, says that "the Government of Victoria have opened negotiations with a steamship company with the view of entering into a contract for the shipment of frozen meat to London. It is believed that a profitable trade can be established with Melbourne as the Australian terminal port." Even grapes are, it appears, to be shipped to dwellers in the north. It seems clear that in these antipodes, Canadian farmers will find some of the strongest of their competitors.

THE JUDICIAL APPOINTMENT.

The Sumner Journal says: "The appointment is an excellent one, Mr. Fitzgerald being one of the most prominent lawyers of this province, and a man of brilliant talents and wide reading, and we have no doubt he will fill the high position to which he has been called, with the grace and dignity becoming the office. He was for many years Stipendiary Magistrate of Charlottetown, and the excellent manner in which he discharged his duties of that position augurs well for his success in the higher court to which he has been called. Judge Fitzgerald has our warmest congratulations."

THE HERALD SAYS—

"No better appointment could have been made, and the government is to be congratulated upon its choice. Mr. Fitzgerald is eminently qualified for the dignified and responsible position to which he has been elevated. Upon his shoulders the purity of the ermine will not be endangered nor its spotlessness sullied. His judicial abilities are well known, his long years of service as Stipendiary Magistrate of this city serving to more firmly mould these qualities of mind and heart so essential to one called upon to administer justice between man and man. We heartily congratulate Mr. Justice Fitzgerald, and wish him long years of service on the Bench."

THE MOUNT ALLISON NOTES.

Lingly Hall was crowded on Tuesday night at the closing exercises of the Ladies College. M. A. degrees were conferred on the young ladies, among them being Miss Minnie Knight Morrow of Souris. Miss Morrow having the largest number of marks during the year was chosen Valedictorian of her class. Her diploma as graduate in music—violin department—the first such graduate in the Maritime Provinces. On Wednesday night Mr. Archibald was also given the degree of B. A. His masterly oration on "Voice" delivered by Mr. Archibald is a son of Mrs. A. N. Archibald, and formerly of this Island.

FOR ST. ANNE.

Arrangements for the Big Pilgrimage to St. Anne de Beaupre. A committee of whom Rev. G. Lefebvre, C. S. C., of St. Joseph's, Memramcook, is president, and Rev. H. A. Moahan, P. P., of Moncton, and Rev. A. D. Cormier, C. S. C., of St. Joseph's, are secretaries, are arranging for a grand pilgrimage to St. Anne de Beaupre, Quebec. The excursion train which will carry the pilgrims will leave Point du Lac and Sackville on Monday afternoon, June 25th, and special arrangements to bring parties from beyond these points have been made with the Cape Tormentine, Buctouche and Moncton, Carleton Place, Northern Railway, and the P. E. Island Steam Navigation Company. The train will stop at the points where tickets are specified between Moncton and Campbellton. The party is expected to reach Lewis about noon on Tuesday, June 26th, and after being ferried across to the Quebec side they will re-embark on the Quebec, Montmorency and Charlevoix Railway for St. Anne, a distance of twenty miles. On reaching their journey's end the pilgrims will march to the church in procession, singing a canticle to the patron saint, when the programme of services will be made known. Particularly worthy of a visit to St. Anne is the new chapel of the "Scala Santa," a reproduction of the hall in which our Lord was judged by Pilate. It contains a fine statue of "Scala Santa" or Holy Staircase at Rome, the thirty-two stairs of which devout pilgrims are wont to ascend on their knees. The singing during the pilgrimage will be conducted by Rev. S. Arsenault, C. S. C., of St. Joseph's, and Rev. D. Lezere, P. P., of Fox Creek. As the fare for the round trip is only five dollars, a great crowd is expected, but as St. Anne has hotel accommodations for 2,500 people, there will doubtless be room for all.

NEWS NOTES.

Erastus Wiman's trial for forgery has been postponed until June 11. Since October Australia has sent to Great Britain 11,754 tons of butter.

Cholera is raging in the districts of Plock, Radom and Piotrkoff, in Russian Poland, about 2000 deaths. Millions of locusts, said to be of the 14 or 17 year family, have appeared at Decatur, Ill.

News of political arrests in Russia comes from every direction. The police have not been so active in years.

The French Government has sued the Chicago World's Fair directors for \$400,000 for damage to the French exhibits by the fire in the manufacturers' building.

A much bigger wheel than the great Ferris wheel, which revolved in the Midway Plaisance and is to be set up in New York, is building at Earl's Court, London. It is a 400-foot wheel, and will carry 2000 people in fifty cars. Three restaurants will be built on platforms at varying heights on the supporting towers, and a big ballroom will crown the tower at the apex.

To a Philadelphia reporter who asked J. S. Cowley the other day if he intended to run for the Presidency, the commonwealth leader replied: "I've got something bigger to attend to now, the feeding of millions on millions of starving men. And then, in a little while he went into the elegant dining room of the Hotel Bellevue, and attended to the feeding of one of these millions, who bears the name of J. S. Cowley."

Is there not something lofty for both in Moltke's mention of his wife: "I do not doubt that she will greet me in another life, when these sufferings are ended, as she did at the station when I returned from the campaign in 1866, and I often long for this time. I must send you my last wishes for Christmas, although for us it will always be connected with a time of sorrow. I have now decided to hasten on the day when salvation was brought to mankind."

The ex-Empress Eugenie has been engaged on memoirs for many years. As soon as a page is written it is placed under lock and key, and not even the most intimate friends ever see it. The work is not to be published for twenty-five years after her death. The ex-Empress uses in writing a penholder which is ornamented with diamonds. It was used by the fourteen representatives in signing the treaty of peace in Paris in 1856, and was given to the ex-Empress as a memento.

GENERAL TELEGRAPHIC NEWS

Paris, May 28.—It was announced tonight that M. Dupuy's cabinet will be as follows: Premier and minister of foreign affairs, M. Dupuy; minister of marine, M. Felix Faure; minister of war, M. Mercier; minister of finance, M. Pericard; minister of justice, M. Guerin; minister of commerce, M. Barthin.

Boston, May 28.—H. M. S. Blake left the harbor at 4 o'clock this afternoon, followed by her consort, H. M. S. Tartar, the latter for St. John, N. B., and the Blake for Bar Harbor, the Blake joining the Tartar later at St. John.

London, May 28.—Right Hon. Henry Chapin, Secretary of the British Board of Agriculture, and certain Irish members, are renewing their pressure to induce the Board of Agriculture to prolong the examination of Canadian cattle in the hope that it may lead to a continuous embargo. English journals which are opposed to the Canadian case are quoting the articles from the Montreal Trade Bulletin as evidence that pleuro-pneumonia really does exist in Canada. They are also quoting the Canadian opinion that Canada's best interest lies in the expansion of the dead meat trade. In the Times to-day there appears a letter signed by Sir Charles Pupper on the pleuro-pneumonia subject, in which he states that he learned from the British Board of Agriculture that during the last year only two cases of the disease were reported in Scotland. He goes on to say that he believes that Canada's contention that pleuro-pneumonia does not exist in the country has been established, not only by the absence of the disease from Canada, but by the continuing decrease of the disease in the United Kingdom.

San Francisco, May 28.—Chinese advices say that 5000 junks were wrecked by a flood in the Han river. Over 500 bodies have already been recovered.

Quebec, Ont., May 28.—Rev. Nelson Burns, of the Methodist church, and editor of the Expositor of Holmes, has been fined by a magistrate for publishing for that purpose and found guilty of heresy. He has been suspended from the church. His case will again come before the Quebec conference in June.

Chicago, May 28.—A suit for one million dollars damages has been instituted by the French republic against the world's Columbian Exposition. The litigation grows out of the French government's claim for damages to exhibits of French subjects injured during the manufacturer's building fire.

Vancouver, May 28.—Oriental advices state that the threatened rebellion in Corea has broken out at Sing Jai To, when fully 5000 armed men suddenly mustered, and before the guards could recover from their surprise the governor's palace was in their possession. Forty officials were put to death, the more detested being disgustingly mutilated. The outbreak at this point was premature and gave the authorities the clue, and insurgents are being arrested and disarmed. It is feared that the rebels, if not suppressed, will overcome a force of 600 Chinese soldiers sent to meet them at Seoul.

New York, May 28.—Local Assembly 2,553 K. of L. clothing cutters, last night endorsed the resolutions offered by Master Workman Sotheran, of the Central Labor Federation, last Sunday, calling upon all labor organizations of this country to send their unattached unemployed members on the march to Washington and all state capitals, while the markets at this point went into a panic near the large cities to demand work from the municipal authorities.

Conk, May 28.—O'Donovan Rossa was warmly welcomed by the Mayor of Conk and others on his arrival here. He told the Mayor that, now that his term of banishment had expired, he had satisfied the cravings of his spirit by returning to Ireland on a private visit. Irish politics in his day, he said, seemed to be dead or sleeping. He was sorry to see so much discussion among the Nationalists, but he had no desire to interfere in their quarrels. In America those quarrels were deplored by Irishmen of both parties.

London, May 28.—Much surprise has been expressed over the fact that neither Hon. George E. Brown, nor Hon. J. H. Bowell were included as recipients of the birthday honors. In this connection it has been suggested that Hon. Mr. Foster's action in regard to the French soldiers' account his other claims to knighthood. Concerning honors for the Hon. Mr. Bowell, the Star's correspondent learns that they will more fittingly follow the inter-colonial conference which is to be opened at Ottawa on June 22.

Ustostov, Pa., May 28.—On Thursday morning the Stickle Hollow mines of the Washington Coal and Coke Company, midway between Fayette City and Layton station, were the scene of the bloodiest encounter since the strike began. Both sides were in fighting shape, 50 armed deputies contending with a mob of from 1,500 to 2,000 strikers, about 200 of whom were armed with all kinds of guns. Five strikers were killed and eight or more wounded, and three deputies were wounded. A great many strikers were arrested by the guards.

Galesburg, Ill., May 28.—When the Chicago, Burlington and Quincy fast mail train was four miles out of Kawana, Friday, the glass in the indicator can broke and three quarts of kerosene striking the hot boiler head were ignited and the next moment the whole interior of the cab was in flames. The clothes of the men, E. Martin, and Engineer V. B. Giddings, brought the train to a standstill. Martin being the train stopped, jumped from the door and with flames streaming from his clothes, rushed to the water tank and jumped in, extinguishing the flames. Giddings rolled around in the wet grass, Martin was horribly burned. Giddings clothes were burned off him.

World's Columbian Exposition. Will be of value to the world by illustrating the progress in the mechanical arts and the progress in the medical arts, has been of equal importance, and as a strengthening laxative that Syrup of Figs is far in advance of all others.

Malaria is one of the most insidious of health destroyers. Hood's Sarsaparilla counteracts its deadly poison and builds up the system. USE SKODA'S DISCOVERY, the great Blood and Nerve-Lender.

LIME. Having leased the Lime Kiln formerly owned by the late Owen Connolly, Esq., I am prepared to supply any quantity of FIRST-CLASS LIME, for building and farming purposes. All orders sent to Kilns will be supplied by Mr. Robert Gregory.

PARLIAMENT OF CANADA.

House of Commons Proceedings.

OTTAWA, May 30.

In the House yesterday Sir John Thompson introduced his bill to amend the Act respecting interest, which, he explained, related to British Columbia; also his bill respecting Dominion elections, which, he explained, provided for shortening the time between nomination and polling in certain constituencies.

The House then went into committee on the tariff, and spent all the afternoon putting the final touches on it. After recess the House went into supply and passed the estimates for the Department of Justice and Penitentiaries. Mr. Foster gave notice of the fast Atlantic subsidy resolution for next Thursday.

The Canadian Imperial Federation League met here today, and took steps to have the central body in London re-organized. All the officers were re-elected with the exception of the substitution of Lieut. Governor Howland, of P. E. Island, as Vice-President, for Lieutenant-Governor Carvell, deceased.

Moncton's Gas and Water Supply.

Moncton, May 30. At a meeting of the stockholders of the Gas and Water Company today, it was formally decided to refuse the city's offer of one hundred and eighty thousand dollars for water, gas and electric light, and to appoint a committee to name the company's arbitrator.

Britain's Representative.

LONDON, May 30. The Earl of Jersey has been appointed to represent the Imperial Government at the inter-colonial conference which opens on June 22nd at Ottawa.

CRIMES FOR MERCY UNREDEEMED.

Alleged Finnish Treatment and Murder of a Sailor. Hamilton Spree, first mate of the German barque Panselma, which recently arrived at London from San Francisco, was arraigned in Bow street police station on Saturday, charged with murdering a Norwegian sailor named Charles Petersen on the high sea.

It is alleged that Petersen was systematically tortured by Spree until he died. Witnesses testified that on March 14, in the South Atlantic, Petersen was hoisted by the waist to the mainmast and allowed to hang for four hours. He cried for mercy, but his cries were unheeded and his request for water answered with derisive laughter. Several of the crew attempted to assist Petersen, but were prevented by Spree, who threatened them with similar punishment.

When Petersen was finally released from torture Spree grabbed him and threw him down the hatchway. As Petersen struck the bottom Spree cried, "Are you dead now?" Receiving no reply, Spree went down the hatchway and discovered that Petersen really was dead. A few days prior to Petersen's death Spree struck him on the head with a bucket, causing blood to run from his nose and ears. Petersen was half-witted.
