**Girl's Faith In Dancer Theme Of Musical Film**  
**With Astaire And Rogers At Prince Edward**

How a girl's faith in the man she loves inspires him to achieve international fame as a dancer. The sparkling story which she enjoys with her, is dramatically revealed in "The Story of Vernon and Irene Castle," new film musical co-starring Fred Astaire and Ginger Rogers.

Based on the sensational career of the world-famous dance team of a quarter century ago, the sparkling film musical presents the Astaire-Rogers duo in the roles of their terrific predecessors.

The film traces the life of Vernon Castle from the time he was a slapsided comedian "singing" for Lew Fields in a Broadway show. A chance meeting with Irene rocks as a new Rochelle leads to a close friendship, ultimately to romance and marriage. Irene, a stage-struck girl with dancing ambitions, realizes Vernon is wasting his talents as a knockabout comic when he can dance so admirably. She prevails upon him to stick to dancing, and the couple spend the ensuing months rehearsing as a team.

Their initial disappointments in New York, their subsequent trip to Paris to fortunately win the interest of an elderly entrepreneur, and their sensational success in the exclusive cafes, are the first steps in their dancing career. How they skyrocket to fame and are the toast of two continents until the World War breaks out, are absorbing events leading to the powerful climax.

A dozen famous dances created by the Castles and more than a score of haunting song hits reminiscent of that nostalgic period, contribute largely to the charm and color of the captivating story.

"The Story of Vernon and Irene Castle" includes in its supporting cast Edna May Oliver, Walter Brennan, Lew Fields, Etienne Girardot, Janet Beecher and other accredited players.

"Personal Secretary" is particularly outstanding.

Prominent among the many entertaining features of "Personal Secretary," which opened last night at the Capitol Theatre, is the welcome appearance of Joy Hodges, last seen in "Merry-Go-Round of 1938." Miss Hodges, who returns to Hollywood after a long season with George M. Cohan in the Broadway success "I'd Rather Be Right," is a whole show in herself and her work in "Personal Secretary" is particularly outstanding.

In this new picture, Joy is seen as an enterprising newspaper columnist, engaged in a feud with a rival "key-hole" wizard, William Gargan. Both roles are handled with engaging honesty and the murder-mystery-comedy plot contains just the right amount of thrills to keep an audience balanced between guesses and laughs.

Universal has paid particular attention to the featured cast by including such well known favorites as Andy Devine, Ruth Donnelly and Florence Roberts.

Betty Laidlaw, Robert Lively and Charles Grayson are credited with the original screenplay which is a solid piece of dramatic writing. The action is swift and on the technical side, compliments should go to the Universal artists and photographers who filmed the newspaper sequences with so much skill.
