DR. AYERS Pathless Extraction of Teeth

OFFICE TO LET. Office in Morris' Block formerly occupied by Miss Chisholm as a studio. Apply to J. S. MORRIS. 163 tf.

PRIMITIVE ANCHORS.

STONES AND WOODEN TUBES FILLED WITH LEAD FIRST USED.

The Earliest Anchors Made on the Hook Principle Had Only One Fluke—Crude Devices That Are Still Used in Different Parts of the World.

There appear to be two ideas which have led up to the invention of the modern anchor: (1) the idea of attaching the vessel by means of a rope or chain to a weight sufficiently heavy to keep the vessel from moving when the weight has sunk to the bottom of the sea, and (2) the idea of using a hook instead of (or in addition to) the weight, so as to catch in the bottom.

The earliest anchors made on the hook principle probably only had one fluke instead of two. In the "Sussex Archæol. Coll." there is an illustration of what has been surmised to be an anchor made out of the natural forked branch of a tree. It was found with an ancient British canoe at Burgham, Sussex.

The invention of the anchor with two flukes is attributed by Pausanias to Midas, by Pliny to Eupalamos, and by Strabo to Anacharis. Diodorus Siculus states that the first anchors were wooden tubes filled with lead, while another classical writer says that before the introduction of metal anchors lumps of stone with a hole through the middle for the attachment of the cable were used.

The form of the anchors used by the Greeks and Romans is well known from representations on Trajan's column and in the catacombs at Rome as an early Christian symbol. This form does not seem to have changed materially for quite a thousand years, as is shown by the Bayeux tapestry.

Some very primitive kinds of anchors are in use at the present day in different parts of the world, and a study of their construction may throw some light on the evolution of the modern anchor.

An anchor which came from Japan consists of a natural forked branch of a tree, slightly improved artificially, so as to make a hook. Two round bars are fixed at right angles to the shank, and to these two ordinary beach pebbles are tied. The length of the anchor is 2 feet 3 inches, the width across the hook 8 inches, and across the transverse bars 1 foot 5 inches.

Another anchor was in use quite recently in the Arran islands, off the west coast of Galway. It is constructed of a sloping bar at each side and three cross-bars, forming a figure not unlike the isosceles triangle in Euclid's pons asinorum. The lowest of the three cross-bars is of square section and is fixed by iron spikes at each side to the sloping pieces so as to prevent them spreading outward.

These crossbars are of round section and project at each side, thus keeping the rope rings from slipping upward. The cable is fixed to the middle of the lowest transverse bar and is carried up on one side of the stone, then between the two sloping boards, and finally through a loop fixed to a hole at the top of the anchor.

The boards at each side are 1 foot 10 1/2 inches long and the stone 1 foot 5 inches long. It may seem strange that such primitive looking contrivances should continue to be used by fishermen who have a full knowledge of every modern appliance connected with navigation and vessels, yet there are good reasons why they should have survived.

Where the sea or river bed is rocky anchors are easily lost. This is a serious matter when the anchor is of iron and of some value, but if it is constructed like those described there is not much difficulty or expense in replacing it. A beach stone and a few bits of wood are always at hand, and the skilled workmanship required to fashion them into a very serviceable anchor is but small.

Thus it is that under certain conditions primitive appliances must always hold their own against modern inventions. When, as often happens, a newly introduced contrivance gets out of order, it generally involves much greater loss of time and more expense to replace it than if it were of simpler construction and capable of being made by an ordinary workman out of materials easily procurable on the spot.

Highly civilized man has much to learn from his prehistoric ancestors and from uncivilized races still existing as to how he should act in an emergency when deprived of his usual appliances.—Reliquary and Illustrated Archaeologist.

DR. CHASE'S PREPARATIONS Have Merit.

For Piles, Fevers, salt Rheum, Pin Worms and all skin diseases Dr. Chase's Ointment is a positive cure. It is recommended by Dr. C. M. Harian, of the American Journal of Health.

Dr. Chase's Catarrh Cure with blower included will cure insipid Catarrh in a few hours. Chronic Catarrh in one month's treatment.

A TERRIBLE HEADACHE

Accompanies Each of These Sweltering Hot Summer Days.

It is Caused by Imperfect Digestion, Which Makes the Nerves Weak and Shaky—Dodd's Dyspepsia Tablets the Cure.

These hot, sweltering days are blamed by many people for making their heads ache.

The accusation is unjust. The heat does not cause headache. This is how they are caused, in the great majority of cases.

The stomach is "out of order." The food is not properly digested; consequently, the nourishment supplied to the blood, muscles, tissues and nerves is thin, weak and impure.

Now, you cannot be healthy if you eat unwholesome food.

Neither can your nerves. They break down and you are laid up with a "splitting headache."

If, in the first place, the stomach had been in proper order, it would have digested the food perfectly.

Then the nerves would have been nourished on pure, cool, rich blood, and would have had strength and health to do their work.

The way to cure this splitting headache is to put the stomach in condition to digest the food properly.

There is one way to do this. There is one remedy that can be absolutely and confidently depended upon to do this.

That remedy is Dodd's Dyspepsia Tablets.

Dodd's Dyspepsia Tablets do more than this. They digest the food, while the stomach is being restored to health.

They cure headache by ensuring strength, force and vitality to the nerves. They do this by making digestion perfect, and feeding the nerves on pure, rich, cool blood.

Dodd's Dyspepsia Tablets are sold by all druggists, at fifty cents a box, six boxes \$2.50, or sent, on receipt of price, by The Dodd's Medicine Co., Limited, Toronto.

When I was first married," says the Rev. Dr. Lorimer, pastor of Tremont temple, Boston, "I had my strict ideas about Sunday observance. Mrs. Lorimer had a colored 'nauty' for cook, and on the first Saturday after she came I went into the kitchen and told her I did not want any Sunday work, so she could prepare all meals for that day beforehand. She didn't say one word while I was talking, then she looked up and, pointing to the door, exclaimed, 'Now, look hyar, Marse George, you jest go in dar and 'tend to your Christianity and leave me tend to my kitchen.' I went, and as near as I can remember she had hot dinners Sunday as long as she stayed with us."

APPALLING DEATH

From Kidney Disease Prevented by Dodd's Kidney Pills, Only.

"Kidney Disease." Do you know what it means? It means that the kidneys are either rotten, or rotting; the blood is full of poisonous, death-dealing corruption; that the Kidneys can't do their work; that the victim is a walking charnel-house; that his hours are numbered; that the victim MUST take Dodd's Kidney Pills if he does not want to die.

Have you Kidney Disease? Is your skin hot and dry; memory failing; breath short; urine, reddish, or pale colored; does it scald when passing; is your appetite changeable; do your ankles swell; have you bitter taste in the mouth on getting up mornings; is there a brick-dust deposit in your urine?

Any of these signs is proof positive of Kidney Disease. Will you be cured, or will you die? Dodd's Kidney Pills are the only means on earth that will cure you. They never fail.

Quite Likely. "I'll tell you the story in a nutshell," said Postdick. "Chestnut shell?" asked Keedick. Detroit Free Press.

YOU NEED Hood's Sarsaparilla if your blood is impure, your appetite gone, your health impaired. Nothing builds up health like HOOD'S.

Warships were originally distinguished from merchantmen by their greater size. Now this distinction does not obtain, and the war vessel is of a totally different construction.

Dr. Chase's Preparations Have Merit. For Piles, Fevers, salt Rheum, Pin Worms and all skin diseases Dr. Chase's Ointment is a positive cure.

Dr. Chase's Catarrh Cure with blower included will cure insipid Catarrh in a few hours. Chronic Catarrh in one month's treatment.

Dr. Chase's Kidney-Liver Pills are the only combined Kidney-Liver Pills made and will positively cure all Kidney-Liver troubles.

Sewerage Works

Tenders for Sewer Construction.

SEALED TENDERS, endorsed "Proposal for Sewer Construction," addressed to the undersigned, will be received at this office until noon on FRIDAY, THE 19th AUGUST, 1898, for furnishing material and performing the work necessary for the construction of certain portions of a sewerage system for the city of Charlottetown, according to conditions, specifications and plans to be seen (the plans and quantities after the 5th August) at this office and at the office of the Engineer, Mr. Freeman C. Coffin, 53 State Street, Boston Mass.

Proposals must be on the terms supplied from this office, and each tender must be accompanied by an accepted bank cheque for Six Hundred Dollars (\$600), payable to the order of the Commissioners of Sewers and Water Supply. This cheque will be forfeited if the party decline the contract or fail to complete the work contracted for and will be returned in case of non acceptance of tender.

The commissioners do not bind themselves to accept the lowest or any tender. DAVID DAIRD, Chairman.
