 NEW YORK (AP)—The stock market last week stretched its post-Cuban crisis rally through the sixth straight week but the upward progress was getting slower.
 The week's rise was the smallest of the six. The list was beginning to show the continuing cross-currents typical of December markets when long-term profit-taking, tax-loss selling, switching, and other trans-

Car Demand Gives Steel New Impetus
 CLEVELAND (AP) — Steady improvement in automotive demand has resulted in an increase in steel production, Steel magazine reported Sunday.
 The metal-working weekly said the steel output in the United States this week is expected to be slightly higher than the 1,500,000 ingot tons poured last week, when mill operations were running at 62 per cent of estimated annual capacity of 100,000,000 tons, compared with the previous week's 60.5 per cent.
 "Steelmakers who believed two months ago that 1963 ingot production wouldn't exceed 85,000,000 tons are raising their forecasts," the publication said.
 "They think there's a good chance next year's output will reach 100,000,000 tons, topping 1962's estimated 93,000,000."
 The forecasts have been re-

HOUSE BRIEFS
 OTTAWA (CP)—A question about whether the government contemplates revoking living allowances paid to RCMP officers and members of the armed forces in Newfoundland was termed "straight speculation" in the Commons.
 Heward Graftey, parliamentary assistant to Finance Minister Nowlan, gave that reply to James R. Aucker (L-Trinity-Conception).
 Senior officers of the RCMP were granted pay increases within the last month, the government said in a written reply to a Commons question.
 The increases were reported at: sub-inspector, \$380 annually; inspector, \$400; superintendent, \$520; chief superintendent, \$590; assistant a/c commissioner and commissioner, \$750 for each.
 Spruce budworm infestation in eastern Canada's forests is at its lowest level in 10 years and only an area of central New Brunswick will need spraying operations in 1963, the forestry department reported.
 The information was in a written reply tabled in the Commons for R. G. L. Fairweather (PC-Royal).
 Serious outbreaks of former years in Quebec and northern New Brunswick have tapered off and appear to be under control, the department said.
 It estimated 360,000 acres of central New Brunswick will need spraying next year.
