

Search Is Continued For 2 Jail-Breakers

RCMP were still searching last night for Wendell Larkin, 21 and Willard Louis Finnan, 19, who broke out of Summerside's jail Thursday night. A truck which the pair allegedly stole to make their get-away was found yesterday abandoned in the New London area. As the police pressed the hunt for the two fugitives, a war of breaks in widely separated points was reported. The method of entry at five different places bore a marked similarity.

At the Borden Legion Home, an abortive attempt to enter the building through the furnace room was followed by a more successful effort which was effected by removing bars from the outside of the canteen. About \$22 worth of merchandise consisting of cigarettes and ale are reported missing.

Hyatt Haslam, store owner at Fredericton reported to police that the glass in the front door of his shop had been broken and the inside lock released. Only ten dollars in change was believed to be taken.

At the service station of MacLeod and Stretch, Bonshaw, a window and a door were broken but so far as can be ascertained no money or goods were taken.

MacDougall's Service Station at the Queens Arms also reported a broken front door and window. In this case the thieves obtained only 80 cents in dimes.

The front door and window at Southport Esso service station were entered during the early hours of the morning. Evidence that short sections of a hose had been cut was disclosed when the proprietor, Stan Thompson, made an inspection of the premises this morning. Some damage was done to the garage equipment but neither merchandise or money were taken.

Victim Of Flaming Wreck Sept. 21 Dies In Hospital

ALBERTON BUREAU OF THE GUARDIAN

The death of William Harvey, aged 44, of Enmore occurred yesterday morning in O'Leary Community Hospital where he had been a patient for the past ten days following serious injuries received in a highway accident.

Harvey was one of two men saved from the burning wreck of a car which was in collision with a truck on the highway at Inverness on Sept. 21st.

A jury was empanelled and the inquest adjourned to await the report of an autopsy performed by the provincial pathologist in Charlottetown last night.

The truck, loaded with iced mackerel and lobsters was owned by Island Sea Foods of Borden and reportedly driven by Simon Sampson of River Bourgeois, N.S.

The vehicles burst into flames after the impact and considerable effort and courage was necessary by three rescuers, Albert Phillips and John Kilbride of In-

verness and Harris Rogers of Coleman, to free the two men from the burning car.

Harvey was rushed to the O'Leary Hospital, his companion, Vernon MacDougall, 15, and the truck driver were not injured.

The fire was later brought under control by the Alberton Fire Brigade. Both vehicles were a complete loss.

A jury was empanelled by coroner Dr. W.E. Callaghan of Summerside.

Members of the jury are: Harvey Henry Lewis, Harry Champion Leard, Benjamin Stanley Dumville, Randall Burton Boyles, Daniel Lawrence Saunders, Thomas Douglas Adams, and Lloyd George Matthews, foreman, all of O'Leary.

Previews Of Progress Amazes S'ide Viewers

SUMMERSIDE BUREAU OF THE GUARDIAN

Summerside High School students teachers, and some of the town's citizens watched the General Motors show "Previews of Progress" yesterday as they viewed numerous scientific demonstrations.

The 40-minute show was presented to a full auditorium by the two-man team of Warren Abbott and Ray Shermata. The show is narrated in now-technical language, and uses showmanship to make science come alive.

A highlight of the show, was the amazing G.M. sunmobile, an experiment which held the interest of young and old alike as they watched the miniature vehicle become mobile when a sun lamp was held above it.

The secret of the car's operation is a series of eight photoelectric cells located on its hood. These cells convert light energy into electrical energy which in turn powers a small electric motor to move the car.

The show also demonstrates a labor saving device for the housewife in which they prove it possible to fry eggs on a "cold stove".

In a few short minutes the egg is cooked, but to the wonderment of the spectators a napkin, placed between stove and frying pan is not even scorched.

Other experiments performed by the General Motors team included the fuel cell, a device that converts chemical energy of distilled plants into electrical energy; the running of a miniature gas turbine engine with a non-miniature roar. This type of energy may power automobiles of tomorrow.

Other previews include a vivid demonstration of the gyroscopes which will guide space ships of the future to their destination; and a dramatization of the microwave radar which sends television programs and long distance telephone calls across the country.

"Previews of Progress," having visited Tignish, Souris, Montague, Charlottetown, and other Island centres earlier this week, has already been presented to thousands of persons throughout Canada.

DR. W. W. BLACK, Saint John, N.B., newly elected president of the Maritime Psychiatric Association, is shown (left)

Maritime Psychiatrists To Discuss Remotivation

Dr. W.W. Black of Saint John, N.B., was elected president of the Maritime Psychiatric Association during the business session of the fifth annual meeting of the association held at the Charlottetown Hotel yesterday. He succeeds Dr. M.N. Beck of Charlottetown.

Other officers elected were Dr. R.G. Forsythe, Saint John,

with Dr. R.O. Jones, professor of psychiatry at Dalhousie University, Halifax; Dr. J.C. Theriault, Charlottetown, secretary-treasurer of the MPA and Dr. L.

K. Zielinski of Kensington. Dr. Zielinski is president of the P.E.I. Chapter of the College of

General Practitioners of Canada. This picture was taken immediately prior to last night's annual banquet at which Dr. Jones was the guest speaker.

The meetings resume today at the hotel, featured speaker being Dr. Claire Gailbraith of Whitby, Ont. and Walter Pullinger of Philadelphia. They will discuss "Remotivation", a new technique used in mental hospitals.

At noon, the provincial government will be hosts to the members of the MPA at a luncheon will be an address by Prince Edward Island's Minister of Health, Dr. Hubert MacNeill. The Medical Superintendent of the Hospital, Dr. A.J. Murchison, will preside.

The 6th annual meeting of the Maritime Psychiatric Association will be held at Saint John, N.B. next year.

honorary secretary; and Dr. J. F. Nicholson of Halifax, vice president. Dr. F.A. Dunsworth, also of Halifax, was elected to the new position of executive secretary-treasurer.

In the evening a joint P.E.I. Medical and Maritime Psychiatric banquet was held at the Charlottetown Hotel. Dr. R.O. Jones, professor of psychiatry at

Dalhousie University painted a graphic picture of Europe as he saw it on his recent trip there while attending the combined meetings of the British and Canadian medical association.

Dr. Jones illustrated his remarks with slides during the banquet. An informal dance followed at the Belvedere Golf Club.

Under arrangements made as a result of his talks with Mr. Mitchell Islanders will now be able to start raising their potatoes upwards of two weeks in advance of the arrival in Halifax of the ship carrying them to their final destination.

This will mean that on large orders a big supply will already

be on hand for loading on arrival of the ship and the balance of the shipment en route from here by rail to maintain a steady supply for loading.

Another result will be that carloads of potatoes no longer will have to remain on rail sidings in freezing weather waiting arrival of a boat. A welcome by-product of the plan will be a cutting down in the number of freight cars lying idle on tracks and thus make available a greater number of them to shippers.

Other benefits

Mr. Rossier also felt that considerable ultimate benefit would result from the meeting in Halifax this week of trade and industry officials from all across Canada.

He expressed the belief that the exchange of ideas during this week's meetings, particularly with references to packaging of potatoes, small fruits and vegetables, would prove valuable in increasing sales of Island products.

The minister stated one of the points emphasized in Halifax at

the latter gathering was the necessity for realizing that trade is a two-way proposition and that in order to sell to other countries and areas we must be willing to buy from them.

Also attending the Halifax meetings were Walter Wilson, Canada Packers; E.D. Reid and P.A. Murnaghan, deputy minister, who remained in Halifax for further meetings of industries officials.

The regular meeting of Tanton L.O.L. N. 1126 held on Monday, Sept. 28, at Brookfield was attended by several visiting

brothers including the following: R.W. Grand Master, Gordon Ross, J.D.G.M. Davis Ward, Grand Chaplain J.T. Campbell, Past Grand Master Rev. B. Piercey, County Master James Ferguson, Past County Master James Coles and Deputy County Master Surgeon Moore who is also representative for the Orange Insurance.

After the routine business was carried out several stirring speeches were heard from those present. Grand Master Ross gave a splendid report of the proceedings of the Most Worshipful Grand Lodge meeting held in Edmonton in June and of his district visitations. He noted that attendance is increasing as the visitations progress which shows the enthusiasm and interest being taken by members of the Orange Order. He plans to make another visit in this district at Hackett Lodge in Hunter River on Tuesday, Oct. 13th.

Spurgeon Moore gave a short talk on Orange Insurance advising the members of the many benefits available to the members of the Orange Order and their families.

Among those present was Andrew Dollar who is a faithful member of Tanton Lodge for over 50 years and an honorary member of the Right Worshipful Grand Lodge of Prince Edward Island.

After the meeting closed and singing of the Queen a delicious lunch was served by the members of Tanton Lodge.

Mileage completed of all types of road work this year is expected to exceed all previous years by a wide margin.

Meanwhile, the rumors of changes in personnel that have been rife since the new government took office, now appear to centre particularly on the highway department, because of its close relationship to every community in the province.

Today the impression grew that new road supervisors are to be named shortly for each of the province's 15 districts—five in each of the three counties. Changes are expected to coincide with the allot program being pressed by the department.

ISLAND Potato Shippers Assured BRIEFS Of Halifax Co-Operation

A big boost to Island potato shippers as well as a substantial saving in costs is expected by Hon. Leo Rossier, minister of industry and natural resources and of fisheries, as a result of talks he held in Halifax this week with port manager J.R. Mitchell.

Mr. Rossier stated yesterday that Island potato shippers will now be able to ship potatoes well in advance of the date on which ship loading in Halifax is to begin and stockpile them in Halifax in readiness.

Formerly, the minister said, high demurrage charges and high heating costs in the port city acted as a deterrent to early shipping from here for transshipment at Halifax to southern United States and other destinations.

Under arrangements made as a result of his talks with Mr. Mitchell Islanders will now be able to start raising their potatoes upwards of two weeks in advance of the arrival in Halifax of the ship carrying them to their final destination.

This will mean that on large orders a big supply will already

be on hand for loading on arrival of the ship and the balance of the shipment en route from here by rail to maintain a steady supply for loading.

Another result will be that carloads of potatoes no longer will have to remain on rail sidings in freezing weather waiting arrival of a boat. A welcome by-product of the plan will be a cutting down in the number of freight cars lying idle on tracks and thus make available a greater number of them to shippers.

Other benefits

Mr. Rossier also felt that considerable ultimate benefit would result from the meeting in Halifax this week of trade and industry officials from all across Canada.

He expressed the belief that the exchange of ideas during this week's meetings, particularly with references to packaging of potatoes, small fruits and vegetables, would prove valuable in increasing sales of Island products.

The minister stated one of the points emphasized in Halifax at

Road Paving Program To Continue This Fall

Every asphalt plant in the province will be driven to capacity to maintain and increase the road paving program on the Island this year, Hon. J. Philip Matheson, minister of public works and highways, said Thursday.

He stated the work of actual paving would continue to the end of October at least, or as long as good paving weather prevails. This also is true of all sub-grading work underway.

At the same time the department is driving hard to protect roads which have been graded this year. Mr. Matheson said every effort is being made to have them sandstoned and gravelled to make certain they have a covering before winter sets in.

The minister stated tenders would be called this week for all such standstopping and graveling. Paving is going on right now, he added, in the Chelton, New London, French River, Darnley Dingwell's Mills, Elmira and Wellington areas and work previously started is continuing.

Several other road projects scheduled to be undertaken will be done this year as well, the highways minister said, and work will only be limited by the capacity of the paving plants which are working at top speed now.

Mileage completed of all types of road work this year is expected to exceed all previous years by a wide margin.

Meanwhile, the rumors of changes in personnel that have been rife since the new government took office, now appear to centre particularly on the highway department, because of its close relationship to every community in the province.

Today the impression grew that new road supervisors are to be named shortly for each of the province's 15 districts—five in each of the three counties. Changes are expected to coincide with the allot program being pressed by the department.

Collection amounted to \$2.50. Lunch committee appointed for next meeting are: Helen Murphy, Jean Mayhew, Lois Brown, Winnie MacLean. The dance committees were appointed for the month.

IN HOSPITAL

Mrs. Lawrence Stuart, Whim Road, is ill in the Kings County Memorial Hospital.

RETURNS TO DUTIES

AC Bob Trawhill has returned to RCAF Station Summerside after an absence of several weeks on duties at Greenwood N.S.

TO NFLD.

Mr. and Mrs. John H. MacKenzie, Montague, left yesterday for Stephenville Crossing, Nfld., where they will visit Mr. and Mrs. Dolphie White former residents of Montague.

MESSAGE FROM QUEEN

Clayton Morrison, postmaster at Hampton has received from Her Majesty, Queen Elizabeth, a personal letter, acknowledging with thanks receipt of copies of the Star Weekly and the Evening Patriot Magazines, showing pictures of Her Majesty and Prince Philip taken during their recent tour of Canada.

MACMILLAN FUNERAL

The funeral for Mrs. Edmond MacMillan was held Friday, Oct. 2, with a short service at the MacLean Funeral Home conducted by Rev. G.D.A. Elliott, then to West Covehead United Church where the service was conducted by Rev. Dr. A.S. Weir, with Rev. G.D.A. Elliott giving the eulogy. Rev. Dr. T.A. Wilson assisted in the service. A solo, "Beautiful Garden of Prayer" was sung by Miss Helen Wilson. Pallbearers were Vernon Duck, Earl Ling, Arthur Vessey, James Alan, Lorne MacMillan and Dawson Hughes. Interment was in the West Covehead cemetery.

A. A. Nicholson, director of the Prince Edward Island Travel Bureau, leaves today to attend the annual Canadian Tourist Association convention at Edmonton, Alta. During the week-long meetings, delegates will hear addresses from the Hon. William Hamilton, postmaster general and the Hon. H. E. Manning, premier of the province of Alberta. Prince Edward Island is a member of the association and Mr. Nicholson a director. The convention will be held at the MacDonald Hotel.

Island Native Dies In West

A native of Wheatley River, P.E.I., William A. MacDonald has passed away in Seattle, Wash. The news was received in Monton by his brother Major D.A. MacDonald.

Mr. MacDonald, a civil engineer, was president of the Ashwell Twist Corporation, ventilating, plumbing and heating contractors of that city. He was also president of the American Construction Association and a member of the board of directors of the National Association of Master Plumbers of America.

He was a graduate of Prince of Wales College and also of the University of Manitoba's Technical College.

Mr. MacDonald served with the Second Battalion of the Canadian Expeditionary Force in the First World War and was wounded while serving in France. He rose to the rank of captain. After demobilization he moved to the west coast where he became prominent in the construction business in Washington State.

He was a Presbyterian in religion and was also active in the Masonic Order.

He is survived by his wife, the former Miss Oda Ellen Chalcraft of Seattle; his brother in Monton, and three sisters, Mrs. John A. MacCallum of Brackley Beach; Mrs. John R. Nicholson, Hunter River, and Mrs. W.D. Crosby, Lexington, Mass. The funeral took place in Seattle.

Tignish Native Returns To Texas

SUMMERSIDE—William D. Sumner of Tignish, after spending the last two days visiting friends in Summerside returned to his winter home in San Antonio, Texas today.

Mr. Sumner, who is a lawyer and geologist by profession was for a number of years active in this work, first in Oklahoma and later in Texas following oil developments in each state.

He retired from a successful general practice a few years ago and since then has divided his time equally by spending the summer months at Tignish where he was born and the other six months in the Lone Star State where he still maintains a limited law practise with headquarters at San Antonio.
