

THOMAS V. GRANT

ELMER HAMMILL

KIMBLE JAY

JEAN-GUY LEMAY

The rich warm day of August 1, 1935, ushered into the world Thomas Vincent Grant, Science. The scene of this event was Misouche, a village where he lived for less than a year. In 1936 he moved eastward to Summerside which is now his home. Tom's former education began at St. Mary's Convent and then at Summerside High School. In 1951 he continued his journey eastward to take Grade XI at St. Dunstan's where he now merits his Bachelor of Science degree.

During his sojourn here, Tom showed his capabilities by participating in a number of College Societies. He held executive positions in C.C.S.M.C. and C.P.C.C.S., and was also active in the Dramatic and Debating Societies. Tom also served as Chronicle Editor for Red and White. Since early High School he revealed a flair for dramatics and a rhetoric. His willingness, perseverance and logic in arguing, plus a little "gift of the gab," were rewarded in 1957 when he received his Debating "D" Tom, not neglecting athletics, was also an avid supporter of and participant in every campus sport.

The crystal ball shows a son successfully following in his fathers footsteps. We know he will succeed as a doctor and we think that with his powers of oratory and friendly persuasion he could also be a success in politics.

Barter's Film Lab.

Born amid the joys of farm life at Lower Freetown, P.E.I., Elmer Francis Hammill, Arts, first saw the light of day on July 12, 1934. Fortunate enough to be brought up in a rural environment, he was soon taught the necessity of hard work and the art of accepting responsibilities of whatever importance they may be. His first school days were spent at his home school where he received his primary education before entering Grade XI at St. Dunstan's in September 1949. On the completion of Grade XII, he was employed for two years with the Summerside branch of Bank of Nova Scotia, before returning to St. Dunstan's as a Freshman in the Fall of 1953.

Gifted with a charitable disposition and keen sense of responsibility, Elmer has proven himself to be a good student, a diligent worker, and above all, a Christian gentleman. In the field of athletics he has represented his class in all intramural sports. For the past three years he has been a prominent member of the executive of the A.A.A., being basketball manager for two years and President of that society this year.

Elmer looks forward to a career in banking, and as we survey his past endeavors, there is certainty that success will be his.

Barter's Film Lab.

Kimble was born on August 12, 1935, to Mr. and the late Mrs. Frank Jay of Mount Stewart, P.E.I. At an early age Kimble entered Mt. Stewart grade school, and after successfully passing all ten grades, he enrolled at St. Dunstan's High School in the Fall of 1952. He completed two years of high school in one, and consequently was among the Class of Freshmen in the Fall of 1953, enrolling in the Science faculty.

Not only in scholastic achievement did Kimble hold a high place, but he also attained great heights in the Athletic field of endeavor during the time that he spent at S.D.U. He participated in all the intramural sports such as hockey, softball, handball, etc., and was a ranking player on the first and second football teams, which fact resulted in his being awarded an Athletic "D" for football.

This, then, has been the life of a fine student and gentleman, and when next year he goes to one of Canada's major universities to take up the study of geology, it is success.

Barter's Film Lab.

Jean Guy LeMay, Science, was born in Montreal on January 8, 1935. After having completed his primary education in Shawinigan Falls, he entered "le Seminaire de Trois Rivieres." He then enrolled at St. Dunstan's in September 1954, and leaves this year with his science degree along with an engineering certificate.

Jean-Guy has been a very valuable member of our intercollegiate hockey team, and also of the newly formed football squad. He intends to enter Nova Scotia Tech next year to continue his engineering studies, and his completion of his studies there will add a third degree behind his name, as he had already merited his Arts degree.

The achievements that Jean-Guy already has to his credit, and those which the future, is certain to bring, will surely make him a prominent figure and a leader of men wherever he goes.

Tourist Head Predicts Best Season This Year

Based on the figures we have and provided the weather is good this summer, it would appear that we are headed for our best tourist season" George V. Fraser, Director of the Prince Edward Island Travel Bureau, said yesterday in releasing statistics of the number of inquiries received to date from prospective summer visitors.

Prince Edward Island is now involved in three different tourist promotional schemes, Mr. Fraser stated, the three being the Maritime co-operative program, the new Canadian Government Travel Bureau Area Program, and the Island's individual effort.

Light reflection, ceilings should have a dull surface that reflects light evenly. For walls and ceilings in bathroom and kitchens semi-gloss finishes are more practical.

The most used interior finish for walls is plaster. Flat oil paint emulsion, rubber-base and casein paints are suggestions for use in rooms other than the kitchen and bathroom. Wallpaper may be coated with the same paints as plaster. For woodwork, which should only be tackled when the wall is dry the trend is to paint it the same shade as the wall color. Using a semi-gloss instead of a flat paint you'll find your woodwork will be easier to clean. Finish the job by using a one inch brush for the window sash and a 2-3" one for the balance of the trim.

Mother Nature will soon be doing her redecorating. Keep in step with her and do yours too.

CLUB NEWS

Alexandra and Districts Holstein and Beef 4-H Calf Club met at Alexandra School on April 9th. The meeting opened with the club pledge repeated in unison. Ten members, two visitors, the club leader and the directors were present. Several good suggestions were made as roll call was answered by a project you would like your club to undertake.

The minutes from the March meeting were read, approved and signed. The treasurer gave her report and also reported on the crokinole party of March 22nd which cleared \$288 after a bill for \$1.67 was paid.

It was moved by Donald Judson and seconded by Irwin Judson that another crokinole party be held in April, if suitable on April 25th.

Committees were appointed — the boys in Alexandra to arrange for the school, crokinole boards, etc. and the girls in Pownal to make tickets. All members are to assist with the lunch.

Correspondence was read and a letter regarding calves for sale was passed around. Two more memberships were paid making a total of eleven paid up members to date. Heather Jones, Phyllis Jones and Osborne Wood reported having obtained calves since last meeting.

Members took a vote on a project they would like to start and tree planting received the vote for our springtime project. Collection amounted to 67 cents. The next meeting is to be held on May 11th at Alexandra School at 7:30 p.m. Roll call to be answered by the name of your calf. Maurice MacCabe and Donnie Judson were appointed on the lunch committee. Some time was spent in discussing the lesson for the evening and the lesson for May was assigned. A short interesting, impromptu debate was next on the programme.

Directors, Mrs. Cyril Jones and Mr. Ernest MacCabe acted as judges. At the May meeting each member is to be given a topic (Continued on Page 17)

OVER 70,000 INQUIRIES

Added together, the total number of inquiries received from the three plans totals over 70,000, 200 of which are in response to the Dominion Government program, and 7,120 from the Maritime co-operative plan. Although both feature the entire Maritime area as a unit, Mr. Fraser said "we would estimate our share of inquiries as a result of them to be in proportion to the other provinces." In this basis, some 20,000 potential tourists have acquired an interest in visiting the Island this summer through these plans. The Island's individual advertising resulted in 9,719 inquiries, for a grand total to date of some 30,000 visitors definitely interested in paying a visit to the Garden of the Gulf.

REACHING MORE PEOPLE

"We are reaching more people now than ever before, largely through the Government Travel Bureau and the Maritime co-operative plan," Mr. Fraser said, noting that about 75 per cent of all advertising is conducted through the medium of newspapers. Most of the well-known magazines are now being utilized, and so the Island is placed before much of the North American reading public.

Advertisements are also placed in newspapers in New York City, Washington, D.C. Windsor, Ontario, and a number of other large

centres stretching as far East as Chicago, Illinois.

CO-OPERATIVE VENTURES

The Maritime co-operative program is a joint effort of Nova Scotia, New Brunswick, and P.E.I. having as its slogan a "Triple Trip" throughout the seaside provinces. Inquiries go to Fredericton N.B.

The Canadian Government Travel Bureau plan marks a new departure in publicity for the Canadian tourist industry, with emphasis being placed on the various areas of the Dominion, rather than the country as a whole. The Maritimes, featured at "Canada's Atlantic Provinces," have been allocated \$300,000 for promotional purposes during the current season. As shown above, the response far exceeds the total of the other two plans. All communications received under this program are handled in Ottawa. Launched but two months ago, it will be in operation for another month for this year.

Response to the Island's individual advertising is approximately the same as last year, with the added interest being aroused through the co-operative programs. Answers to individual promotional letters have reached a peak of 439 letters on one day, April 3rd, with several more weeks remaining before the Province can expect the actual beginning of the tourist season.

AGRICULTURAL NEWS

P. E. I. Department of Agriculture

ARTIFICIAL INSEMINATION

This is the time of year when the various Clubs are holding their annual meetings. The Hillsboro and District Club held their meeting last Wednesday night in the Southport School auditorium. The remainder of the Clubs will be holding their meetings within the next couple of weeks.

The following are the dates and places of some of the Artificial Breeding Club annual meetings: "The Eastern Prince, Wednesday, May 1st in the Canadian Legion Hall, Summerside, York and District, Thursday, May 2nd in Room 66 at Prince of Wales College, Cornwall and District, Wednesday, May 8th in the Cornwall Community Hall, Kensington and District, Thursday, May 9th in the King George Hall, Kensington, O'Leary and District, Friday, May 10th in the O'Leary Community Hall.

WARBLE FLY CONTROL
The livestock breeder can cut losses and increase production by treating for warbles. It is not too late to get the powder to kill the grubs. Two treatments are required at about two weeks apart. Ten cents can be treated with one pound of powder. Treat for warbles and save money.

BROODING CHICKS

A good brooder house will have

the following points: (a) Minimum of 8' by 10' with standing room height (b) An insulated building (c) Free from drafts (d) Double boarded floor with paper between (e) at least three front windows for light and ventilation.

The brooder house should be thoroughly cleaned and disinfected with lye and hot water before the chicks arrive. The brooder stove should be in operation for a couple of days prior to the chicks arrival to insure an even temperature and for the removal of dampness. The floor can be covered with clover chaff, dry shavings, sand or paper.

The temperature of the brooder house 2 inches off the floor at the outer edge of the canopy should be 90-95 degrees for the first week. A 5 degree drop in temperature each week is recommended until a temperature of 80 degrees is reached. After 80 degrees F has been reached the temperature is generally lowered gradually according to the outside temperature. A floor space under the hover of 3-10 sq. ins. for leghorn chicks and 10-12 sq. in. for larger breeds is required so a hover 56 inches

BACKGROUND COLORS

Do you wish you could transform one or more rooms of your house for Spring? Well, you can, and you don't have to go to the expense of replacing furniture and fabrics either. Do it by changing the background color of the room. With the new improved paints, redecorating is easy, inexpensive and can be done in a very short time.

Before repainting make sure all cracks are carefully filled and smoothed level with the surface. Patching plaster is used to fill large cracks while small hairline cracks can be filled with spackling material. When patches are thoroughly dry gently rub them with fine sand-paper until they're even with the surface.

To make your painting job easier remove the hardware from doors and windows and loosen lighting fixtures. Dust walls thoroughly with a dry mop. If you rub protective cream on hands and arms you'll have no trouble getting the paint off yourself when you're finished. And to prevent paint from settling on the floor, the furniture or in your head, cover them.

Because of the importance of

SAVE THE SEEDLINGS

Plants started in flats may be coming along nicely, then suddenly keel over and die. The condition is known as "damping-off" and a fungus is responsible. For prevention, treating your seed with a garden fungicide like Othoride or Arosan is a suggestion. These materials are available at most seed stores and should be used according to instructions on the label.

Another way of controlling this fungus is to sterilize the soil. This can be done by using the fungicide as a treatment following the directions on the contain-
