EVERY BULLET ITS OWN DOCTOR

In spite of the terrible increase in the destructiveness of modern warfare the tendency of the times is to make a conflict as humane as practicable. For this reason the use of copper covered bullets has been frowned upon, and a Philadelphia physician has a plan that he claims will wonderfully mitigate the suffering of a man whose body has been perforated by the modern small caliber bullet. It is well established that the velocity and penetrating force of these bullets are so great that unless they chance to strike a bone they will pass entirely through a man's body without his knowing it. The physician's idea is to attach a small wad of aniseptic cotton to the rear of the bullet. This would be covered by the shell of the cartridge and could not interfere with loading or firing. As the bullet passes through a person the wad will antisepticize the wound and prevent consequent suppuration. It may be possible to so nicely adjust the adhesion of the wad to the bullet that as the missile passes out it will leave the wad to plug the hole and stop bleeding. Ultimately this system might do away with the necessity of a large medical corps, as each bullet would carry medical treatment for the unfortunate it wounded.—Philadelphia Record.

Truth and Fiction.

"Strawwelpeter," one of the pictures, represents a little maiden, supine in bed, very ill—and no wonder—with an immense cherry tree growing out of her mouth. This was the sad result of swallowing the stones along with the fruit, in spite of all warnings. But we all know that truth is stranger than fiction, and the Petersburgskaya Gazeta of June 26 and July 8, 1897, quotes the following exemplification of this saying from the foreign papers:

"A little girl 7 years of age, Amelia L., whose father worked at the sawmills in Belgard (Ain), was at play the other day, when she managed to push the seed of a plane tree deep into her ear. Shortly after she began to experience acute pains, and it was found that the seed had taken root in the waxy secretions of the ear and was growing apace. The father proceeded to cautiously uproot the intrusive plant, and the girl has now recovered."

If this story is true, it is to be hoped that Miss Amelia L., now that her ear is once more free and in working order, will incline it to hearken to the exhortations of her elders and will not go on planting plane trees in such obviously uncongenial soil.—Notes and Queries.

Position In Society.

To all those who spend their time wondering how other people live we would suggest that an examination of the plaintiff's petition in the case of Schneider versus Hosier, 21 Ohio St. 98, might throw some light on the subject. It was a suit under a civil damage act, and the plaintiff alleged in her petition that she "was the wife of one Zimri Hosier, on whose good conduct, frugality and personal labor she was dependent for the support of herself and their seven minor children, for the proper culture and moral training of the latter, and, to a good extent, for her own position in society." The said Zimri Hosier, when not intoxicated or laboring under the effects of intoxication, was an industrious laboring man and regularly earned and received for his labor \$1.50 a day." There's management for you. Seven children and a wife supported, the children properly cultured and morally trained and the wife's position in society maintained—all on \$1.50 a day. Perhaps there may have been extenuating circumstances in the intoxication of Zimri.—Law Notes.

A Bag Full of Breath.

The "pneumatophor," an Austrian invention for enabling miners, firemen, etc., to breathe when surrounded by after camp, smoke or noxious fumes of any kind, consists of an airtight rubber bag containing a steel bottle of pure oxygen at a pressure of 100 liters and a metal protected glass bottle containing a 25 per cent solution of caustic soda. The oxygen can be admitted by a brass screw into the bag and drawn into the mouth through a rubber tube, the nozzle being closed by a clip. The turn of another hand screw breaks the glass bottle, allowing the caustic soda to flow out and be absorbed by a knitted network in the bag to absorb the carbonic acid exhaled, allowing the oxygen to be breathed, the apparatus being capable of furnishing oxygen enough to last from 30 to 90 minutes, as has been ascertained by numerous experiments.

DYING BY INCHES!

But Dodd's Kidney Pills will Yet Renew Life.

Thousands of persons die in the prime of life because doctors think Bright's Disease and Diabetes incurable. But Dodd's Kidney Pills cure them both. They have cured thousands of cases.

These diseases and other Kidney complaints are as common as ordinary colds. But people don't realize that they are afflicted till the disease has eaten deep into the system. Even then, Dodd's Kidney Pills will positively cure.

Thousands of people are dying on their feet, but do not realize it. They notice one or more of these symptoms: shortness of breath, loss of memory, failing sight, ravenous appetite, pale or reddish urine, with brick-colored deposit, scalding when urinating, constipation, nervousness, pains in the loins. Their only hope is Dodd's Kidney Pills. They won't fail. They never do.

Nothing Was Lent.

"Are you the society editor?" asked the large woman, who seemed to fill the room.

"No, madam," said the one addressed. "I am only the court reporter."

"Really? I am surprised. But perhaps you will do. Your paper said in its account of the affair at my house that floral decorations 'lent beauty to the scene.' I wish you would have your paper state that the floral beauty was not lent. Everything was paid for."—Indianapolis Journal.

Artificial Teeth.

When the natural teeth have been lost, the comfort, the health, the speech, and the personal appearance will be greatly enhanced by the substitution of Artificial Teeth skillfully made. Good health, good appearance and comfort depend upon the dentist's skill in making an Artificial set knowingly and perfectly fitted. Artificial teeth can be made to present a very natural appearance an occasional dark tooth, an irregular arrangement, or a tawny fillings will break the porcelain monotony so often noticeable. The sunken condition of a persons cheeks and lips due to the loss of the natural teeth, is changed completely by the insertion of properly made Artificial teeth. We make Artificial teeth that will fill out hollow cheeks and add youth and tone to the countenance. If you are troubled with bad fitting Artificial teeth that do not stay in their place as they should, we can, by use of a new method, make your old set over at a small expense and give you a perfect fit. We guarantee our work to be satisfactory in all respects. You can call in, in the morning and have your teeth same day.
