

Money.

Of very ancient origin is money. It is mentioned as a means of commerce in the Bible, in Genesis xliii, where Abraham purchased a field as a sepulchre for Sarah, in the year of the world 2129. Homer speaks of brass money as existing 1184 B. C. The invention of coin is ascribed to the Lydians. Their money consisted of gold and silver. Iron money was used in Sparta, and iron and tin in Great Britain. Julius Cæsar was the first person who obtained the express permission of the Senate to place his image on the Roman coins. Earlier they had placed the image of their deities on the coins. The Romans called their silver moneta, because it was coined in the temple of Juno Moneta, 269 B. C. Money has been made of different materials, even of leather. It was made of post-board by the Hollanders as late as 1574. The North American Indians in earlier times used shells strung together, which they called wampum. Coins were made in many different shapes. English coins were partly square, oblong and round, until the middle Ages, since when round coins have only been used. The Chinese and Japanese coins are square, with a square hole through the center. The names of many obsolete pieces are met with in Shakespeare and some other English authors, such as the angel, angelot, noble, groat, guinea, etc. The first silver coin struck in England was the ancient silver penny. It was struck with a cross so deeply indented that it might be easily parted into two for half-pence and four for farthings.

How He Did It.

They are celebrating their silver wedding, and of course the couple were very happy and were affectionate. "Yes," said the husband, "this is the only woman I ever loved I shall never forget the first time I proposed to her." "How did you do it?" burst out a young man who had been squeezing a pretty girl's hand in a corner. They all laughed and he blushed; but the girl carried it off bravely. "Well, I remember as well as if it were yesterday. I was wry back in Maine. We had been out on a picnic and she and I got wandering alone. Don't you remember my saying, 'The wife nodded and smiled.' 'We sat on the trunk of an old tree. You haven't forgotten love, have you?' The wife nodded again. 'She wrote her name Minnie, and I said: let me put the other name to it. And I took the parasol and wrote my name—Smith—after it. 'How lovely!' broke out a little maid who was beaming in a suspicious way on a tall chap with a blonde moustache. 'And she took back the parasol and wrote below it 'No I won't.' And we went home. You remember it, darling I see you do.' Then he kissed her, and the company murmured sentimental y, 'Wasn't it pretty?' The guests had all departed and the happy couple were left alone. 'Wasn't it nice, Minnie, to see all our friends around us so happy?' 'Yes, it was. But, John that reminds me!' 'Ah, it seems as if it had been only yesterday.' 'Yes, dear, there are only three things you're wrong about in that story.' 'Wrong? O, no!' 'John, I'm sorry you told that story because I never went to a picnic with you before we were married; I was never in Maine in my life, and I never refused you.' 'My darling you must be wrong!' 'I'm not wrong, M. Smith I have an excellent memory, and, although we have been married twenty years, I'd like to know who that minx Minnie was. You never told me about her before.' 'I guess she'll forgive him; but I don't know if she'll forget.

Why the Columbus Watch is the Best

THE Main Spring barrel is completely covered, making the watch perfectly dust proof. There can be no interference between the Balance and the Barrel. The Regulator is nearly double the length of others, rendering accurate regulation a very simple matter. To replace a broken Main Spring, the Barrel can be removed without disturbing the Balance or interfering with the regulation. The pins of the Regulator are so formed and located that two or more coils of the Hair Spring cannot catch between the Pins and cause the Watch to stop or gain time at an unusual rate. The Balance comes under the round, or edge, the strongest part of the case, not as with all others, under the center and weakest part. The Main Spring Power is the lightest used in American Watches. The calculation of the Train is such that this Watch runs 8 to 10 hours longer than others, with one winding, giving more uniform power and rate. These are improvements that cannot be claimed by any other manufacturers; and once seen, all must agree with us in saying that this is the strongest and best Watch made; and with all the above improvements, the Columbus Watches cost no more than others.

NASAL BALM. TOTTENHAM, ONT., May 3rd, 1887. I have been troubled with nasal catarrh for the last five years. Seeing Nasal Balm advertised I procured a bottle, and although I have only used part of it, I do not hesitate to pronounce it the best remedy in the world for that loathsome disease, Catarrh. It is easy and pleasant to use, soothing and healing in its action, instant in giving relief, removes and changes the poisonous secretions to a healthy state, stops the droppings from the head into the throat, and removes all the symptoms of Catarrh and Cold in the Head. In fact, if the directions are faithfully followed, nothing but a sure and permanent cure can be the result.
