HASZARD'S GAZETTE.

Wednesday, November 7, 1855.

Some time since, a person of the name of M'Cree submitted to our inspection a mineral pigment, which promised at first sight to be valuable. We submitted it to Mr. Murphy the painter, who had the kindness to grind some of it with oil, and it was found to possess the same useful qualities as raw terra-sienna, or yellow ochre. We roasted, or calcined some of the mineral, and the result was a lively red. Our informant gave us to understand, that it was to be procured in great abundance; if so, it will be a valuable acquisition not only to the man upon whose farm it is found, but to the Island in general. We would advise Mr. M'Cree to communicate with the owner—he declined telling us who he was—and in conjunction with him sending up a barrel or two to town, many of the painters would, we doubt not, avail themselves of the opportunity of purchasing some; and specimens might be sent to the neighbouring colonies and to the United States, and the fact, whether there would be such a demand for it, as to render the working of the vein an object of importance, might be soon ascertained.

We are at all times happy to give our aid and assistance—humble though it may be—to any discovery in art or science, that may lead to develop the natural resources of the Island. It is very possible, that many useful materials, the possession of which might enhance our list of exports, or at all events, be substitutes for article of import, may still be hid beneath the surface. We are satisfied that a good specimen of potters' clay might be found and we have, no doubt, that a pottery properly managed, would be a profitable concern to the parties engaged and of great advantage to all classes of the community.

THE NEWS.—by the papers brought by the Lady Le Marchant yesterday, from Shediac, we have only one day's later news from Europe. We understand from a gentleman, who came passenger, that a telegraphic dispatch was received at Shediac, giving one week's later news, announcing that Perekop was in the hands of the Allies, that the Russians had been defeated at Kars, and that they were fortifying their position on the North of Sebastopol. The British Mails will be looked for with the greatest of interest on Friday, and we hope to be able to put our readers in possession of some important news, in our next issue.

One Day later from Europe.

The Ariel, belonging to the new Vanderbilt line of steamships, arrived at New York on Saturday evening, placing us in possession of news from all parts of Europe, 1 day later than that received by the Africa.

Consols had improved a shade in London. Austrian finances are reported as in a most precarious condition.

The Paris correspondent of the London Times, writing on October 12, at 6 o'clock in the evening, sends the following by express to London:—

News of the doings of the expedition which arrived before Odessa on the 8th is anxiously expected. 10,000 French soldiers are on board the squadron, and the general belief is, that Kinburn and Oczakoff are to be the points attacked.

Oczakoff or Otshakov, is a seaport town about forty miles ENE. of Odessa. Until 1788, it belonged to Turkey, and was strongly fortified. It has still a citadel, and is a quarantine station, but its trade has greatly diminished, since the foundation of Odessa. Kinburn is a seaport town on the opposite side of the Linau Gulf. These towns command the mouth of the Dnieper, and their possession by the allies would inflict a severe blow upon Odessa.

A report of a popular out-break in Sicily was prevalent.

Rome was dreadfully afflicted with Cholera. At Madrid, also, there were about 50 cases a day, and the civil governor of the capital had died from it.

Russian agents were busily at work in Italy and Switzerland.

Nothing later from the Crimea.

The English gun boats had left the Baltic, and were under convoy home.

It is said that the Danish Sound Dues question will certainly be settled in an amicable manner.

The attempt to lay a submarine telegraph between the coast of Italy and Algiers had proved a failure, the cable having ruptured in paying out.

A terrific boiler explosion had occurred at the Walker Iron Works, at Newcastle-upon-Tyne, (Eng.,) which killed five men two boys, and inflicted injury on several others.

The Supreme Court finished its Michelmas Term sitting, on Monday last. There were few cases for trial, but a considerable number of arguments and these of importance.

Our harbour, wharfs and streets, present a lively appearance and beoken a good deal of business.

We, on Monday last, saw the volunteers, or by whatever name they may be called, at drill in the garrison; they present a soldier-like appearance, we must say, and reflect credit on the Drill Sergeant; whether the benefit expected from them will compensate for the expense to which the Island will, undoubtedly, be submitted, we have yet to learn. Both these facts will be communicated, we suppose, about February, to the representative wisdom assembled in Parliament.
