HOROSCOPES

*For Entertainment
Purposes Only*

Aries (March 21 - April 19):

It doesn't look to good. Go back to bed. Trust me. You'll be better off.

Taurus (April 20 - May 20): There's a wonderful romantic and passionate atmosphere to the week, except for the case of crabs that have elected you to be their home.

Gemini (May 21 - June 21): You are inclined to expect too much for too little. This means you are a cheap bastard. Yeah I'm talking to you.

Cancer (June 22 - July 22): You will find yourself allergic to jellybeans when your head swells up like a balloon from eating a bagful. But there really is only one way to find out.

Leo (July 23 - August 22): You're rising up in this world, star, and believe me you deserve it. You also deserve an ass punch.

Virgo (August 23 - September 22): You probably shouldn't use a public washroom this month. Taurus holds the reasons why.

Libra (September 23 - October 22):

You are standing at a cross road in your life. So are a lot of other people. But at least cover up your butt crack for a change.

Scorpio (October 23 - November 21): You may think your future is looking bleak. Do not worry, things will work out. Scorpio's make good bus drivers and pimps

Sagittarius (November 22 - December 21): You have a reckless tendency to rely on luck since you have no talent. The majority of Sagittarians are drunks. My dad is a Sagittarius. Enough said.

Capricorn (December 22 - January 19): Damnit get off of the poge and get a job.

Aquarius (January 20 - Feb 18): It is the age of the aquarius. But for some reason you do not really know what that really means.

Pisces (Feb 19 - March 20): Try to decipher your dreams with more regularity, you might discover interesting Freudian stuff there.
