LET'S EAT

Preparing A Delicacy

By Ida Bailey Allen

"The frozen food industry has made possible the national enjoyment of many foods that used to be only regional," observed the Chef. "Par example, frogs' legs. This delicacy, which tastes like very fine chicken, used to be served only in exclusive restaurants, but now they are available in frozen form for use in the home."

How to Prepare

"In a restaurant, we allow 2 pairs of frozen frogs' legs to a serving. Thaw and rinse with cold water. Dust with salt and add 1/4 tsp. thyme and 1/2 tsp. lemon juice. Cook in any of the following ways:

Broiled Frogs' Legs: Brush with melted butter; brown under the broiler, and serve with lemon-butter sauce.

Frogs' Legs Sauté: Season with salt and pepper. Brush with sweet or commercially soured cream or slightly beaten egg. Roll in fine dry bread crumbs. Sauté in butter and serve with mushroom sauce.

Frogs' Legs Omelette: is new and very special. To make it, sauté 4 pairs frogs' legs in 1/4 c. butter. Add 1/2 tsp. garlic salt, 1/4 tsp. each pepper and nutmeg. Prepare a plain French omelette mixture; pour over frogs' legs and cook slowly until omelette is set. Garnish with sautéed mushroom caps, and parsley or cress.

TOMORROW'S DINNER

Vegetable-Cottage Cheese Saladettes

Fish Fricassee or Frogs' Legs Sauté
Whip Potato Broccoli
Dropped Cornmeal Biscuits
Coddled Apples
Coffee Tea Milk

Dropped Cornmeal Biscuits:

Sift together 1 1/4 c. already-sifted enriched flour; 1/4 c. enriched yellow cornmeal, 3 tsp. instant non-fat milk solids, 4 tsp. baking powder, 1 tsp. salt and 2 tsp. sugar. Add 3 tbs. shortening (any kind), and chop in with pastry blender.

Beat 1 egg. Add 1 c. water and stir into dry mixture. Dust a cookie sheet with dry cornmeal. Drop on biscuit dough by generous tablespoonfuls, allowing 1" space between. Top with caraway, poppy or coriander seed. Bake 15 min. in a hot oven, 400 degrees F.

This makes 4 doz. biscuits. They can be wrapped in a polyethylene bag and frozen up to two weeks.

VEGETABLE COTTAGE CHEESE SALADETTES FROM THE CHEF

Mix together 1 c. creamed cottage cheese and 1 c. fine-chopped cooked mixed vegetables. Add 1 tbs. small-snipped chives, 1/2 tsp. salt and 1/4 tsp. paprika. Shape into balls. Serve on lettuce with a garnish of pickled carrots. Pass French dressing.

MRS. GORDON MACMILLAN A COUNTRY GARDEN

THE GREEN LITTLE SHAMROCK

There's a dear little plant that grows in our isle. 'Twas St. Patrick himself sure that set it; And the sun on his labor with pleasure did smile, And with dew from his eye often wet it; It thrives through the bog, through the brake and the mireland; And he called it the dear little shamrock of Ireland — This sweet little, green little shamrock of Ireland — This dear little plant that grows in our isle.

In Ireland across the bay from Mallow there is one mountain that holds the attention above all others, Croagh Patrick because of its connexion with Ireland's Patron Saint who, it is said, spent forty days and forty nights of prayer and fasting there. It is because of the mountain's presence (it is the tallest of the Connemara mountains) and the distinctive appearance of its high central cone. Skirting the shores of Clew Bay and looking over the green of the lowlands we can see the heather and with rose purple bells. At this season of the year it is good to read of the "The Emerald Isle" gardens.

There's a green glen in Eirinn, green glen in Eirinn, Where on a dew-wet sprinkled spray brown throistles pipe above, And a blackbird carols after in a silver rain of laughter, And the little linnet pipes his song that has no theme but love. —Carberry.

Ireland has many lovely gardens and many visitors to the garden have told me of them. Beautiful shrubs and tender varieties such as fuchsias grow outdoors in the balmy climate.

Donegal

Nothing is changed. The peat-bogs still lie Below the mist-blue hills; Still sees the pannered ass and black-shawled dame Breasting the road; and still there is a flame Of blood-red fuchsias by the cottage wall. There is no change — no change in Donegal.

Nothing is changed. The eider-cudd still ride Gweebarra Bay. The eroding murrums slide on the cliffs and the dulse-fringed rocks; and down Glenveagh The curlew still pipes in the first of day. Even the harvest moon, like those of old Still turns the wetness of our oars to gold. —Punch.

Over it all — the white house, the green fields with their stone walls, the long road winding, the slow herds coming along in the knee-deep dust, the sweet smell of turf burning, the little carts with colorful shafts, the soft Irish voices, the quick Irish smiles over it all, and in it as if imprisoned in the stone and brick of this country, as if buried beneath the grass and hidden in the trees, is something that is half magic and half mystery. There is something in a minor key that a man never quite hears. Perhaps no stranger ever hears it, but I think the Irish do. It is something drawn up out of the earth of Ireland, out of the water and the sky and the grass and the flowers in the fields, something of the sky and of the earth — a something that is mysterious and like a fall of dew over the land. —H. V. Morton.

Saint Patrick's Day comes this week and soon Spring will be here in earnest. "With rushing winds and gloomy skies, The dark and stubborn Winter dies; Far-off, unseen, Spring faintly cries; Bidding her earliest child arise: March." In country gardens it is possible to mulch the borders now where there is a small amount of ice and snow and here this work has been done when cleaning out the chicken house. This week more tuberous begonias have been started in peat moss and sand. The pendula begonias are lovely for hanging baskets and when over at the nursery to pick them up some beautiful Amaryllis were seen. Eight inch flowers on twenty inch stems in a wonderful bright crimson color. I have never seen such a striking flower, and hope the two plants will be half as good. More watering is needed by the house plants now with the sun so strong and it will be a relief when it is possible to move some of them when the weather moderates a little. They are growing and crowding each other off the shelves. I have been reading of Hever Castle written by A. J. Huxley. . . . What surprises British gardens spring on us! Few travelers I suspect, as they pass their eyes, let themselves imagine that along that drive, behind that screen of trees, may spread the splendour of a Muncaster, the flowery abundance of a Kiftsgate, the rose-church, a pair of massive gates — but not a hint of the surprises within. Enter, then, these wide wooden gates, walk down the drive. The trees thin out; a bridge crosses a water way; clipped yew hedges, immobile on mown grass by the roadside. Before us a rampart of yew, on the left the castle's facade. The castle itself is medieval, dating back to the thirteenth century; a toy castle with its neat rooms and wooden drawbridge. Its most famous historical association is with the ill-fated Anne Boleyn; it was her father's property when Henry the eighth courted her. In 1933 it was bought by the first Viscount Astor and since 1918 it has been the home of Col. and Lady Violet Astor. The castle is not really a focal point in the garden design, but it may be said to have its own gar-

den, an area bounded by the outer moat, a part-rectangle of water stretching on three sides of the castle. The drive crosses a bridge on this outer moat, and between its first stretch and the castle wall is an old orchard, such as one might see by many an old manor or farm; in spring it is a real narcissus, followed by the blossom of the fruit trees. In front of the castle there are a number of large, well-spaced topiary specimens; beyond, a long yew hedge, impressively broken here and there by a series of yew-hedges of sombre formality. At one end two caryatides guard the almost hidden entrance to a square maze, small but puzzling, a narrow labyrinth with six foot walls. Then a semicircular walk beneath a pergola hems in a series of yew-hedged plots, centered here with an astrolabe there with an urn or statuette, and cut into small geometrical flower beds. The largest contains a set of immense chessmen sheared of their golden eyes with smaller, exact examples of the topiary's art, which can be seen from the upper windows of the castle. In the beautiful illustrations of these chessmen and other features of this wonderful garden we get some of the surprises in store for the many visitors. The narrow strip of ground around the castle itself, within the inner moat, is attractive at all times with simple flowers — wallflowers and tulips, azaleas and roses, and on the well-chosen climbers. The water is patterned with water lilies, populated with goldfish and carp. Farther afield there is more water — a wide rush-fringed channel, carrying the eye to a larger expanse of unexpected extent. To one side this channel is a fine avenue of white horse chestnuts; to the right one may spy a wall through trees. What we have seen so far is conventional, and both the formal yew and the homely planting around the castle are typically English like the castle itself. But as we approach this wall, which lies a little beyond the outer moat, we are brought up sharply by the half-pillars and an arc of patterned paving centred on the circular, stepped pool, presided over by a pensive statue. This severe set is the curtain raiser to the Italian garden, a design without parallel in Britain. It is an oblong of four acres, walled on three sides and divided into several unequal quadrangles by yew hedges across its breadth, and it was conceived by Lord Astor to remind him of the great Italian gardens he had known in his youth as American Minister to Italy.

The wall on the left, the so-called South Pompeian Wall, shelters an amazing collection of Roman antiquities in stone and in marble delicately sculptured sarcophagi, altars, busts and columns, all broken and complete with here a seat in a little courtyard receding to the wall. The stately and the structures are surrounded and often enveloped by plants of many kinds, climbers in particular. Occasional windows latticed with wrought iron, and two large paved rondans give on to the water alongside. A great pillared colonnade, "Plazza," and here is one of the glories of Hever. The piazza is of sandstone, and terraced lead down to the lake which is thirty two acres in extent, about three quarters of a mile long and is fed by the river Eden. All round the lake are well-grown trees and shrubs, many kinds and Hever is a study in magnificence and opulence. Sir William Temple wrote many years ago . . . The most exquisite delights of the senses are pursued in the contrivance and plantations of gardens, which, with fruits, flowers, shades, fountains and the music of birds that frequent such happy places, seem to furnish all the pleasure of the several senses and with the greatest, or at least the most natural perfection, hath been the inclination of Kings and the choice of Philosophers so it hath been the common favorite of public and private men; a pleasure of the greatest and the ease of the meanest; an employment and a possession, for which no man is too high or too low.

MORNING SMILE
"You just go right away and forget about your business for a time."
"But I can't do that, doctor. I'm a memory expert."

Wife Preservers
When a mail chute is installed in a side entrance door, and there is not enough room to attach a box because of the wall, a catch-all can be used with an easy other fabric with a square front and two triangular sides which are made rigid by hemming in three light-weight dowels, one horizontal at top and two for the gusseted sides. When the door is opened the bag collapses against the wall without causing damage.

If You're TIRED ALL THE TIME
Everybody gets a bit run-down now and then, tired-out, heavy-headed, and maybe bothered by backaches. Perhaps nothing seriously wrong, just a temporary toxic condition caused by excess acids and wastes. The time is to take Dodd's Kidney Pills. Dodd's stimulates the kidneys, and so help restores their normal action of removing excess acids and wastes. Then you feel better, sleep better, work better. Get Dodd's Kidney Pills now. Look for the blue box with the red band at all drugists. You can depend on Dodd's.

ELLEN'S DIARY by an Island Farmer's Wife

In the fine weather and good mood obtaining, this was an afternoon for the little truck of this farm to make an excursion to the city. As it happened carrying in the back, a few fat shots. "It seems they come to the weight faster when there are declining prices for them" we overheard one farmer observe to the other when they were adjusting the tail-gate of the machine, taking care to secure it well to warrant no escapes. "Yes," the other agreed. "It's just a question as things are now, whether or not these will have paid their way! However, I guess we'll still keep a few of them around, if it's only for company." "You won't be away very long will you?" James queried to the younger farmer as the machine prepared to move away from the yard. "There's nothing much to be seen today, is there? You'll be saying the electric light bill you won't forget that? And if you have the time, you might pick me up a pair of work boots—these have a leak."

"Bring me a pair too!" Mack standing by said, "shiny black rubber ones—up to here" he indicated a fat knee. "Boy, would they go through my puddles!" he laughed happily. "And oh yes," James said "you might get a bit of that . . . not reduced iron, but you know what I mean, for the little pigs—just to have some on hand. And you might call to see . . . if you're waiting for your mother. I know what she's like: she can take all afternoon spending ten cents. She just loiters along—what she sees, I don't know. She's been here often intended to drive off home without her—and let her have her fill of staying, for once."

Seven Days A Week
by Anne Shannon
MONDAY: In a city home not long ago I saw a lady busily wrapping her "best silver" in a brown paper film. Notable for food wrapping, it has many other uses besides this one. A characteristic of the better plastic films is its clinging quality. This makes it ideal for wrapping silver pieces tightly in the same house. She was fashioning a belt out of two colors of the same plastic material. It was a slow painstaking job but the finished product was really unique. I also picked up quite a few interesting ideas on framing your favorite prints or pictures. Lath strips were used to make the frames and were butted squarely together and securely glued and set before the next step. One frame was covered with the emerald green velvet and it had four small brass medallions on it—one for each corner the kind you may buy at each leather goods shop — Other frames were covered with upholstery fabric, shiny gift wrapping paper and so on. The general idea is to frame your frames in endless ways your imagination will allow. The picture, pasted on plywood or heavy cardboard is nailed to the frame. Some people apply a coat of plastic spray to the picture—protects the surface, allows it to be wiped with a damp cloth.

TUESDAY: Do you know what's good for you? Do you put your faith in childhood health rules which may always have been or have become old wives tales? Doctors interviewed at New York Medical College gave this advice to the following questions: No. 1. Does it strain the eyes to read lying down? Answer: No. You can read in any position comfortable. Many people are more alert and can read better lying down because of the greater flow of blood to the head. No. 2. Will mixing milk and fruit in the same meal make me ill? Answer: It is now accepted that any foods which are eaten in any combination you desire. Milk and fish, lobster and ice cream, pickles and milk—all are combinations that formerly frightened people but now are no longer a digestive difficulty. No. 3. Is very thinly sliced celery 2 thinly sliced small onions; 3 sliced hard cooked eggs, 2 cups shredded cabbage. Toss; chill. Makes 8 servings. It may tend to irritate. For minor

burns use an ointment such as pure petroleum jelly, which cannot turn rancid and is non-toxic, and cover with gauze. The jelly keeps the gauze from sticking. — WEDNESDAY: During the past week I read an article entitled "Respect for Law Begins at Home." — I wish I might be able to repeat it in its entirety, for it was such a wholesome and interesting article. In part it said, "It is ridiculous to expect a child, as he enters teen-age, with the violent exaggerations of instincts and urges that so often accompany these years, to suppress them in obedience to the laws of society, when he has never become conscious that there is such a thing as law, enforced by the first authorities he ever encounters — his parents — and by the next authorities his teachers. Children learn self control by being controlled. Juvenile delinquency is largely attributed to poverty, slums, inadequate recreational facilities for youth and so on. This is a prevailing notion. However the facts about youthful crimes and vagrancies does not jibe with this theory. When he has never become conscious that there is such a thing as law, enforced by the first authorities he ever encounters — his parents — and by the next authorities his teachers. Children learn self control by being controlled. Juvenile delinquency is largely attributed to poverty, slums, inadequate recreational facilities for youth and so on. This is a prevailing notion.
