

A By-Law for Levying and Specifying the Rate of Assessment on Real Estate and Personal Property and Poll in the City of Charlottetown for a Waterworks Fund, under Statute 50th Victoria, Chapter 8.

Be it enacted by the City Council of the City of Charlottetown as follows:— 1st. The rate of Assessment on Real Estate or a Waterworks Fund under said Statute for the year commencing the first day of January, A. D. 1891, is hereby specified and fixed at the rate of one-eighth of one per cent on every dollar of the value of Real Estate as assessed by the Assessors of the said City of Charlottetown in the general Assessment Book and Valuation Roll of all Real Estate and Personal Property liable to taxation in said City, and all persons liable to pay Poll Tax therein made and duly returned by them on the twenty-first day of March, A. D. 1891.

2nd. The rate of Assessment on Personal Property for such Waterworks Fund for the year commencing the first day of January, A. D. 1891, and ending the thirty-first day of December, A. D. 1891, is hereby specified and fixed at the rate of one-eighth of one per cent on every dollar of the value of Personal Property as assessed by the Assessors of the said City in the said General Assessment Book and Valuation Roll, made and duly returned by them as aforesaid.

3rd. The amount of Poll Tax to be paid by every person returned by the said Assessors in said General Assessment Book and Valuation Roll as liable thereto for such Waterworks Fund under said Statute, for the year commencing the first day of January, A. D. 1891, and ending the 31st day of December, A. D. 1891, is hereby specified and fixed at Ten Cents (10c) on the poll of every person so assessed and returned as aforesaid.

JAMES WARBURTON, Mayor of the City of Charlottetown. H. M. DAVIDSON, City Clerk.

A By-law for allowing a Rate of Discount on the Assessments on Real Estate and Personal Property in the City of Charlottetown for general civic purposes for the current year ending the thirty-first day of December A. D. 1891.

Be it enacted by the City Council of the City of Charlottetown as follows:— 1st. A discount at the rate of Two and One-half Per Cent shall be allowed to all taxpayers who shall, on or before the Fifteenth day of July next, A. D. 1891, pay to the City Clerk, at his office, the taxes severally due by them for the current year on Real Estate and Personal Property for civic purposes.

JAMES WARBURTON, Mayor of the City of Charlottetown. H. M. DAVIDSON, City Clerk.

A By-law for levying and specifying the rate of assessment on Real Estate and Personal Property in the City of Charlottetown for general civic purposes under Statute 51 Victoria, Chapter 12.

Be it enacted by the City Council of the City of Charlottetown as follows:— 1st. The rate of assessment on Real Estate for general civic purposes under said Statute, for the year commencing the first day of January, A. D. 1891, and ending the thirty-first day of December, A. D. 1891, is hereby specified and fixed at the rate of one per cent on every dollar of the value of Real Estate, as assessed by the Assessors of the said City of Charlottetown in the General Assessment Book and Valuation Roll of all Real Estate and Personal Property liable to taxation in said City, and of all persons liable to pay Poll Tax therein, made and duly returned by them on the twenty-third day of March, A. D. 1891.

2nd. The rate of assessment on Personal Property for such general civic purposes, for the year commencing the first day of January, A. D. 1891, and ending the thirty-first day of December, A. D. 1891, is hereby specified and fixed at the rate of seven-eighths of one per cent on every dollar of the value of Personal Property as assessed by the Assessors of the said City in the said General Assessment Book and Valuation Roll, made and duly returned by them as aforesaid.

JAMES WARBURTON, Mayor of the City of Charlottetown. H. M. DAVIDSON, City Clerk.

Albany Notes.

The farmers in this locality have just completed a good season's haul of marsh mud. The roads and weather were very favorable.

Among the signs of an early spring is the notable fact that some days ago geese were seen making their way from Albany in the direction of South Melville.

Mr. A. McInnis, of Charlottetown, paid a recent visit to Albany and was a guest of Mr. Thomas Noonan.

Miss Emma Noonan is visiting at her sister's, Mrs J A McMahon, Charlottetown.

Mr Garret P Connick, Norborough spent a couple of days with his friends here He returned home Monday.

Mr. Malachias Trainor, is already making preparations for resuming work in his lobster factory. He recently made a visit to Hampton to secure the service of a competent cook.

Mr Arthur Doyle, teacher, paid a visit to the city a few days ago. He was the guest of Mr Jas A McMahon, Great George Street.

Miss Jane E Creamer, is about to open a dress making and millinery establishment in the second story of Terrell's new hall. We bespeak for her an attentive patronage.

Mr John Perkins, jr, is making preparations to erect new buildings during the summer. This, no doubt, is the result of his intimacy with one of the fair sex in the neighborhood.

It is proposed to build a butter factory in this section, on Mr. John Keough's farm. We learn that the contract has been awarded to Schurman, Lefurgey & Co, Summerside.

Mrs Bruce Wright, Middleton, has purchased the mills and other property of Mr. Isaac Ives. We hasten to congratulate Mr. Wright on securing such a fine property, as well as on the notable event of his life, his marriage with Miss Annie Cameron of this place, which took place a few days ago.

OBITUARY.

Death has again visited Sturgeon. On Sunday morning, the 9th inst., Mrs. Jas. Donnelly, a highly respected and much beloved citizen of that place, passed away. Deceased had not been in good health for some time, but not until the past few months did her illness assume a serious aspect. During that time, and more especially in the later part of her illness, she suffered much, but with a patience and resignation that were wonderful. On the above mentioned date she passed away calmly and peacefully and sanctified by the last rites of her church.

She was a much honored member of the community in which she lived, a kind and loving mother and a particularly zealous and God fearing Christian, ever intent on doing her duty to God and society. In her decease the family are deprived of an ideal and affectionate mother, and the Catholic church of one of its most earnest members.

The funeral, which was largely attended, took place on Tuesday morning, the 11th inst. Arriving at the church a Solemn High Mass was sung by Rev. Father Phelan, assisted by the choir under the leadership of Mr. Farrell. The church was mournfully and efficiently draped for the occasion, the altar and pillars entwined with cendre black and everything having the appearance of solemnity. Mass over, the procession slowly and mournfully moved to St. Mary's Cemetery where the body was peacefully interred beside that of her husband.

Deceased leaves five daughters and one son, the latter who is attending McGill was home for the sorrowful event. To these and the numerous friends who are left to mourn the loss we extend our sincere sympathies.

Peaceful be thy silent slumber, Peaceful in thy grave so low, Thou no more will join our number, Thou no more our sorrows know.

Yet again we hope to meet thee, When the day of life has fled, And in heaven with joy we'll greet thee, Where no farewell tears are shed.

LECTURE ON HORTICULTURE

On April 7th quite a large number assembled in Granville Hall to hear the lecture on Horticulture which was delivered by Mr. Eljah Marks in his usual good manner. The hall, which has comfortable seating for about 400 persons, was filled to its utmost capacity. At 8 o'clock the meeting was called to order by appointment in Mr. Wm. R. Taylor, chairman. Mr. Marks then took the floor, which he occupied for a couple of hours, and held the audience as if spell bound by his interesting and instructive oration. He started by describing the different kinds of fruits and telling the audience to spare the old orchards and cultivate them carefully for the sake of our forefathers who planted them however sour the fruit thereof might be. He also gave a remedy for every insect or other article that might possibly injure the growth of a tree, which if carefully followed out, the bark louse, black knot and all others would be considered things of the past. Among the apple trees which he mentioned as being best adapted to this country were the Gravensteins, Ben Davis, Red Mackintosh (which requires the patience of Job to wait for its cultivation) Gideon, the Duchess and several others. He then proceeded to speak for a few minutes upon plums and decribed as the most important, the Yellow Egg, Pond Seedling and Green Gages. Next in order came the pears, the different kinds upon which he spoke being the Keeper, Sickle Pear, Bartlett, and last, although in no way least, the Poss Pineo. In speaking of the grafting of the different trees he encouraged the grafting of the prolific to the shy growers, and so advocated the pruning of trees, but not at all after the manner of our forefathers who would use a six pound steel axe making a wound which nature would never heal, letting the chips fly in all directions, falling where they would, but on the contrary, by using a saw, thereby making a much more artistic pruning than could be done with an axe. He also said that from the growth of five trees by proper cultivation in a term of about five years, he could provide work enough for about 500 men. In conclusion he invited those present who wished for information on his subject to ask any question that might occur to them. Among those who took advantage of this opportunity was Mr. A. K. Henry, who is among our most prominent horticulturists. He asked several questions which were readily and satisfactorily answered. Remarks were also made by the above named gentlemen, after which the thanks of the meeting was tendered to the learned speaker and suitably acknowledged by him. Mr. Marks himself can boast of one of the finest orchards in this province. As this was the first lecture of the kind delivered in Granville it was very much appreciated by the people who are to be congratulated on their success in securing the services of a man so talented as Mr. Marks. He will deliver his lecture in Clifton hall in the course of a short time. Every one should make a note of the date when announced so as not to have any other engagement for that date.

HASZARDS' OR HARTLEY'S?

SIR.—We are pleased to see that both Mr. Walter Simpson and Mr. Fred G. Boyver in their letters to the Farmers Advocate give such high praise to the Hazard's Improved Turnip. We must, however, take exception to Mr. Boyver's statement that it is the "Hartley's Improved Bronze Top" that is locally known as Hazard's Improved. The genuine Hazard's Improved are sold by us for many years, is not Hartley's Bronze Top, but is quite a different type of turnip, growing much more out of the ground, and having more of the favorite tankard shape. It is, besides, a specially selected strain of Swede, as much ahead of Hartley's Bronze Top and other ordinary grades of Swede turnip as Mr. Boyver's pure bred stock is better than the ordinary farm stock of the province.

The genuine Hazard's Improved costs more than Hartley's or any of the other kinds, and it is sold at a higher price. We sell it now, as we have for years, in sealed cardboard packages.

Yours truly, GEO. CARTER & Co.

Britain Got There First.

LONDON, April 11.—A despatch to the Times from Melbourne says that private advices have been received from the Tonga Islands that the captain of the British warship Tauranga and the British Vice-Consul recently concluded an arrangement with the King of the islands, binding him not to part with his sovereign right, or to cede, sell, or mortgage any of the territory, to any foreign power. Great Britain will guarantee the independence of the kingdom.

The old man who looks out at the world with clear and healthy eyes cannot help feeling great gratification at the thought that his children have inherited from him no weakness nor tendency to disease. The healthy old man is the man who has throughout his life kept his digestion good and his blood pure. Not one in a thousand does it. Germs go through the healthy body without effect. Let them once find lodgement or let them find a weak spot, they will develop by the million and the blood will be full of them. Instead of giving strength to the tissues, it will force upon them innutritious matter, and the man will lose flesh and the more susceptible he is to disease. Dr. Pierce's Golden Medical Discovery is the only medicine that absolutely and infallibly cures all blood diseases, and almost all diseases are blood diseases. It isn't medicine for some one particular so-called disease. It is a medicine for the whole body. It forces out all the germs of disease, and replaces impurities with rich, red blood.

RUSSIA'S BIG RAILWAY FUND

Czar's War Preparations.

LONDON, April 11.—Scarcely a day passes that does not bring from Russia news of preparations for war which directly belie the protestations of peace that are being sent broadcast over the world in the name of the Czar. A week ago it was the cruel edict forbidding the representatives of the Finns to petition against the decree of conscription, which virtually stigmatizes their country, in direct violation of the Emperor's coronation oath. A day or two later it was the reported decision to equip the Russian artillery with a new and more efficient weapon. Now comes the news that an enormous new credit is to be opened for bringing the Siberian railway to early completion, and for greatly increasing the carrying capacity originally designed for it.

More than 82,000,000 roubles (about \$41,000,000), making a total of 250,000,000 assigned to railway and transportation purposes from the Russian treasury during the current year, is the amount of this new appropriation. This special credit is set up for improving the means of traffic on the Western and Central sections from Cheliabinsk eastward. The disbursement of this large sum thus divided: Eight and three-quarter million roubles during three years for various needs of traffic, 43,000,000 roubles during nine years for increasing the speed of trains, and 31,000,000 roubles during four years for new rolling stock. The aggregate amount to be allotted to these purposes in the current year is 16,500,000 roubles.

WITHOUT PRECEDENT IN RUSSIA.

The assignment of such a large amount for improving a railway only just constructed is without precedent in the annals of Russian railway enterprise, and, in order to appreciate how it is that so much attention and money are being absorbed by railway work, to the detriment, perhaps of other important matters, it must be remembered that the Emperor himself, as president of the Siberian Railway Committee, personally supervises every item, technical and financial, and that his able Minister of Finance is essentially a railway man. The above sum is in addition to 30,500,000 roubles for the Siberian railway, and 1,000,000 roubles for other lines in this year's estimates.

INCREASE IN TRAFFIC.

A St. Petersburg correspondent states that the increase in the traffic on the eastern and still more, on the western section of the Siberian railway has surpassed all expectation. Its construction was originally planned on economical lines, but the pessimist forecasts of little or no moment for some years to come are being falsified by the facts. Consequently the light rails, which are only 18 pounds instead of 24 pounds to the foot, will have to be changed. Everything was calculated for not more than three pairs of trains per twenty-four hours, whereas there are already eight pairs besides the bi-weekly express from Moscow and Krasnovodsk. The last year's traffic the means of the western Siberian section show 350,000 passengers, nearly 400,000 tons of goods, and 400,000 peasant emigrants. Last winter, although 600 new trucks were added and 1,600 old ones borrowed there was an accumulation of 7,000 truck loads of goods for which no means of transport could be found. Of the 490,000 tons carried over the railway in 1890 more than 320,000 tons consisted of cereals. In the course of the next five years, it is expected that the carriage of what here will reach over 800,000 tons per annum. In the Altai mining district alone at the present moment there is a surplus of 355,000 tons of wheat, while in Central Russia whole populations are starving.

The Queen's New Yacht.

LONDON, April 11.—Queen Victoria's new steam yacht being built in the Pembroke Government dockyard will cost little short of \$5,000,000. The dimensions are: Length, 330 feet; breadth, 50, depth, 23; displacement, 4,700 tons; indicated horsepower, 11,000; speed, 20 knots. The yacht is being constructed of steel sheathed in four-inch teak and covered with solid brass. All the fittings and decorations will be of the costliest and handsomest description. By the Queen's special desire, all the furniture now in use on the yacht Osborne will be transferred to the new Victoria and Albert, and the Queen hates to have new things about her. The yacht will be launched May 8 and christened by the Duchess of York, but will not be completed for another year.

McCarthy's Eyes.

LONDON, April 11.—Justin McCarthy, suffering from double cataract, underwent a preliminary operation last week in a private hospital at Margate for removal on the right eye. He stood the operation admirably. He will be six weeks under treatment before both cataracts are removed.

Prices of iron, sugar, etc, continue to advance—though it was expected that the Liberal Free Trade Government would make everything cheaper.
