Fergus, April 6, 1894

To Robert Phillips, Druggist, Fergus.

This is to certify that I have suffered from piles for a long time and tried several articles recommended for this complaint, but none of them benefitted me till I tried Chase's Ointment, which has completely cured me.

MRS. JOHN GERRIE.

R. Phillips, jr., Druggist Witness.

"My six-year-old daughter, Bella, was afflicted with eczema for 24 months, the principal seat of eruption being behind her ears. I tried almost every remedy I saw advertised, bought innumerable medicines and soaps, and took the child to medical specialists in skin diseases, but without result. Finally, a week ago, I purchased a box of Dr. Chase's Ointment, and the first application showed the curative effect of the Remedy. We have used only one-sixth of the box, but the change is very marked; the eruption has all disappeared, and I can confidently say my child is cured. (Signed) MAXWELL JOHNSTON 112 Anne St., Toronto

ALL ABOUT THE FARM.

The Chicken Coop and the Young Chicks Should be Kept Free From Lice.

It is very important, as the weather gets warmer, that both coops and chicks be kept absolutely clean and free from lice; you cannot afford to raise chicks to feed a swarm of lice with. There will be many sudden showers and possibly a cold rain this month; see that there is a handy place into which the chicks may run. The cockerels, if old enough to distinguish, should be separated from the flock and pushed ahead for all the growth they can make, and sold for broilers when about twelve weeks old. The pullets should be kept thriftily growing, and that is all. Do not force them, let them come to maturity under natural conditions, but do not let them stop growing a single day.

If the henhouse has not been cleaned out yet, take the first day that can be spared from the field and do it. Not to do it now, will probably mean a lousy house and flock and no decent place in which to put the pullets coming on. As soon as you are through setting hens, put the roosters in condition as quickly as possible and market them. Put some of the coops about the garden. Keeping the hen confined and letting the chicks run, they cannot hurt anything for three or four weeks and will destroy many insects; put some under the fruit trees also—it will do both good. Nature seems to have taken the most of the work pertaining to the poultry into her hands this month, and about all man is left to do is to second her efforts. The one word which the poultryman should ever have in mind is **cleanliness.**

Shallow Culture for Corn.

I would advise fall ploughing in case the land was stubble or meadow. Plough six to seven inches deep in the fall, but in the spring five inches is sufficient. The rougher the surface of fall-ploughed ground the better. Pulverize, compact and level the seed-bed. Plant any time between May 1 and 25. As far as yield is concerned there is very little difference between hill and drill planting, but is is usually advisable to check the corn, as it can then be kept clean easier. The thickness of planting wil depend upon the use. In drilling where grain alone is desired, plant in rows 3 2-3 feet apart, one kernel to every foot. If the corn is to be fed as fodder, plant thicker, putting in one kernel every six or nine inches. In hill planting endeavor to get four kernels in each hill. Harrow immediately before planting, as this destroys all weeds and enables the plants to get a good start before cultivation is necessary. Cultivate the ground, beginning with a slant-toothed harrow, and keep the ground free from weeds during the entire season, using a shallow cultivator. Experiments made at the Illinois station for a number of years show that an increased yield of almost six bushels per acre has resulted from shallow cultivation. The crossing of varieties has increased the yield. This may be accomplished by planting different kinds in alternate rows. Although corn has been grown at the station on one plot continuously for 19 years with fair results, a rotation is absolutely necessary for profitable corn raising. The following five-year rotation is desirable. Beginning with a meadow or clover sod, plant to corn two years, then seed to oats or wheat for one year following with grass or clover for two years, and then put again in corn.

The Management of Ducklings.

Ducks are the most easily reared of all domestic fowls, when properly treated. Breeding ducks must be kept warm and comfortable through the cold months. Coop by themselves, with no other poultry. In January and February they begin to lay. They lay very early in the morning, and their eggs must be gathered before they become chilled. Keep them, large end down, on wheat bran for warmth. A thin blanket over them at night will help retain warmth, but it should be removed in the morning. Put the eggs under common hens; they make better mothers. Keep the ducks laying and the hens setting, for they grow fast and are most profitable on our early market. Incubation requires 28 days. When hatched look after them, for the young ducks are very shy and the hen does not know how to manage them at first. Each hen should be placed in a house and yard by herself. Feed at first boiled eggs and corn-meal bread, and always keep water by them in shallow dishes. As they mature feed coarser food, boiled potatoes and more water, and some green stuff, such as kale, or turnips, also fresh meat, and but little grain. Do not let them get wet in a heavy rain. Wallowing in swamp mud is better than letting them go to ponds or streams.

Keep Ahead of the Weeds.

There is only one economical way to fight weeds,—that is to keep ahead of them. When they are just breaking through the ground they can be slaughtered with less labor than at any other time. That is the time to take them in hand. A little later and the work will be doubled. Too many overlook this fact. In many towns five per cent off is allowed on all taxes paid before a certain date, and men hustle to pay their tax and save that five per cent. A much larger per cent off is secured by the man who takes the weeds in season. One can go over a garden with an iron rake when the weeds are just breaking ground, and in an hour's time accomplish wonders. A week later he will have to take his hoe and laboriously cut, cut, cut. And even then he doesn't destroy half as many of the roots of weeds as he would have done a week before with the rake. Neglecting the weeds is something one simply cannot afford.

Reducing the Soldier's Load.

Aluminum is to be adopted as a substitute for iron and steel in the French army. In view of the absence of roads and the steepness of the tracks in Madagascar the kettles and other impedimenta of the troops taking part in the expedition, the trees of the saddles of the cavalry and the stirrups are to be made of aluminum. The trees will have bands of steel let in when the metal is in a state of fusion. The weight of the French heavy cavalry saddle tree is now about five pounds, but with the substitution of aluminum it will be reduced to considerably less than two and a half pounds.

1870. First Tea. 1895. Jubilee Tea.

THE MAMMOTH

JUBILEE TEA

TO BE HELD AT

MORELL STATION,

About three minutes' walk from the charming Morell River, with its curious Floating Bridge,

On Wednesday, 26th June,

will be the crowning Social Event of the Season.

Proceeds in Aid of St. Joseph's Church, Morell.

Morell has long been the favorite sporting ground for seekers of health and rest, and the lovers of the rod and gun. The scenic attractions of the place are so well and widely known that it seems unnecessary to comment upon them here. Suffice it to say that in the last week of June—the most delightful week of the whole year—the natural beauties of the place will have attained their culminating point. These are considerations that should commend the Mammoth Jubilee Tea to all who desire a day of real pleasure and recreation after the hard work of spring. The preparations for the Tea are on an elaborate scale. The Committee in charge are putting forth all their efforts to make the Mammoth Jubilee Tea eclipse anything of the kind heretofore held in the Province. Already the impression is abroad—and it is a true one—that whoever wishes to attend the first, the largest and the best Tea of the season must not miss the "Mammoth." Thousands of people are expected from all over the country, but ample preparations will be made for all. There will be several Tea Tables groaning under the weight of the rarest delicacies of the season—smoking dinner tables, to which sea and stream, forest and farm will each contribute its choicest spoils, well-stocked Refreshment Saloons, Ice Cream and Strawberry Stalls, Bazaar Counters, commodious Dancing Booths, Revolving Swings and other attractions too numerous to mention. A well organized Vigilance Committee will be on the grounds to preserve good order. In a word, everything will be provided to make the day what it should be—one of pleasure and recreation. An excellent Brass Band will come by special train from Charlottetown. In addition to the Band there will be a Piper to enliven the sons of the heather.

Should the day prove unfavorable, the Tea Party will be continued on the following day

Trains will be run on standard time, as follows:—

A Special Passenger Train will leave Charlottetown at 7.50 a. m. (standard), returning will leave Morell at 4 p. m. (standard), to run on the following time schedule:

Leave Charlottetown .....7.50 a. m.
" Royalty Junction.....8.07 "
" Bedford .....8.40 "
" Mount Stewart .....9.07 "
Arrive at Morell at 9.40 a. m.; leave Morell for return at 4 p. m.

Return tickets at the undermentioned rates will be issued from Charlottetown by special passenger train, and by regular passenger trains from Georgetown and Souris, good for return same day, by same trains only:

Charlottetown to Brackley Point, inclusive	.60
Union to Bedford, inclusive	.45
Tracadie to Scotchfort, inclusive	.35
Mount Stewart to St. Andrew's	.25
Douglas	.15
Dundee	.10
Lot 40	.05
Souris	.60
Harmony to Rollo Bay, inclusive	.45
Selkirk to Ashton	.35
Five Houses	.25
St. Peters	.20
Midgell	.10
Marie	.5
Georgetown to Cardigan, inclusive	60
Perth to Peake's, inclusive	.45
Pisquid	.35

Passengers from Georgetown, Pisquid and intermediate stations, will connect at Mount Stewart with Special for Morell, and the regular afternoon train from Mount Stewart to Georgetown will be detained at Mount Stewart to connect with special from Morell.

ITS FAME SPREADING.

A New Remedy in General Use in Manitoba and the Northwest.

WINNIPEG, May 27—The effects of the regular ways of sickness which sweeps over this portion of the Dominion in the spring are noticabfe in the increasing amount of the druggists' sales. There has been quite a run on the kidney remedy now so well known under the name of Dodd's Kidney Pills. The recovery from Bright's disease of Mr. Arthur Coley, of Somerset, through their use, an account of which appeared in the papers, gave a considerable impetus to the sale, and the remedy has become indispensible in many Manitoda households, its fame having penetrated into the remotest parts of the province and North West Territories.

For Over Fifty Years.

AN OLD AND WELL TRIED REMEDY. Mrs. Winslow's Soothing Syrup has been used for over fifty years by millions of mothers for their children while teething, with perfect success. It soothes the child, softens the gums, allays the pain, cures the colic, and is the best remedy for Diarrhœa. Is pleasnt to the taste. Sold by Druggists in every part of the world. Twenty-five cents a bottle. Its value is incalculable. Be sure and ask for Mrs. Winslow's Soothing Syrup, and take no other kind.—m. w. f. wkly—1 y

Why Contemplate Suicide?

It is like tempting Province for consumptives to ignore the remarkable remedy known as Miller's Emulsion of Norwegian Cod Liver Oil. For any person to die of consumption without trying this remarkable flesh and blood maker, after knowing of its existence, is suicide pure and simple. All that the consumptive patient needs is new blood with which to battle against the destructive forces of the disease. Miller's Emulsion provides new blood in abundance. It is a combination of Norwegian Oil and hypophosphites of lime and soda—a triumph of science. Miller's Emulsion is the great nerve staengthener and blood maker, and cures Coughs, Colds, Bronchitis, Scrofula and all Lung affections. In Big Bottle, 50c. and $1, at all Drug Stores.

Experience Has Proved It

A triumph in medicine was achieved when experience proved that Scott's Emulsion would not only stop the progess of Pulmonary Consumption, but by its continued use, health and vigor could be fully estored.

15 Years of Itching.

W. Golding, commercial traveller, 130 Esther St., Toronto, says: "For 15 years I have suffered untold miseries from Itching Piles, sometimes called pin worms. Many and many weeks have I had to lay off the road from this trouble. I tried eight other pile ointments and so-called remedies with no permanent relief to the intense itching and stinging, which irritated by scratching, would bleed and ulcerate. One half a box of Chase's Ointment cured me completely."

Christianity vs. Agnosticism.

Just published in Pamphlet form, 48 pp., the course of Sermons recently preached by the Rev. James Simpson, on "Christianity vs. Agnosticism."

These Sermons have been widely read, and an opportunity is now offered of securing the series in complete form.

Price 20c. per copy; $1.50 per dozen copies.

No Pockets in Shrouds.

You should bear in mind that there are no pockets in shrouds. No matter if you are a millionaire, you will have no use for a pocket when you come to don your last robe. You can't take anything with you. Some people live as though they could. The best way is to take some pleasure out of your hard earned dollars as you go along.

You can get more solid enjoyment out of one of our Fashionable Suits than anything else in this town. Are you one of those who called on us this spring? If so, you can testify to the above with the most satisfactory results. We are still taking the lead with Good Fits and Low Prices.

Have you seen those $14 Suits in Serges, blue and black. Light Tweed Suits same price. Call and see the Leading Fashionable Tailor.

S. A. McDONALD.

Charlottetown, May 27, 1895—135

What is CASTORIA

Castoria is Dr. Samuel Pitcher's prescription for Infants and Children. It contains neither Opium, Morphine nor other Narcotic substance. It is a harmless substitute for Paregoric, Drops, Soothing Syrups, and Castor Oil. It is Pleasant. Its guarantee is thirty years' use by Millions of Mothers. Castoria destroys Worms and allays feverishness. Castoria prevents vomiting Sour Curd, cures Diarrhœa and Wind Colic. Castoria relieves teething troubles, cures constipation and flatulency. Castoria assimilates the food, regulates the stomach and bowels, giving healthy and natural sleep. Castoria is the Children's Panacea—the Mother's Friend.

Castoria.

"Castoria is an excellent medicine for children. Mothers have repeatedly told me of its good effect upon their children."

DR. G. C. OSGOOD, Lowell, Mass.

Castoria.

"Castoria is so well adapted to children that I recommend it as superior to any prescription known to me."

H. A. ARCHER, M. D., 111 So. Oxford St., Brooklyn, N. Y.

"Castoria is the best remedy for children of which I am acquainted. I hope the day is not far distant when mothers will consider the real interest of their children, and use Castoria instead of the various quack nostrums which are destroying their loved ones, by forcing opium, morphine, soothing syrup and other hurtful agents down their throats, thereby sending them to premature graves."

DR. J. F. KINCHELOE, Conway, Ar.

"Our physicians in the children's department have spoken highly of their experience in their outside practice with Castoria, and although we only have among our medical supplies what is known as regular products, yet we are free to confess that the merits of Castoria has won us to look with favor upon it."
