THE DAILY EXAMINER

THE LEADING DAILY NEWSPAPER OF P. E. ISLAND.

Is issued every afternoon, from the office of THE EXAMINER PUBLISHING COMPANY, in the London House Building, Queen Street.

RATES OF SUBSCRIPTION.

Table with 2 columns: Period, Rate. Rows for One Year, Six Months, Three Months, One Month.

Advertisements rates: For small advertisements which are ordered for only one or two weeks the charge is 5 cents per inch for the first insertion, and 2 cents for each subsequent insertion.

Special notices inserted for three months or longer at the rate of 15 cents per line, and under no circumstances will such paid notices appear in the local column.

Special discounts made on all advertisements connected with Church Fairs, Bazaar, Picnics, etc. 50% notices will be inserted with the same unless the regular rate of 10 cents per line is paid.

That THE EXAMINER is considered by our Merchants and Manufacturers to be the leading newspaper in P. E. Island, and consequently the most valuable advertising medium through which to make their announcements public, is abundantly proved by the fact that in order to accommodate our advertisers we have been obliged to enlarge the paper to its present size.

THE DAILY EXAMINER is for sale by the following agents:

- Harry McFarlane, Sole Agent, Charlottetown. J. McIntyre, Post Office, Charlottetown. W. M. Coffin, Water and Prince St. W. M. Coffin, Water and Prince St. Farnham Store, Queen Street. Geo. Carter & Co., Queen Street. S. Gray, News Stand, P. E. I. Railway and on the local column. M. E. J. Walsh, Sole Agent, Summerside. Harry McFarlane, Sole Agent, Summerside. Hon. D. Gordon, Georgetown. M. G. Clarke, Alberton. Chas. A. Gillis, St. John's.

The Weekly Examiner is issued every Friday morning from the publishers' office. It is made up of matter which has appeared in the Daily editions, and is a first-class weekly newspaper—interesting and full of the latest news.

The subscription for THE WEEKLY EXAMINER, paid to any part of Canada or the United States, is one dollar per year. Advertising rates on the same scale as given above for THE DAILY EXAMINER.

DOCTOR DORSEY, Physician and Surgeon.

The Typewriter.

THE NEW YOST

the only Perfect Writing Machine. The Ribbon, the Shift Key and other antiquated devices discarded.

- NEW MACHINE, NEW MANAGEMENT, NEW PRINCIPLES, NEW PATENTS, NEW MEN, NEW LIFE, NEW BRAINS, NEW METHODS, NEW CAPITAL, The LATEST and BEST.

WHAT MUST GO:—Bad alignment, illegible work, foul ink ribbons, bothersome shift keys, double scales, etc., are no longer to be tolerated or pardoned. The NEW YOST has abolished them, and no other can retain them and live.

THE NEW YOST combines the life-long experience of the inventor, G. W. N. Yost, who invented the "Remington" in 1873, the "Yost" in 1880, and the "Yost" in 1889; the latest and best improvements have been added during 1892, making the New Yost an ideal, perfect typewriter. The New Yost prints direct from steel type; its work is never blurred, but is clear cut and beautiful. The alignment is absolutely perfect and permanent. The paper is an ideal success, the best ever applied to a typewriter. The line spacing absolutely perfect.

SYRUP OF FIGS

ONE ENJOYS

Both the method and results when Syrup of Figs is taken; it is pleasant and refreshing to the taste, and acts gently yet promptly on the Kidneys, Liver and Bowels, cleanses the system effectually, dispels colds, headaches and fevers and cures habitual constipation. Syrup of Figs is the only remedy of its kind ever produced, pleasing to the taste and acceptable to the stomach, prompt in its action and truly beneficial in its effects, prepared only from the most healthy and agreeable substances, its many excellent qualities commend it to all and have made it the most popular remedy known.

Syrup of Figs is for sale in 75c bottles by all leading druggists. Any reliable druggist who may not have it on hand will procure it promptly for any one who wishes to try it. Manufactured only by the CALIFORNIA FIG SYRUP CO., SAN FRANCISCO, CAL. LOUISVILLE, KY. NEW YORK, N. Y. W. R. Watson, Druggist, Charlottetown, P. E. Island.

We also intend to keep on hand a full supply of Hard and Soft Coals, which we will sell at the lowest rates.

Give us a call. Telephone connection. BARRATT & CHAMPION, aug5—ly sat tu weds

TOOTHACHE! HEADACHE! NEURALGIA!

INSTANTLY CURED BY OUR APPLICATION OF NERVOL.

25 cents per Bottle, at all Druggists.

EMOL is a purified natural product from Perthshire, Scotland. It contains stearic and dodecic acids and a trace of iron, has a delicate pink tint, and is allied to fuller's earth, without the grittiness of that material. It immediately softens the hard water of limestone districts. It may be used as a natural soap, cleansing and softening the skin to a remarkable degree, and removing horny accretions on palms or soles.

It is pointed out by Dr. A. E. Wright that color blindnesses are very rare. The common form is green-red blindness. This leads to the suggestion that if red signal lights were used, and if the signal lights were of a distinct yellowish tinge and green lights a blinding, even color blind engineers or pilots would seldom mistake the signals.

Speaking of our terrible and increasing waste of fuel, Mr. Jernial Head, in his British Association paper, said that our stores have been drawn on to some degree for 1000 years, and estimated that more than 100. Authorities tell us that another 1000 years will exhaust all the more accessible supplies. But suppose they hold out 2000 years, and not more will at last, as far as we can at present see, have only wind, water and animals as motive power, and the only modes of transit will be sailing and rowing. Sir Robert Ball has estimated that in not less than 5,000,000 and not more than 10,000,000 years the sun will become too cold to support life on this planet. Between the 5000 years when fuel will certainly be exhausted and the 5,000,000 when all life may be extinguished, there will still be 4,995,000 years in which, according to present appearances, man will have to give up his hardy exertions, victories over matter and other animals, and the latter will again surpass him, each in its own element because he has no fuel.

The jaw-trying name of a new disorder is onychophagia. It comes from the Greek word for claw, and signifies that the order is not so fashionable as it will be when a few specialists are imported. Onychophagia is the scientific name for the bad habit of nail-biting. It is Greek and means nail-eating. At a recent meeting of the Medical Society of the French Academy, a paper was read on the subject that provoked an exciting, because novel, discussion. The author went so far as to assert that nail-biting was a sign of degeneracy, indicating not only nervous but moral weakness. He pronounced the habit a disease that was both hereditary and contagious.

An English physician reports having had a patient—a child 3 years of age—whom whooping cough, chicken-pox and measles were developed within a week. Thus three distinct poisons flourished in the child's system, and came to maturity at the same time.

A London Locomotive engineer, Mr. Samson, is of opinion that a new type of locomotive can be built which will do the work of existing engines on half the fuel.

He was convinced.

A man in Nova Scotia was in doubt as to the genuineness of the reported cure of Mrs. Bernard Maguire and ex-Councillor Lingley, of Peterville, Queen's Co., by a course of Hawker's Nerve and Stomach Tonic and Hawker's Liver Pills. He wrote to Squire Lingley, and that gentleman promptly assured him that the testimonials were genuine.

USE SKODA'S DISCOVERY, the great Blood and Nerve-Regenerant.

SCIENCE MISCELLANY.

THE VERY LATEST DISCOVERIES IN THE WORLD OF THE SCIENTISTS.

Atmospheric Dust has Buried Cities—An Explanation of starvation—A New Optical Photometer—Transparent Leather.

The rapid shifting by the winds of beds of sand often destroying or menacing human works, is a phenomenon well known in different parts of the world. But the slow accumulation of the finer particles—the microparticulate dust—has attracted attention only in recent years. Most ruins of ancient cities are buried, and it is not long since the debris of decayed buildings and other works, but that much of it is atmospheric dust. The layer that lies on the surface of a polished surface, if undisturbed, may grow into a deep stratum in the course of centuries. The winds that have beaten against the sides of the pyramids of the Mexican mountains have been laden with fine dust from the plains, and this has been seen through in deposit that now ranges from 100 to more than 200 feet in thickness. The dust cloud from the Krakatoa eruption traveled over 6000 miles against the wind, and was settled in a thin layer over a very large portion of the earth's surface.

When deprived of food, the greatest loss of fat occurs in the adipose tissue and glandular organs, a fact by which it is possible to determine the amount of fat in the body. A study of starting a cat for 13 days. A mouse of 100 per cent of its original weight, the spleen, 63.1 per cent; the liver, 56.6 per cent; the skeleton, 49.2 per cent; the blood, 17.6 per cent; the brain and spinal cord, 4 per cent; the animals, therefore, are exhausted by starvation much more quickly than fat ones. In children dying from wasting diarrhoea, according to H. Baiker, atrophy of the various organs, just as in starvation.

The deformations of fossils by the enormous pressures in mountains are said to have misled Agassiz into describing the fossil fish of the older rocks as into righty species. Many of the supposed species were really identical, but deformed in such various ways as to appear different.

We are glad enough, says Ruskin, to make our profit of science; we snap up anything in the way of a scientific bonus that has meat on it, eagerly enough; but if the scientific man comes for a bone or a crust to us, that is another story.

For determining how well lighted a room may be, Dr. Simonoff has devised a simple arrangement, which may serve also as a test of vision. A book is made up of 24 pages of radiating lines, the first page being a clear grey and the last nearly black; and on every page a few phrases are printed in black letters of different size. The degree of illumination is estimated by turning over the pages of this little book until a selected portion of letters can no longer be read at a distance of about a foot from the eye in a well lighted apartment, the characters may be clearly made out on the twentieth or twenty-fourth page, but with poorer light legibility may cease at the tenth, twelfth or fifteenth page. The power of the eyes of persons making the test must, of course, be intelligently considered.

Emol is a purified natural product from Perthshire, Scotland. It contains stearic and dodecic acids and a trace of iron, has a delicate pink tint, and is allied to fuller's earth, without the grittiness of that material. It immediately softens the hard water of limestone districts. It may be used as a natural soap, cleansing and softening the skin to a remarkable degree, and removing horny accretions on palms or soles.

It is pointed out by Dr. A. E. Wright that color blindnesses are very rare. The common form is green-red blindness. This leads to the suggestion that if red signal lights were used, and if the signal lights were of a distinct yellowish tinge and green lights a blinding, even color blind engineers or pilots would seldom mistake the signals.

USE SKODA'S DISCOVERY, the great Blood and Nerve-Regenerant.

THE WORLD OF LABOR.

ECHOES FROM THE BUSY MILL AND THE WORKSHOP.

Industrial Folks' Gospel—New and Happenings of Special Interest in the Various Fields Where the Mechanic and Artisan Hold Sway Day and Night.

Chinese drink wine hot. The balloon trade is slack. Uncle Sam has 8000 banks. Paris has 27,000 liquor bars. France has 12,000 Americans. Japan has one woman lawyer. A Pullman car costs \$15,000. Italy furnishes the finest coral. New York has 2000 street cars. An envelope cost 25 cents in 1830. Kansas City will have a boulevard. It takes 200 people to make a glove. Maine is building its first steel ship. Bengal enjoys three harvests yearly. Rockland reports a \$22-pound halibut. A Eureka (Kan.) minister's name is Sin. We smoke 3,000,000,000 cigarettes a year. Long Island has 1350-acre poultry farms. Texas has a 400,000-acre sheep ranch. Chicago has a 59-mica high photograph. Gibraltar is to have an aluminium bridge. American funerals cost \$25,000,000 a year. An ordinary piano contains a mile of wire. Our bank deposits reach \$2,250,000,000. European railroads have no grade crossings. New York's Customs House employs 1750 men. Needle consumption reaches 3,000,000,000. The world's railways are worth \$30,000,000. Mexico employs \$350,000,000 of American capital. Dr. W. Seward Webb is building a \$1,500,000 house. Have to be the first European city with a trolley. There are gold washings in almost every part of Idaho. Germany has an army of 8,000,000 men. A dozen varies in number in different trades from 2 to 80. The world's supply of diamonds is thirty times greater than it was thirty years ago. An Englishman has patented a submarine gas stove for heating the water in a bath. Figuring corn at 40 cents in 1892, the American crop was worth a huge \$650,000,000. The harbor of Glasgow, Scotland, will soon have seven tunnels running under its bed. There is enough iron in the blood of forty-eight men to make a twenty-four pound plow. In Australia, it is said, telephonic messages have been successfully transmitted over wire fences. Over 130,000 motherless chickens are daily turned out by incubators in the New England States. Fifty-eight different varieties of wood form an attractive exhibit by California at the World's Fair. At Italian railroad laborer's board bill, amounting to \$30, was paid in a Maine town last week entirely in cents. The inventor of the rubber tip for lead pencils is said to have realized \$100,000 for this apparently trifling device. The Stupendous Congregation of Calhumpation and Pandemonium Conservation Serenaders is a musical organization of Greene, Me. Only five persons lost their lives on British rails in 1891, but there was a slaughter of railway servants. Over 8000 employees were killed and more than 5000 injured. A London inventor has projected a vast water scheme to enable the gold deposits in the interior of West-Australia to be worked with advantage—this by means of artesian well water. Chamberlain, S. D., has the largest artesian well in the world. The flow is 8000 gallons a minute. The well is eight inches in diameter and the water is thrown 14 feet above the top of the pipe. While the Vanderbilts, supposing them to be worth \$200,000,000, it is computed that over 2,000,000 pounds enter into the daily bread of the people of this country, while not less than this amount is used in Europe. There are in existence, it is claimed, specimens of paper made from rags as early as the 10th century, the oldest extant being, it is reported, a letter from Joinville to Louis X., of France, dated A. D. 1315. California is not conspicuously known as a tobacco State, but this plant is grown there to advantage, and it is declared to be superior to the tobacco grown in Southern States, and almost equal in flavor to the Havana product. Violin makers place a high value on timber taken from old houses, and when the ancient Hammond House, in Marblehead, was torn down recently the spruce wood used in it was eagerly purchased at good prices for use in making violins. During the first six months of this year 1014 miles of railroad track was constructed. The Railway Age thinks that this indicates a total construction for the year of at least 9000 miles, which it considers a good record, considering the times. Captain JOHN R. HINE, of schooner Lillian, says: "I was suffering with inflammation of the chest, brought on by exposure to a raw wind. Took a good supply of Putnam's Emulsion, which perfectly cured me. It has given me a new set of lungs. I was cured of the cholera by getting your system in healthy working condition. Hawker's Nerve and Stomach Tonic, with a course also of Hawker's Pills, will excite every organ of the body to healthy action and afford the surest safeguard against disease."

PERFECTLY WELL.

Was all run down, poor in flesh, could not sleep, and was ill, and he felt tired all the time. He took

Skoda's Discovery

the great nerve and tissue builder, and SKODA'S LITTLE TABLETS, that cure dyspepsia, indigestion and headache. He says: "I am perfectly well."
