Take Step Towards Atomic Power Station

WASHINGTON, (AP) — The U.S. Atomic Energy Commission Monday announced approval of a $10,000,000 project designed as a step toward the perfection of a central station which can produce cheap electric power from an atomic furnace.

AEC chairman Lewis L. Strauss said in a press release that the project will consist of developing and constructing the country's first sodium-graphite reactor. The AEC and North American Aviation, Inc., of Los Angeles, will do the work jointly.
