

THE DAILY EXAMINER. MARCH 10, 1883.

Notes of the Week.

—Early in the week, Mr. Gladstone returned to his place in Parliament. With renewed health and vigor, it is hoped that he will lead the "National Talking Shop" to do something. John Bull is complaining bitterly over the insane wordiness of the present session.

—The call of charity to relieve the famine stricken parts of Ireland, is accompanied by a cry for reform from the agricultural districts of England and Scotland. Floods and storms have destroyed the prospect of a good wheat crop, while British cattle and sheep have greatly suffered. In this unhappy state, the farmers are beginning to look to Parliament for relief from some of their disabilities. An English contemporary says:—

"We may be assured that sooner or later the nation will discover that it is fighting against fearful and unnecessary odds. The conviction will first dawn upon the public mind in relation to agriculture which, in spite of the amazing progress made in manufactures, remains our greatest industry. The change will come just as it came in the days of the Anti-Corn League. The dearth of bread forced the people to admit foreign corn. The farmers had to give way before the necessities of the manufacturing classes. It is now the turn of the farmers to cry out that they cannot live while the manufacturing classes have cheap bread. There will have to be a readjustment of the balance. One class cannot be impoverished for the benefit of the other. Fortunately for the farmers, the question does not concern them alone. The manufacturing classes are also beginning to demand protection, and in this community of distress we see the best guarantee for an ultimate settlement of the difficulty.

—The universities of France, Germany, Russia, Sweden, Belgium, Denmark, Switzerland, and the Netherlands, have agreed to reciprocate in the exchange of their scientific works. The Reciprocity is, of course, mutually beneficial.

—Jules Ferry, the latest Premier of France, has adopted a Conservative Policy. He opposes the last proposed revision of the French Constitution.

—In the United States, a measure of Civil Service Reform is, at last, to be tried. Three Commissioners have been appointed under the Act recently passed; and, the Reform will be carried as far as the politicians will permit.

—The decision of the Czar, declared some weeks ago, to be crowned in May next, is announced in the following proclamation:—

"We, Alexander the Third, Emperor and Autocrat of All the Russias, &c., make known the following to all our loyal and faithful subjects. Whereas it pleased God to call us to the hereditary throne of All the Russias, and, inseparable therefrom, to the thrones of the Kingdom of Poland and of the Great Duchy of Finland, at a moment of fearful convulsion. In the midst of the grief and horror with which we were seized, and which overwhelmed the hearts of all our faithful subjects, we did not deem it a fitting time to proceed with the solemnity of coronation. Submitting to the inscrutable ways of Providence, and bowing before the judgment of God, we determined in our heart not to perform this sacred rite until the feelings excited by the crime to which our beloved parents, the benefactor of his people, fell a victim had had time to calm down.

"The moment is now approaching for us to execute the will of God, and to carry out our sacred desire, together with that of all true sons of our Fatherland. Following the example of our pious forefathers, we have resolved to place upon ourselves the crown, and receive, according to established usage, the Holy Sacrament; uniting with us in this act our most beloved Consort, the Empress MARY FEDOROVNA.

"Announcing thus our intention, to be carried out, by God's help, in May next, in the ancient capital of Moscow, we call upon all our faithful subjects to join with us in fervent and humble prayer. May God, the Ruler of the Universe keep us and our Empire in peace and safety; may He pour out upon us the spirit of wisdom and understanding; may He aid us, on assuming the crown of our ancestors of imperishable memory, to faithfully keep the oath which we take, and to consecrate ourselves to the glory and well-being of our beloved Fatherland by the observance of right and concern for the welfare of the people which God has committed to our charge!"

—Legislation goes smoothly on at Ottawa. Sir Leonard delays the Budget Speech so that the Government may have ample time to thoroughly consider the probable effect upon the trade of Canada of the changes recently made in the tariff of the United States. In the meantime a large number of Bills of more or less importance are being considered and advanced through the legislative stages.

—Among the petitions presented, is one from Hons. Peter Mitchell, J. S. Carvell, W. W. Sullivan, and Messrs. Josiah Wood, M. P., L. H. Davies, M. P., F. Brecken, M. P., A. C. McDonald, J. T. Jenkins, and J. H. Beatty, setting forth that discoveries in electrical science have been made whereby signals can be conveyed by electricity for long distances without the aid of wires, thus securing a great reduction in the cost of transmitting messages, that practical use of these discoveries should be made forthwith, and praying for an Act incorporating a company to test the availability of such improvement as a means of conveying messages between Prince Edward Island and the Mainland. It is also stated that application for a patent has been made to the Department of Agriculture by the discoverer of this alleged improvement in the electric science.

—Our King's County Election Case is still under discussion. The Opposition contend that Dr. Robertson should at once take his seat, and that a Returning Officer should not dare to make use of his judgement concerning a candidate's qualification. The Government contend that the whole matter should be referred to the Committee of Privileges and Elections. The question is a nice one; and the issue will be anticipated with interest. One thing is sufficiently clear: when elected, Dr. Robertson had no right to a seat in the House of Commons; and the Returning Officer knew it. Now, in conducting the election, a Returning Officer is necessarily compelled, at times, to use his own judgement, for the law does not and cannot guide him in every exigency which may arise. A Returning Officer is obliged to be something more than a mere machine; and we think it more than likely that Parliament will justify Returning Officer McCormack in not—as the Grits would have been—acting like a mere machine with respect to Dr. Robertson. Mr. McCormack took legal advice and acted in accordance with precedent of the highest character; and it is in the last degree unjust to couple his name as the Opposition Press does with those of "ignorant and uscrupulous returning officers."

—The best news this week—the best news for many a day—for this Province—is the news of the success of the delegation to Ottawa. The general Government have given another instance of their desire to deal justly and honorably with the Island; and the Island Government have again shown that they are fully alive to the interests of the Province. It is interesting to note the different way in which, from different points of view, the success of the delegates strikes the Opposition Press. The Ottawa correspondent of the Patriot—which by the way ridiculed the delegation and said that its members were merely going to have a good time at the public expense—says that the delegates did nothing for which they deserve credit, and made a bad bargain; but the Ottawa correspondent of the Toronto Globe enlarges upon the statement that "Mr. Sullivan will receive about \$125,000 with accrued interest, while his Government will be relieved of the entire cost of maintaining local wharves." The people of Ontario are to believe that the Island has obtained, from a too generous Government, a most important concession; and the people of the Island are to believe that the delegates received much less than the Island ought to have; and both get their information from the same reliable source!

—The circumstance of a poor woman having been turned away from the Provincial Hospital is painful. Such things should not so be. The higher law which demands that the poor shall be fed and the afflicted not turned away, requires that provision should be made for the care of persons like Mrs. Fortescue. The Superintendent of the Hospital is himself a medical man; and surely he ought to be able, on his own responsibility, to give admission, at least for a few days, to insane persons who may be found wandering about, homeless and friendless. If the lower law is inconsistent with the higher law in this respect, an adjustment should be made and the equilibrium established.

The Floods in Mississippi and Arkansas, Etc.

A despatch of the 6th inst. from Helena, Ark., says that the breaking of Fitzhugh levee, five miles below there, will probably not affect Helena, but should the backwater threaten the place a culvert in the Midland railroad embankment will be closed, which will ensure safety. About one hundred thousand acres of land will probably be overflowed by the breaking of the Fitzhugh levee. This section was flooded last year and no crops of any consequence were made on it after the water subsided. The owners of the land were generally in debt prior to that time.

News from all points in the section of Vicksburg, Miss., was unfavorable on the 7th. Back water almost entirely surrounds the Delta levee in Louisiana, and work there will have to be suspended. The Ellis protection levee, which gave way in a storm in the morning, broke out in three places, and the gapes now are beyond control. This will cause serious damage to the lower portion of Issaquena parish, and will overflow many plantations. The river had risen one and one-half inches.

The steamer James Lee arrived at Memphis, on the 7th inst., from Friar's Point, bringing 200 negroes from off the submerged farms. Her officers report that the country between Memphis and Helena, Ark., is under the water, except where strips of levee yet remain. Austin, Mass., is overflowed, and water to the depth of several feet rushes to the town. A rapid rise in St. Francis river has caused great loss to lumbermen, as thousands of logs were swept away by the swift current. Much suffering exists among the inhabitants of sunken lands, and their isolated position makes it almost impossible to afford them relief.

THE FISHERIES EXHIBITION.—The additional exhibits not noticed include some very handsome models of deep sea fishing vessels and cases of birds by Messrs. Downs & Egan in course of preparation. Nova Scotia's preserved fish include specimens of every known kind in the Province with duplicates of those for the economic department. A refrigerator on a large scale is being prepared at Campbellton, N. B., which will be sent, containing a very varied collection, including many of the larger species up to whales, in a frozen state. Prince Edward Island's contribution is frozen up in the "Northern Light," but is expected to arrive on time all right. The Western Provinces will also contribute largely, and every effort is being made to compete with and excel the show of our neighboring Republic. The steamer "Newfield" goes to Sable Island about the 12th inst., and on her return will commence loading for London. She will likely have a full cargo.—H. A. O'Rourke.

Local and Other Items.

EXTRAORDINARY DISCOUNTS for cash at Young's.

The Summerside train was delayed to-day by snow-drifts on the track.

HON. MESSRS. SULLIVAN, FERGUSON AND PROWSE arrived home to-day.

YARMOUTH proposes to have a fire alarm system similar to that of Halifax.

COME and view the magnificent assortment of Easter Cards at BREMNER BROS.

HYDE'S and Jones' cheese at the Family Grocery.—R. K. BRACE. [mar 10]

The mail carriers left Cape Traverse for this city at 2.30 p. m. No mails crossing to Cape Tormentine to-day.

THE compositor, yesterday, made us say London Green instead of London Purple, in the article on the Potato Bug.

WE are pleased to learn that Rev. J. C. Berris, of Shediac, has fully recovered from the effects of his recent illness.

COPIES of Father Osborne's Journal "Crossing the Straits," in separate sheets, can be obtained at THE EXAMINER OFFICE.

LET us again remind our readers of the entertainment of *Tablazeau Vivants* and Music, to be given in St. Peter's Schoolroom, on Tuesday, April 10th.

HON. DAVID LAIRD has consented to deliver the third lecture of the winter course before the Young Men's Christian Association on Tuesday, the 20th inst. Subject: "The Canadian Northwest."

FRANCIS J. CONROY, Esq., will deliver the next lecture before the Catholic Literary Union. The subject—"Facts in the Life of Thomas D'Arcy McGee"—is a popular one, and will, no doubt be well handled by Mr. Conroy.

THERE are large orders in Halifax from New York and Boston for fresh fish for those markets, a fish famine prevailing there owing to the fishermen declining to pursue their usual avocation until after the Wiggins storm.

EDUCATIONAL INSTITUTE—LECTURE COURSE.—The remaining lectures of the course will be given by the following gentlemen:—Rev. Prof. Purwash; Neil McLeod, Esq., Summerside; John Newson, Esq., Charlottetown. Mr. McLeod will lecture on Friday, the 16th inst. Subject—"Samuel Johnson."

The display of flags among the shipping in port, in honor of Washington's birthday, was appropriate and beautiful. We compliment the masters of the three British barks, Maggie O'Brien, Wayfarer and Ralph B. Peake in their magnificent display of bunting on this occasion. Their conduct betokened a reciprocity of international courtesy highly commendable.—Brunswick, Ga., Advertiser and Appeal.

BOSTON AND NORTH SYDNEY.—It is rumored that a line of passenger and freight steamers will run between this port and Boston the coming summer. We feel assured that such a fact would be hailed with much satisfaction by the people of Cape Breton, and confidently promise the projectors the hearty cooperation of our merchants. A large volume of business could be developed by such a line between these points calling at the ports of Cow Bay and Glace Bay.—North Sydney Herald.

WE learn that our very much respected friend, Mr. Reid intends taking part in the Oddfellows celebration, to be held at Summerside next month. The Summersiders will not only hear his rich bass voice, but will have an opportunity, which they seldom have, of having their pianos put in first class order. The above gentleman not only holds certificates from the neighboring Provinces, but from Prof. Earle and most of the leading influential persons in the city. He will very likely stay a week or two in Summerside and vicinity. sum jour li

JOHN HAY, aged 52 years, a native of Berwickshire, Scotland, who has been working for his cousin Peter Hay, proprietor of the Galt Knife Works, Ottawa, committed suicide a few nights ago, by deliberately tying a heavy iron weight to his neck and jumping into a water tank containing about four feet of water. The deceased remained at the knife factory last night after all the other hands had left work. His cousin hearing of his absence from home, went to see what was doing him and found him drowned in the tank.

ON the 7th inst. the Halifax Herald correspondent at Ottawa called on Prof. E. Stone Wiggins, for the purpose of interrogating the weather prophet regarding his prognostication. The March storm, said the Professor, would not begin in the Eastern Hemisphere till the 9th, and would not visit the continent till the 11th. He stated that there would be high winds for the remainder of the week, while the cold would be very severe for this season of the year. Wiggins expressed regret at his being unable to take a trip to Halifax where he had intended to reveal to the full in the terrors of his pet hurricane on the 11th.

WINNIPEG MONEY MARKET.—The dullness which has been the leading feature of the money market for the past few weeks still continues, though to a somewhat abated extent. Commercial papers has been met somewhat more promptly, but still the banks have all they can do in making advances. A more hopeful feeling, however, pervades all financial circles. It is generally believed that the worst has past, and there is a confident expectation that a few weeks more will see a much easier feeling. Rates have not undergone any change. Gilt edged paper is hard to negotiate at 9 per cent. the ruling figure being 10; ordinary, 10 to 12 per cent, as a rule approaching nearer the latter figure.—The Commercial.

The celebrated Rubber Stamp Company of Kenyon, Tingley & Stewart is represented on this Island by Mr. Theo. L. Chappelle. The improved pencil stamp, beautifully nickel plated, is the latest novelty, and can be attached to the top of leap pencil. This stamp will be found very handy for various purposes. The ink is supplied by a pad in the cover. Rubber printing wheels, autographs, monograms, fancy initial letters seal combination and steel stamps, dies, seals, etc., are also manufactured by the Company. The principal banks, hotels, public offices and business men throughout the Dominion can certify as to the excellence of these goods. Call at the Diamond Bookstore and see specimens. Active agents wanted. No drones required. Apply to Theo. L. Chappelle, Diamond Bookstore. [mar 5 B]
