

One Slip On This Job Sure Death To Someone

ST. HUBERT, Que. (CP)—It's a question of life or death daily for 18 young airmen here. But the lives aren't their own, and that makes their responsibility so much greater.

The 18 RCAF personnel comprise the Safety Equipment Section of the air defence command here. They are responsible for the safe operation of parachutes, oxygen equipment, survival kits and ejector seats of the command's air squadrons.

"We can't afford to go wrong," says Cpl. Ben Tardiff of Plessisville, Que. "The only way to go about the job is the proper way."

PANSTAKING WORK
Exact care, rather than in-genuity, is required. Parachutes used in jet ejector seats are replaced once a month. Each is opened, suspended in a high, heated chamber to dry and carefully repacked after every one of the 24 chute canopy panels has been cleared and the cords looked over for defects.

Pilots test their oxygen masks twice a month. Packaging and re-packaging of survival kits—winter and summer styles—is another task on which a pilot's life may depend.

Containers 14 inches square and five inches deep are ejected along with the pilot in cases of plane trouble, and they are crammed with such life-preserving oddments as matches, signal mirror, compass, vacuum-packed sleeping bag, two-way radio, 22 rifle, an ax and socks.

A couple of two-pound food packs enough to keep a pilot alive 10 days under Arctic conditions, containers.

HANDY TREATMENT
LIVERPOOL, England (CP)—A maternity hospital here had its first male patient. A man was treated for injuries suffered in a motorcycle accident outside the hospital gates.

Report Peron Predicts Revolt

NEW YORK (AP)—The New York Herald Tribune publishes a prediction by former President Juan D. Peron that he will return to Argentina this year on the crest of a revolt that might claim 1,000,000 lives.

Correspondent Joseph Newman, who interviewed Peron at his current exile retreat in Panama, writes that Argentina's former boss is convinced that he will recover his rule by the end of 1956. Newman says the former dictator appears to be consumed by desire to regain power and wreak vengeance on his foes and quotes

him as saying: "My agents are everywhere and they are preparing for the day. It may come any time. There will be a violent uprising. Blood will flow in the streets of Argentina."

Car Hits Train

The damage suffered by a 1955 Dodge sedan when it collided with a C. N. R. freight train at the Grafton Street Charlottetown, level crossing, can be seen in the above picture.

The car owned by John Denham and driven by John Daley both of Kilmuir, struck the inbound train at about 1.20 yesterday morning. Both occupants of the car were taken to the P. E. I. Hospital where

it was learned that Mr. Denham had suffered a skull fracture, concussion and severe scalp and facial lacerations, while Mr. Daley was suffering from concussion, and severe scalp and facial lacerations.

The attending physician last night reported that both were resting as comfortable as could be expected. Guardian Photo

Expect Debate In Commons On China Question

OTTAWA (CP) — The ticklish question of recognition of the Communist regime in China will loom large in foreign policy debates at the new session of Parliament.

Discussion of the controversial subject is expected to show that widely separated views are held by political groups in the Commons.

The Liberals appear to be moving toward recognition of the fact that the Peiping regime controls China. However, this would not carry with it approval of that government being in power.

Any move by the government to grant this form of recognition likely would be supported by the CCF group.

SURE TO FIGHT
However, recognition in any form probably would be vigorously opposed by the Progressive Conservative group.

MacDonald.
West ice—A. Sullivan vs. B. Moar.

vative and Social Credit parties. Spokesmen for the two groups say there have been no recent developments on the international scene which would warrant Canadian recognition of the Peiping government.
