Volvo Plant Is Latest Gain For Industrial Estates Ltd.

HALIFAX (CP)—The decision of Volvo of Canada to produce cars in Canada at a plant in neighboring Dartmouth brings to 27 the number of industries Industrial Estates Limited has helped to begin or expand operations in Nova Scotia.

The firm, a subsidiary of Volvo of Sweden, announced Thursday it has entered into an agreement with the Nova Scotia crown company to start the assembly of cars in a one-storey concrete building owned and formerly occupied by Acadia Atlantic Sugar Refinery Ltd.

ISL has agreed to construct a $2,500,000 to $3,000,000 plant for Volvo within 30 months. The site is to be chosen by the company.

The federal government has extended to the company certain temporary tariff arrangements to assist in the establishment of production facilities.

Since ISL was set up in 1957 to encourage development of secondary industry, it has helped in the esatblishment or expansion of 26 manufacturing firms in various parts of Nova Scotia. Its chief function is to provide a plant for a manufacturer on a rental basis.

Under the temporary tariff arrangements, Volvo will receive relief from normal tariffs on certain items it must import during the early stages of its operation, said Finance Minister George Nowlan in Ottawa Thursday.

Mr. Nowlan said Volvo will increase its purchases in Canada "quite quickly" once it becomes well established.

The company will be permitted to import car bodies from its Swedish plant duty-free for the first five years of operation, or until annual production reaches 10,000 units. It also will be permitted to import some engines duty-free.

For the first year, duties will also be waived on certain automobile parts Volvo will import.

After the first year of production, existing provisions of the Canadian tariff on automobile parts with respect to content will apply to imports by the company.

The minister said the decision to manufacture Volvo cars in Canada "will have a significant impact on Canada's balance of payments, since cars which hitherto have been imported now will be supplied from Canadian producers."

Volvo, a leading manufacturer of cars, trucks, engines and heavy engineering equipment, expects to purchase the bulk of necessary capital equipment in Canada.

Personnel Crisis Is Facing Mining

TORONTO (CP) — Shortage of personnel is one of the most serious problems facing mining, E. B. Gillanders, president of the Canadian Metal Mining Association, said at the association's annual meeting Thursday.

"There now are 127 students in mining and 115 in geology at our universities," he said. "This compares with 192 and 217 five years ago when the situation was already acute."

Questioning whether the role of the mining industry is understood and appreciated by Canadians, Dr. Gillanders said:

"Metal mining produces $1,500,000,000 of new wealth each year. It furnishes full-time, all-year round employment to 110,000 Canadians. Its products account for more than 27 per cent of our exports. It stimulates manufacturing and service industries by its requirements in equipment, construction, power supplies and services, almost all of which are provided in Canada. It opens up the country and develops new and settled communities."

In 1962, the value of all minerals — metallic, non-metallic, mineral fuels and structural materials — established a record dollar value of $2,840,000,000, an increase of 10 per cent over 1961.

EMIGRATED TO AMERICA

Flora Macdonald who helped Bonnie Prince Charlie escape from the Scottish mainland, emigrated to America but returned in 1779.

CONTRACT BRIDGE

By B. JAY BECKER

You are the dealer, both sides vulnerable. What would you bid with each of the following hands?

1. ♠A2 ♥QJ753 ♦AKQJ4 ♣8
2. ♠K74 ♥K8 ♦AQ6 ♣KJ952
3. ♠KQ5 ♥AJ4 ♦AJ93 ♣KJ6
4. ♠98532 ♥AKQ6 ♦AJ4 ♣7
5. ♠Q853 ♥J962 ♦AJ ♣AQ8

1. One heart. This simply follows the general rule of first bidding the higher ranking of two touching suits of equal length. Of course, from the standpoint of quality, the diamonds are better than the hearts, but this does not justify varying from the usual procedure. Naming the diamonds first and then the hearts would give partner the impression that the hearts were only four cards in length, and this could easily lead to the wrong contract.

2. One notrump. It is far better to open with a notrump than a club. The notrump opening shows 16 to 18 points, balanced distribution and strength, in all suits which is exactly what we have. An opening bid could be based on a much wider range of high cards and all types of distribution, and hence is much less precise.

Furthermore, if the club opening drew a response from partner of a diamond, a heart or a spade, it would become impossible to make an accurate rebid. A jump to two notrump would constitute an overbid, while a rebid of one notrump would constitute an underbid. Such rebid problems can be avoided by opening with a notrump.

3. One diamond. Despite the pronounced notrump features, the proper bid is a diamond. An opening bid of one notrump would show 16 to 18 points; a two notrump opening would show 22 to 24 points. With 19 points, we do not fit either category. Hands in the intermediate zone are opened with one of a suit. The big bid comes later.

4. One spade. Despite their poor quality, the spades are bid ahead of the hearts. Length takes precedence over strength. The logic behind this becomes apparent if partner is assumed to have an equal number of spades and hearts. suppose, for example, partner has three spades and three hearts. In that case, spades is the better trump suit, since we would have eight trumps instead of seven. Any five-card suit is biddable.

5. One club. Any hand containing 14 high-card points must be opened, even though the suit named is not, strictly speaking, biddable. Since we can't pass and also lack the high-card requirements for a notrump bid, we open with one of a suit. The texture of the spades and hearts is too poor to warrent naming either of them, so we bid clubs even though there are only three of them. This is not particularly desirable, but it is the least of evils.

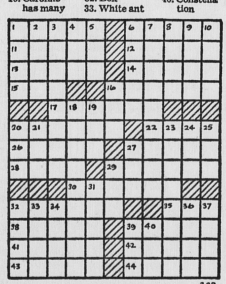
Yesterday's Answer



2-22

DAILY CRYPTOQUOTE — Here's how to work it:

AXYDLBAAXR
is LONGFELLOW

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.

A Cryptogram Quotation
