STANDARD

LIFE ASSURANCE CO.

AT the 57th Annual General Meeting of
the Standard Life Assurance Company,
held at Edinburgh on Tuesday, the 24th of
April, 1883, the following results for the
year ended 15th November, 1883, were re-
ported:—

3,038 new proposals for life as-
surance were received the
year for \$ 9,754,085 38

2,561 proposals were accepted,
assuring 7,239,048 13

The total existing assurances in
force at 15th November,
1882, amounted to 56,936,302 91
(Of which \$7,753,081.15 was
reassured with other offices)

The claims by death which
arose during the year amount-
ed, including bonus addi-
tions, to 2,462,226 59

The annual revenue amounted
at 15th November, 1882, to 4,267,546 00

The invested funds at same
date amounted to 29,503,416 00

Being an increase during the
year of 1,062,648 35

PATENTS.

We continue to act as Solicitors for Patents
Caveats, Trade Marks, Copyrights, etc., of
the United States, and to obtain patents in
Canada, England, France, Germany, and all
other countries. Thirty-six years practice.

No charge for examination of models or
drawings. Advice by mail free.

Patents obtained through us are noticed in
the Scientific American, which has the largest
circulation, and is the most influential news-
paper of its kind published in the world. The
advantages of such a notice every patentee
understands.

This large and splendidly illustrated news-
paper is published Weekly at \$3.20 a year
and is admitted to be the best paper devoted to
science, mechanics, inventions, engineering
works, and other departments of industrial
progress, published in any country. Single
copies by mail, 10 cents. Sold by all news-
dealers.

Address, Munro & Co., publishers of Scien-
tific American, 261 Broadway, New York.
Handbook about patents mailed free

FOUL PLAY.

By Charles Roads.

CHAPTER XXXIV.

(Continued.)

By this visit to the lagoons, Hazel gather-
ed that this island was a half way house for
migrating birds, especially ducks; and he
inferred that the line those vagrants had
taken was the shortest way from this island
to the nearest land. This was worth know-
ing, and set his brain working. He begged
Helen to watch for the return of the turtle
doves (they had all left the island just be-
fore the rain) and learn, if possible, from
what point of the compass they arrived.

The next expedition was undertaken to
please Helen; she wished to examine the
beautiful creeks and caves on the north side
which they had seen from a distance when
they sailed around the island.

They started on foot one delightful day,
and walked briskly, for the air, though
balmy, was exhilarating. They followed
the course of the river till they came to the
lake that fed it, and was fed itself by hun-
dreds of little natural gutters down which
the hills discharged the rains. This was
new to Helen, though not to Hazel; she
produced the map and told the lake slyly
that it was incorrect, a little too big. She
took some of the water in her hand, and
sprinkled the lake with it, and called it
Hazelmer. They bore a little to the right
and proceeded till they found a creek shap-
ed like a wedge, at whose broad end stood
an arch of foliage studded with flowers, and
the sparkling blue water peeped behind.
This was tempting, but the descent was
hazardous at first; great square blocks of
rock, one below another, and these rude
steps were coated with mosses of rich hue,
but wet and slippery; Hazel began to be
alarmed for his companion. However,
after one or two difficulties, the fissure
opened wider to the sun, and they descend-
ed from the slimy rocks into a sloping suc-
cumbent leaves that are the glory of the tropics.
The ground was carpeted a yard deep with
their luxuriance, and others, more aspiring,
climbed the warm sides of the diverging
cliffs, just as creepers go up a wall, lining
every crevice as they rose. In this blessed
spot, warmed, yet not scorched, by the
tropical sun, and fed with trickling waters,
was seen what marvels 'boon Nature' can
do.

Here our vegetable dwarfs were
giants, and our flowers were trees. One
lovely giantess of the jasmine tribe, but
with flowers shaped like a marigold, and
scented like a tuberose, had a stem as thick
as a poplar, and carried its thousand buds
and amber-colored flowers up eighty feet
of broken rock, and planted on every ledge
sucker, that flowered again and filled the
air again with perfume. Another tree
about half as high was covered with a cas-
cade of snow-white tulips, each as big as a
small flower-pot, and scented like honey-
suckle. An alce, ten feet high, blossomed
in the corner, unheeded among loftier
beauties. And at the very mouth of the
fissure a huge banana leaned across, and
flung out its vast leaves, that seemed tran-
slucent gold against the sun; under it shone
a monstrous cactus in all her pink and
crimson glory, and through the mass of
color streamed the deep blue of the peace-
ful ocean, laughing, and catching sun-
beams.

Helen leaned against the cliff and quiver-
ed with delight, and that deep sense of
flowers that belongs to your true woman.

Hazel feared she was ill.
"Ill?" said she. "Who could be ill here?
It is heaven upon earth. Oh, you dears!
Oh, you loves! And they all seemed grow-
ing on the sea, and floating in the sun!"

"And it is only one of a dozen such," said
Hazel. "If you would like to inspect them
at your leisure, I'll just run to Palm-tree
Point; for my signal is all asked. I saw
that as we came along."

Helen assented readily and he ran off;
but left her the provisions. She was not to
wait dinner for him.

Helen examined two or three of the
flowery fissures, and found fresh beauties in
each, and also some English leaves, that gave
her pleasure of another kind; and after she
had revelled in the flowers, she examined
the shore and soon discovered that the
rocks which abounded here (though there
were also large patches of clear sand) were
nearly all pure coral, and in great
variety. Red coral was very abundant,
and even the pink coral, to which
fashion was just then giving a fictitious
value, was there by the ton. This inter-
ested her, and so did some beautiful shells
that lay sparkling. The time passed swif-
ly; and she was still busy in her researches,
when suddenly it darkened a little, and
looking back, she saw a white vapor steal-
ing over the cliff, and curling down.

"Upon this she thought it prudent to re-
turn to the place where Hazel had left her;
the more so as it was near sunset.

The vapor descended and spread and
covered the sea and land. Then the sun
set; and it was darkness visible. Coming
from the south, the sea-fret caught Hazel
sooner and in a less favorable situation.
Returning from the palm-tree, he had taken
the shortest cut through a small jungle, and
been so impeded by the scrub that, when
he got clear, the fog was upon him. Be-
tween that and the river he lost his way
several times, and did not hit the river till
near midnight. He followed the river to
the lake, and coasted the lake, and then
groped his way toward the creek. But,
after awhile, every step he took was
fraught with danger; and the night was far
advanced when he at last hit off the creek,
as he thought. He hallooed; but there
was no reply; hallooed again, and to his
joy, her voice replied; but at a distance.
He had come to the wrong creek. She was
further westward. He groped his way west-
ward, and came to another creek. He
hallooed to her, and she answered him.
But to attempt the descent would have been
mere suicide. She felt that herself, and
almost ordered him to stay where he was.

"Why, we can talk all the same," said she,
'and it is not for long.'

It was a curious position, and one typical
of the relation between them. So near
together, yet the barrier so strong.

"I am afraid you must be very cold," said
he.

"Oh, no; I have my seal-skin jacket on;
and it is so sheltered here. I wish you
were as well off."

"You are afraid to be alone down here?
'I am not alone when your voice is near
me. Now don't you fidget yourself, dear
friend. I like these little excitements. I
have told you so before. Listen: how calm
and silent it all is; the place; the night!
The mind seems to fill with great ideas, and
to feel its immortality.'

She spoke with solemnity, and he heard
in silence.

Indeed it was a reverent time and place;
the sea whose loud and penetrating tongue
had, in some former age, created the gully
where they both sat apart, had of late years
receded, and kissed the sands gently that
calm night; so gently, that its long, low
murmur seemed the echo of tranquility.

The voices of that pair sounded super-
natural, one speaking up, and the other
down, and the speakers quite invisible.

"Mr. Hazel," said Helen, in a low, earnest
voice, "they say that night gives wisdom
even to the wise; think now, and tell me
your true thoughts. Has the foot of man
ever trod on this island before?"

There was a silence due to a question so
grave, and put with solemnity, at a solemn
time, in a solemn place.

At last Hazel's thoughtful voice came
down. "The world is very, very old. So
old, but the words 'Ancient History' are a
falsehood, and Moses wrote but as yester-
day. And man is a very old animal upon
this old, old planet, and has been every-
where. I cannot doubt he has been here."

Her voice went up. "But have you seen
any signs?"

The voice came down. "I have not look-
ed for them. The bones and the weapons
of primeval man are all below earth's surface
at this time of day."

There was a dead silence. Then Helen's
voice went up again. "But in modern times!
Has no man landed here from far-off
places since ships were built?"

The voice came sadly down. "I do not
know."

The voice went up. "But think!"
The voice came down. "What calamity
can be new in a world so old as this!
Everything we can do and suffer, others of
our race have done and suffered."

The voice went up. "Hush! there's some-
thing moving on the sand!"
(To be continued.)

Court Scandal in Berlin.

PRINCE FREDERICK CHARLES NICOLAS, AC-
CUSED BY HIS WIFE OF INFIDELITY.

Court circles in Berlin are stirred by a
scandal which involves the two proud houses
of Hohenzollern and Anhalt. The alleged
culprit is Prince Frederick Charles Nicolas,
the nephew of the Emperor, and one of the
most distinguished Generals of the Franco-
Prussian war. His wife, the Princess
Marie Anne, daughter of the Duke Leopold
Frederick of Anhalt, lately discovered what
she considers conclusive evidence of the
Prince's infidelity with a lady who is prom-
inent in the court of the Empress Augusta.

The Princess confronted him with the
proofs of his guilt and demanded that he
should abandon his unholy amours. A ter-
rible scene resulted, and better recrimina-
tions were exchanged.

The upshot was that Prince Frederick
Charles absolutely refused to comply with
the demand of the Princess that he should
refuse to speak to the lady, and that the
Princess threatened to institute a suit for
divorce. There have been as yet no public
proceedings regarding the scandal, and the
Berlin newspapers contain only the vaguest
allusion to the affair. It is known, how-
ever, that Prince Frederick Charles has
submitted the question to the Emperor and
agreed to abide by his decision.

The Emperor, after expressing profound
sorrow for the occurrence, decided that a
suit for divorce could not be permitted, but
that a separation might be arranged after
due provision has been made to protect the
heritage rights of the Princess and her
offspring.

A Terrible Experience.

The bark "Truro," Capt. Swain, was
towed into Halifax, on Friday morning,
with her foremast and jibboom gone. The
"Truro" was bound from Rotterdam to New
York and left the former port on the 1st
December. Between the 23rd and 30th
December, she experienced very heavy
gales. On the latter day a heavy sea board-
ed the ship, carrying away her bowsprit,
foremast and main-top-gallant-mast, with
everything attached, and sweeping every-
thing movable from off the deck. At the
time the sea boarded her, the vessel was
laid to with no sails set. All
that night until the next day
the gale blew with unabated fury,
accompanied by heavy snow squalls, the crew
being engaged all night clearing away the
wreckage, which was completed at daylight,
and after rigging a jury-mast and temporary
spars the captain decided to bear up for
Halifax to effect repairs. On the 6th inst.,
one of the crew, named Charles Taylor, a
native of Hastings, Eng., died from ex-
posure and was buried at sea, and on the
following day another one succumbed to the
hardships of the voyage and the cold and
was buried at sea; his name was William
Port and he was a native of Dartmouth,
England. The "Truro" is a bark of 895
tons register, she was built at Princeport,
N. S., in 1873, and was re-classed last
summer. She was owned by Mr. John B.
Dickie, of Truro, and others.

AYER'S HAIR VIGOR, for dressing the hair
and promoting its growth, is indispensable
to the health of the scalp.
