THE DAILY EXAMINER

NOVEMBER 1, 1882.

Editorial Echoes.

—In Ontario the commitments for vagrancy were 3,888 in 1877, against 1,587 in 1881. So much for N. P. which having been taken advantage of, has supplied employment to the people.

—Montreal is making preparations for the meeting in that city of the British Association of Science. It is understood that the meeting of this august body in Canada is due to the good offices of Lord Lorne and Sir John A. McDonald.

—Grit organs in the Upper Provinces are rejoicing in the low prices of produce which they think will tend to make the N. P. unpopular in the farming districts. Any circumstance which will tend to injure the Government (no matter how adverse to the interests of the country it may be) is welcomed by the Grits out of office.

—The Commissioner of Public Lands has notified purchasers whose terms of credit have expired, that unless their payments are made within three months or satisfactory arrangements are made with the Department, precepts will issue. The list of defaulters, as they appear in the Royal Gazette covers eleven pages.

—The House of Lords voted thanks to the British Army in Egypt, without a division. In the House of Commons the majority for the vote was 337. But the Commons was not nearly as much of one mind as to the demerits of Arabi as in regard to the merits of the men who put him down. The words stigmatizing Arabi's uprising as a revolt were maintained in their place in the thanks resolution by a majority of five only, the vote standing 230 for the removal of the words and 235 for their retention.

—On his return from the Northwest, Sir Charles Tupper was "interviewed," as a matter of course. Regarding the Canada Pacific Railway Sir Charles reports that more than 100 locomotives, and a great number of cars, are constantly employed in conveying passengers over the road, and that several enormous freight sheds have lately been erected to meet the demands of the freight traffic. Sir Charles went as far West as Salt Town, 82 miles beyond Moose Jaw Creek, and 480 miles west of Winnipeg. Track-laying was still proceeding at the rate of three miles a day, and the Saskatchewan will probably be reached this year if the open season continues, the distance being 150 miles west of Salt Town, of which 70 miles is already graded. Sir Charles visited Regina, and says that people are already flocking thither in crowds. The extraordinary strides made by Brandon and Portage La Prairie, which a year or two ago were emerging from solitude, and are now towns of considerable size, and possessing regular municipal institutions, surprised the Minister of Railways. The journey has but confirmed Sir Charles Tupper's faith in the boundless resources and great future of the greater Canada which lies west of Lake Superior, and of which the wealth, so long unappreciated, is being rapidly developed under the energetic and prudent administration of the present Government.

Notes from West River Bridge.

Farmers here have nearly all finished their potato digging, and a very large quantity of potatoes, in roses, white and blues, are waiting shipment.

A few building lots will be sold at the Bridge on the 6th Nov., offering a rare chance to business men, as the Bridge is the principal thoroughfare in winter as well as in summer to the city.

The Liberal-Conservative Convention will meet November 1st, at Brian's Cross. The name of Mr. Francis Bain is favorably mentioned as a candidate. But the Council must be abolished, that is the word.

October 30, 1882.

A novelty has just been received at the Militia Department, Ottawa, in the shape of a small spade about two feet long. It is very strongly made and the blade is about five or six inches each way. On the end of the short handle, and forming a cross-bar to it, is a steel instrument with the head of a hammer at one end and a sharp straight saw at the other, which also answers as an axe, the face being 1 1/2 inches broad. The tool was sent over by the inventor, who says it will be adopted by the British army, and after this each soldier will carry one on his back. The construction is very clever and the tool could be carried conveniently.

The French Government has obtained clues to the existence of a vast revolutionary organization in Franco under the direction of a committee at Geneva.

Much anxiety is felt among the Europeans in Egypt on account of the reinstatement of adherents of Arabi in Government positions.

Sixty thousand families are rendered homeless in the Philippine Islands by the recent terribly destructive cyclone.

CORRESPONDENCE.

We do not hold ourselves responsible for the opinions or statements of our correspondents.

To the Editor of the Examiner.

MR. EDITOR.—When I was on the Island last winter, I found that a report was very general in the Eastern part of the country to the effect that one Caleb H. Jenkins, a son of John Jenkins, Esq., of Albany Plains, was then confined in the Penitentiary, at Canon City, Colorado. The young man left California in a wagon about two years ago to come to Colorado. The last his parents heard from him was in New Mexico, bound for Gothic City. Since then—nearly two and a half years ago—not one word has been heard from him. When asked last winter if I had heard that he was in the Penitentiary, I invariably answered, No. But there was some people who would have him there anyway, and I determined to ascertain the truth or falsity of the story when I got back to Colorado. After repeated efforts, I finally got ear of the Warden of the Penitentiary. In reply to my enquiry, as to whether there ever was a man named Caleb H. Jenkins in his charge, he wrote as follows:—

CANON CITY, COL.,
Aug. 26, 1882.

MR. J. H. FLETCHER,
DEAR SIR.—We have never had a man here by the name of Caleb H. Jenkins. The only man by name of Jenkins we have is Albert J. Jenkins. He is 38 years old, 5 feet 11 1/2 inches high, complexion dark, eyes brown, hair black. He was born at New York—his father and mother, Joseph and Mary Jenkins,—live at Detroit, Mich., and he has a wife, Anna, also living at Detroit.

Yours truly,
W. B. FELTON,
Warden.

This, I think, settles the matter, and proves that whatever else became of the young man, he did not find his way to the Penitentiary. Recently it has been reported to me that I was the author of the story. Nothing could be further from the fact. Mr. Caleb H. Jenkins was an old pupil of my own, his parents were friends of mine, and he left California to come direct to me. It is, therefore, unreasonable that I should circulate such a report about so intimate a friend of my own. Those, however, who talked the most about this matter, were, I believe, the originators of the foul calumny. It is a shame that the feelings of his family should be harrowed, and that his own reputation should be blackened, by the tongue of slander. I knew Caleb H. Jenkins well, and I know that, whether living or dead, he was a credit to his country and the pride of his parents.

Hoping that this will settle forever the base slander so industriously circulated against so estimable a young man.

I am, &c.,
J. H. FLETCHER.
Gunnison, Col., Oct. 13, 1882.
(Patriot please copy.)

"Enclosures."

A CIRCULAR FROM THE CUSTOMS.

The following circular has been issued by the Customs Department, Ottawa, to the various Collectors of Customs.

CUSTOMS DEPARTMENT,
Ottawa, 6th October, 1882.

SIR,—In consequence of the very frequent discovery of enclosures, which are not noted in the invoice or entry, in packages sent for examination, I am desired by the Minister of Customs to furnish you with the following copy of the fifth section of the Customs Act relating thereto, with instructions to distribute the same generally to all the principal importers of goods at your port, not only for their own information, but that they may communicate the same to their correspondents in foreign countries and Great Britain, with a view to the future prevention of this most dangerous practice:—

"40 Victoria, chap. 10, sect. 50:

"The Collector shall cause at least one package in every invoice, and at least one package in ten if there be more than ten in any invoice, and so many more as he or any appraiser deems it expedient to examine for the protection of the revenue, to be sent to the warehouse, and there to be opened, examined and appraised—the packages to be so opened being designated by the Collector; and if any package is found to contain any goods not mentioned in the invoice, such goods shall be absolutely forfeited, and if any goods are found which do not correspond with the description thereof in the invoice, and such omission and non-correspondence appears to have been made for the purpose of avoiding payment of the duty or of any part of the duty on such goods, or if in any invoice or entry any goods have been under-valued with such intent as aforesaid, or if the oath made with regard to any such invoice or entry is wilfully false in any particular—then, in any of the cases aforesaid, all the packages and goods included or pretended to be included, or which ought to have been included in such invoice or entry, shall be forfeited."

By this it will be seen that the mere fact of an enclosure being found, which was not mentioned in the invoice under which the package under examination was entered, the goods so enclosed are absolutely forfeited, and no room is left for the consideration of extenuating circumstances.

I am, Sir,
Your obedient servant,
J. JOHNSON,
Commissioner.

In the course of a few years the Northern Pacific Railway will run through an avenue of shade trees hundreds of miles in length. The extensive tree planting is being done to protect the road from storms and snow drifts. In addition to having a large gang of men at this work between Fargo and Bismarck in Dakota, the officers have distributed immense quantities of seedlings and cuttings to the farmers settled on the land grant, and offered prizes for skill in forestry.
