

erty of the citizens against loss by fire, at no cost to the latter; on the contrary, they are business institutions, established for the purpose of making money; and, if through the inefficiency of the means for preventing or suppressing fires, they incur extra risk or loss, the cost of that extra risk and the loss, must be made up out of the citizens' pockets in the shape of high premiums.

The Committee have been in correspondence with the Waterous Engine Company, of Brantford, Ontario, W. D. Andrews & Bros., (Engineers of the Driven Well system) of New York, Gilbert Murdoch, Esq., of St. John, N. B., and R. H. Buchanan & Co., of Montreal.

The first scheme or proposal is to erect in connection with the "well" known as Quirk's pump, a stationary pumping engine of sufficient capacity. The pumping engine to be connected with the well by a ten inch suction pipe, and with mains and hydrants laid in the streets as follows: Along Grafton street, from Prince to Queen's, an eight inch main.

With such works in operation here, there could be had within ten or fifteen minutes, after an alarm of fire, sufficient pressure at the hydrants, to throw four or five streams of water to a height of sixty or seventy feet, without the aid of the fire engines. The fireman's first duty would be to run with the hose reel, attach the hose to the hydrant and pour on the fire.

The reliability of such works is assured by the fact that several cities in New Brunswick and Nova Scotia have recently erected extensive works for both household and fire service, on this plan. It is known as the Holly system, and is in successful operation in many large cities, both in Canada and the United States.

The cost of this work, exclusive of engine house and land, is \$13,855—(Tender marked A) for the whole say \$15,000—which at 6 per cent. is \$900 a year. To this must be added the expense of running the engine and pumps and also repairs, altogether a trifling expense compared with the benefit to be derived.

The other scheme is contained in an offer (see it annexed marked B) from the same firm—Messrs. R. H. Buchanan & Co., to bring in the water at their own expense, either from Winter River or Gates' Brook, and distribute it by means of iron pipes throughout the city, on condition that the Corporation agrees to take from them fifty hydrants for fire purposes, as described above, at \$50 each per annum.

Thus, without any risk or further expense than \$2,500 a year, there would be an effective water supply (the pressure being constant at the hydrants), available at all times, and with the aid of the steam fire engines, in all parts of the city for fire suppression. As giving the largest supply of water and at the same time being in the opinion of your committee the cheapest and most effective, and giving little or no trouble to the Fire Department, they recommend the adoption of the scheme contained in the second offer of Messrs. R. H. Buchanan & Co. They feel assured that the carrying out of this scheme would contribute very much to the welfare of the citizens, as well as to the protection of their property.

Your Committee cannot conclude their report without expressing their high appreciation of the efforts of the brave men who at considerable sacrifice undertake the protection of the property of the public from fires. A greater interest should be shown by the citizens in the fire brigade, and more encouragement given them as a recognition of their invaluable services.

Respectfully submitted, J. T. JENKINS, Chairman. OWEN CONNOLLY, H. J. CUNDALL, W. E. DAWSON, JOHN ISAAC, DAVID LAIRD, GEO. E. FULL, A. N. LAROE.

CHARLOTTETOWN, P. E. I., May 25th, 1884. Geo. E. Full, Esq.

DEAR SIR,—In answer to your enquiries regarding fire appliances for your town, we submit as follows:—

We will lay 9,000 feet of 6 inch cast-iron pipe, and 1,000 feet of 8 inch cast-iron pipe with all the necessary ties as shown on your plan. Where connections are to be made all pipe to have spigot and faucet turned and bored points, and corked with lead. All pipe to be coated with Smith's patent tar. Said pipe before being laid to be tested to 500 feet head, and certificate of the same to be given to you from the makers in Scotland, and when laid to be tested to 120 pounds hydrostatic pressure.

We will place twenty-six double branch hydrants as marked on plan, or as your Committee may locate. And when pipe crosses from north, running east or west, place out valve in all four

Chapman valves, with keys and boxes covered up with cast-iron covers, same as used in ordinary towns and cities.

We will place one duplex double acting steam pump 18x10x12, composition lined and of the best in every detail, with two steel boilers of sufficient capacity that one boiler will run pump, and the other boiler to act as a reserve, built with brick. We will supply the boilers with all latest and best improvements, and guarantee four good fire steamers seventy feet high, from 1 1/2 inch nozzles, all the work to be done by the best through out.

On the end of each pipe we will leave blank for further extension, should you require later on to do so. In submitting these figures we include all but the building to hold pump and boilers. Should you decide this matter at once we will lose no time in completing our contract.

We complete all as follows: 9,000 feet of pipe, 1,000 feet of 8 pipe, 26 hydrants with connections on each, frost proof; one 18, 10, 12 duplex double acting steam pump, 2 steel boilers, 12x4, 50-3 tubs, with steam dome, 24x30, all built in complete, all excavation and filling in relief valve, all wrenches, oil cups, and all fully guaranteed, and of the best, in every sense of the word, for the sum of (\$13,855) thirteen thousand eight hundred and fifty-five dollars.

And remain, Dear Sir, Yours very truly, W. PERRY, JR. For R. H. Buchanan & Co., 662 Craig Street, Montreal, P. Q.

B. CHARLOTTETOWN, P. E. I., May 5. GEO. E. FULL, Esq.

DEAR SIR,—In reference to our conversation regarding Waterworks we submit as follows:—

We ask the town council of Charlottetown, P. E. I., to grant us the right of way through the streets of your town to lay water pipes for the supply of water from Winter River or Gates' Brook for household use and fire protection; and as we will place from 60 to 70 hydrants, we ask them to take 50 hydrants at \$50 each from us. And should they consent so to do, we will include the present contract offered you to-day in said W. W. system, and allow you the same amount as paid. Later on, we can go more into detail. And should we be favored with the above, we will go into the matter to your Committee's entire satisfaction.

And remain, Dear Sir, Very truly yours, W. PERRY, JR., For R. H. Buchanan & Co.

MR. CURTIS said we were not much further ahead than when we started. We all know, he said, we want water; but where is the money to come from. He would like the gentlemen, besides allowing how to get water, to show how to get the money to pay for it.

MR. CURTIS said he had no confidence in the saving by insurance. If we are to have a saving by insurance let the agents come forward and state what reduction they will make and then we will know where we are standing. He also knew that if Waterworks were introduced we would have to get a system of sewage, which would be very expensive.

HON. D. LAIRD thought that insurance agents should give their views on the matter.

F. T. NEWBERRY, Esq., said he came as a citizen and wished to hear the views of the meeting. He was of opinion that unless waterworks were introduced insurance would be raised. He was not speaking for insurance companies but if the meeting wanted the opinion of the insurance companies he would support a committee from the board of underwriters to report to the meeting on the matter.

MR. P. R. BOWERS moved that the report be published in order that the public may be enabled to give it better consideration.

DR. JENKINS seconded the motion. HENRY RACKHAM, Esq., agreed with the report of the committee, but he thought that the committee might have stated the cost of water per family. If the price was reasonable he did not think anyone would object. He thought the last proposal of R. H. Buchanan & Co., the best. He was not altogether in favor of waterworks, but believed that the time had arrived when we should have a supply of water.

DR. JENKINS said the committee would endeavor to find out the cost per family in time to lay it before citizens at the next meeting.

DR. FARQUHARSON, Esq., M. P. P., said that if the committee could also obtain figures on the cost of sewage they would also be interesting. He also believed that insurance agents should give their views with regard to a reduction in insurance if waterworks were introduced.

The motion of Mr. Bowers was then put and carried and the meeting was adjourned until Thursday evening next, at 8 o'clock.

Canadian History. The following extract from the report of an address by the Hon. G. W. Ross should be noted:—

"Above all things was it necessary that Canadians should study thoroughly the history of their own country. If there was one thing more than another that was studiously avoided in the educational system of this country it was the study of its history. Even in the Public Schools—those schools of which they were so proud and boasted so much in the Province of Ontario—this branch was grievously neglected. The children were taught the history of France, of Germany, of Italy, and of other European countries; they were taught the history of ancient Greece and Rome; but the history of their own country—this fair Canada of ours—which it behooved them all to know and understand, was almost totally neglected. It was not so in the United States. Every schoolboy and girl was taught something of the life and doings of George Washington and of those other men who had helped to build up the great country to the south of us. But how many children in Canadian schools had any acquaintance with the lives of the distinguished men whom Canada had produced? He feared the number was amazingly small."

The eldest daughter of Lord Lytton though only 14, has taken up the family pen and written one of the most blood-curdling ghost stories that had seen the light for many a day.

THE DAILY EXAMINER.

MAY 26, 1884.

The Tree-planting.

WELL, we have planted our trees; and no one in particular feels much worse off, while the city has been greatly improved. Indeed the only persons who have reason to be dissatisfied are these who, having the means, lacked the will to plant. These persons will naturally feel dissatisfied—with themselves. But on the whole the large amount of public spirit, enthusiasm and practical activity shown in the work was a pleasing surprise; and the result was highly creditable and praiseworthy. Never, we think,—though the day was rainy—did the Queen's Birthday celebration pass off with more general satisfaction; and it is worthy of note that no one was killed, drowned, or even hurt.

The tree-planting was confined to no class. Rich and poor, learned and ignorant, old and young, men in public positions and men in private life planted trees. This was pleasing. In matters of taste and sentiment, as well as art and literature, it is well that we should have a pure democracy. No man should, by reason of want of wealth or high social position, be deprived of his share of the pleasure and the honor he is capable of sharing in and fairly obtaining; and it is gratifying to note that some of the best trees planted on Saturday were planted by those who are regarded as the poorest of our citizens.

Having all sorts and conditions of the people interested in the tree-planting, we have an additional guarantee that the trees will be cared for and protected against the assaults of all their enemies. Strolling cows and bad boys will be watched; and both, we are bound to say, will be punished with the utmost rigor of the law. Many of those who planted on Rochford Square, have, we observe, placed "protectors" around their respective trees, and their example might well be followed. The additional cost is very little; and the "protector," if properly secured, ensures the safety of the tree against all but the most mischievous or malicious attacks.

"Safe bind safe find.— A proverb ever true to thrifty mind."

Great credit is due the General Committee of the Arbor Society as well as the sub-Committees and Secretaries, for each of the Squares; and Messrs. R. R. Fitzgerald, and A. B. Warburton, deserve special mention as the projectors of the movement. The Secretary for the Rochford Square Committee offers a suggestion which seems to be a good one, and is, at all events, worthy of consideration with a view to future action for the improvement of the West End of the City and the convenience of citizens frequenting Victoria Park.

As the EXAMINER anticipated, nothing was done, under the auspices of the Arbor Society, towards tree-planting on Great George Street, though some five trees were planted by private citizens; and the report of Thomas McKinlay, Esq., which will be found in another column shews the reason why. We hope the City Council will, as soon as possible, have this street laid out and prepared for the planting of trees, etc., in the way indicated a few days ago.

The Queen's Birthday.

LIST OF PERSONS WHO PLANTED TREES IN THE PUBLIC SQUARES.

- QUEEN SQUARE. Arbuckle, Geo.—1 Golden Willow. Beer, Mrs. H.—R. Cherry (2), White Birch (1). Bremner, Geo.—Willows (2). Beales, James—Birch (3). Beer, F. H.—Rock Maple (1). Beer, W. W.—White Maple (1). Beer, S. F.—Rock Maple (1), oak (1). Brown, A. B.—Mountain Ash. Conroy, F. J.—Rock Maple (1). Carvell, Senator—Rock Maple (4). Cullen, Patrick—White Birch (3). Carter, W. F.—Rock Maple (1). Davies, L. H.—Elm (1), Limes (3). Desbrisay, Miss—Choke Cherry. Fitzgerald, R. R.—Lime (1). Ferguson, Hon. D.—Rock Maple (6), Twin Birch (1). Fitzgerald, Rev. Dr.—White Maple (1), Poplar (1), White Birch (1), Elm (1), Rock Maple (1). Fraser, S. D.—Horse Chestnut (1), Weeping Elm (1), Golden Willow (1). Findley, Wm. H.—Rock Maples (2). Grant, J. L.—Golden Willow (1). Grant, J. E.—Golden Willow (1). Hobkirk, Mrs. Dr.—Birches (2), Oaks (2). Hazard, H.—Rock Maples (2), Juniper (1). Harris, Wm., Jr.—Mountain Ash (1). Laird, Gordon—Horse Chestnut (1). Laird, Wm.—Rock Maple (1). Laird, Rennie—Elm (1). London House—Willow (1). Longworth, John—Elms (2). Lavie & Hazard—Mountain Ash (1). Martin, D. C.—Mountain Ash (1), White Birch (1). Moore, F. W. L.—Rock Maple (1). Murray, A.—Rock Maple (1), Mountain Ash (3). Mellish, John T.—Golden Willow (1). Mellish, E.—Rock Maple (1). Mullaly, Jas. W.—Birch (1). Newbery, F. T.—Elm (1), Oak (1), White Birch (1), Rock Maple (1). Newbery, Arthur—Red Dog Trees (8), Mountain Ash (1), Choke Cherry (1). Macdonald, A. A.—Oaks (4), Elm (1), Rock Maple (1). Macdonald, H. C.—Horse Chestnut (1). Macdonald, James—Elm (1). McKenzie, A. B.—White Birch (1), Elm (1), Horsechestnut (1), Mountain Willow (1). McKenzie, Donald—Rock Maple, White Birch, Golden Willow and Mountain Ash. McLeod, Alex. D.—Horse Chestnut, Mountain Ash, and White Birch.

- McLeod, J. D.—Golden Willows (2), Oak (1). McNeill, A. H.—White Birch (1). Sullivan, W. W.—Rock Maple (4). Stewart, D. B.—Elm. Salvage Corps—Birch (2), Norway Maples (2). Sterns, Frank—Birch. Sterns, D.—Rock Maple. Scott, John—Birch. Scott, D.—Birch. Sutherland, Jas. M.—Mountain Ash and Horse Chestnut. Taylor, G. W.—White Birch (2). Warburton, Dr.—Rock Maple. Weeks, Wm.—White Birch. Weeks, Wm. A. Jr.—Rock Maple (1). Warburton, A. B.—Mountain Ash. Weeks, R. T.—Horse Chestnut. Wright, Geo. J.—Elms (2).

Trees were planted in Hillsborough Park by:— Neil McLeod and Benjamin Rogers—Rock Maple (14). Charles Palmer—Rock Maple, Horse Chestnut, Black Walnut, Birch, Juniper, and Thorn (13). Wm. Kennedy—Rock Maple, Poplar, Wild Cherry, and Birch (7). Fred. DeSt. Croix Brecken—Horse Chestnut, Maples, etc., (4). Joseph Unsworth—Black Walnut and Birch (2). Patrick McQuaid (EXAMINER)—Maples (2). A. A. McLean—Black Walnut and Birch, (2). Archibald McNeill—Walnut, Maple, Birch, and Golden Willows (17). William Murphy, Thos. Caseley and others had places prepared on Saturday evening, and were to plant trees in the Park this morning.

Trees were planted on King Square by:— F. Herbert Beer—Elms (2). C. C. Gardiner—Elms (2), and American Rock Maple. Dr. Beer—Elms (2). John Bell—American Rock Maple and Island Rock Maple (2). George R. Beer—Maples (2), and White Birch. A. L. Bridges—White Birches (6). W. W. Beer—American Rock Maple (1), and White Maple (1). F. W. Moore—White Birches (2). G. Frank Beer—White Willow. Geo. McLeod—Elms. E. W. Dawson—White Birches (3). John McLeod—Elm and Norway Maple. Henry Lowe—White Birch. Noah Waughan—White Birch. Rev. Mr. Wadman—L. L. Beer—Rock Maple (2), and White Birch.

Trees were planted for and by the following persons in Rochford Square—Lieut. Governor Haviland, Hon. T. W. Dodd, Rev. G. W. Hodgson, Rev. K. McLennan, Rev. W. B. King, Rev. E. A. Harris, Mrs. Ralph Peake, Mrs. Arnold, T. Handrahan, Mr. Haszlewood, J. Nicholson, T. McLean, Mrs. R. Cotton, A. Martin, J. Bethune, Dr. Dodd, H. J. Cundall, Miss Hobkirk, Miss M. Hobkirk, H. Reid, R. Harris, Parker Carvell, V. C. Morris, sr., Miss K. Wright, Miss E. Wright, L. Watson, Mrs. W. C. Harris, Mrs. W. L. Cotton, H. Heine, Clara Harris, Charlie Harris, Miss S. Harris, George Davies, J. Clinton, W. Strickland, Nathaniel DeCourcy, W. Murray, Walter Cotton, Frank Cotton, Miss Winifred Cotton, St. Peter's Schoolgirls, St. Peter's Schoolgirls, Miss Harvie's School children, Donald Nicholson, Miss Nicholson, John Crockett, Ed. Walsh, John Mills, J. Turnbull, J. Rush, Ben Crosby, Rob. Crosby, Dave Byers, T. Shephard.

The following is Mr. McKinlay's report on Lower Great George Street:— This street, in its present condition, is as ill adapted as could well be for proper tree-planting and protection.

The drains on the eastern side average eighteen feet from the buildings to their centre, while those on the western average sixteen feet. The gas pipes appear to lie half-way between the drain and kerb of the sidewalk, on the eastern side, i. e., about fourteen feet from the buildings.

In connection with this examination, I measured the distance from buildings or fences at which several sets of trees are at present growing in town. Those planted by the Hon. James Duncan are eleven feet, and are very much too near, having now grown to touch the corner of the house and also overhang the fence in some cases, various other sets are twelve, thirteen and sixteen feet; all these latter on Prince street. In front of Mr. Thomas Alley's house on Prince street, are four trees at eighteen feet, but these which are pretty well grown show that a much further distance is advisable where possible, as in such wide streets as those running up from the harbor. Twenty-two to twenty-four feet would not seem too much to prevent the trees when grown up from proving to a considerable extent an annoyance by darkening the houses, and the closer the trees are planted in the row, the more necessity there will be for attending to this. When planted thirty feet or more apart, eighteen feet might do, but at half that distance less than twenty-four feet would most likely be found inadvisable.

So that in Great George street (southern end) the present location of gas pipes, drain, &c., on the east side, will compel any planting, if done without altering the arrangement of the street, (which is at present impracticable) will have to be at a minimum distance of twenty feet, perhaps the full distance of twenty-four feet.

There are four blocks on each side to plant between Richmond and Water streets. These at thirty feet distance apart will take six trees each side, making forty-eight in all; at twenty feet apart, nine each side or seventy-two in all; at fifteen feet, or there-by eleven each side or eighty-eight in all; while the section (about one hundred and fifty feet in length) below Water street will take, if planted about twelve, sixteen, or twenty-two trees additional, according to distance as above.

THE special committee for Queen's Square, held a meeting this morning, when a subscription list was opened for the purpose of defraying the expenses of beautifying the Square, it being decided to lay off and edge the walks, plant flowers, stakes trees, &c. Mr. A. Newbery was requested to secure the services of an experienced

person—one from the Public Gardens, Halifax, if possible—to take charge of the Square.

The chairman was requested to draw up a memorial, petitioning the Dominion and Local governments, as well as the city council, for a grant to meet the expenses. A committee is also to call upon persons interested for subscriptions. There is no good reason why these grounds should not be made equal to the Public Gardens at Halifax. We believe our soil is better adapted, and more can be accomplished here at less cost. Ladies wishing to plant flowers, can have beds allotted to them on application to the Secretary. Every precaution will be taken to protect the grounds.

TREES PLANTED ON THE STREETS. Among those who planted trees on our streets were,—William Murray, who planted seven very fine young elms in front of his property on Pownal street; F. S. Moore, who contributed several rock maples to Prince street; Dr. Warburton, who planted a beech and a rock maple on Great George street, and Dr. Robins who planted a graceful yellow birch in front of his office on Great George street; Robert Taylor planted a number of fine trees in front of his residence on corner of Cumberland and Grafton streets; Henry Weeks has planted three trees in front of his residence on Pownal street, Philip Large, John Shea, and McKie & McDougall have each planted very nice trees opposite their respective places of business, on Upper Great George street.

A SUGGESTION. An avenue of elms and rock maples leads from Pownal to Rochford Street, along the south side of the square, thence along the west end of the square the avenue is continued to Fitzroy Street. It is suggested that in the near future Fitzroy Street should be carried across Government Pond, and into the Brighton Road. A complete avenue for foot passengers, and a broad street way of eighty feet in width would thus be formed, leading from the Main Street directly to the Park. The avenue at the south side of the square will also lead to Government House bridge, along Kent street. If Esplanade street were to be carried across the Douse property to connect with West street, which connects with Kent street at the Drill Shed, and Kent street continued along shore line of Government House grounds a continuous street would then lead through the most beautiful part of the town, from the Esplanade to Victoria Park. If the two ideas are carried out, two fine entrances will be obtained, and the Park will at once be a compact portion of our pleasant little city.

It has been remarked that, with the exception of William Murphy, Esq., no member of the City Council—as at present constituted—planted a tree.

The special Committee in charge of Hillsborough Park will gladly accept donations of suitable trees (large sizes) from any one desirous of assisting in the ornamentation of the Park.

Horsford's Acid Phosphate FOR ALCOHOLISM. Dr. J. S. Hullman, Philadelphia, Pa., says: "It is of good value in the troubles arising from alcoholism, and gives satisfaction in my practice."

Academy of Music. 4 NIGHTS 4 The Tavernier Comedy Co. Announce a short season as above, beginning Wednesday, May 28th, with the great New York success.

THE BANKER'S DAUGHTER. (IN SIX ACTS). New Scenery and Costumes. Admission 25 and 35 cents. Reserved seats 50 cents, now on sale at Dodd's Medical Hall. Secure your seats at once. Ch'town, May 26, 1884—6i.

Montreal, Halifax and Boston STEAMSHIP LINE. THE first-class steamer Titan sails from Montreal for Boston, on or about 20th inst., calling at Charlottetown and Halifax. Will accept freight to and from this port at low rates. Merchants have yet time to telegraph orders to Montreal. W. DARLEY BENTLEY & CO., Montreal. A. H. B. MACGOWAN, Agent at Charlottetown. May 26, 1884.

\$20 REWARD. THE subscriber will pay a reward of Twenty Dollars for such information as will lead to the conviction of the person or persons who uprooted a tree in front of his residence on the night of the 24th inst. RICHARD HEARTZ. Ch'town, May 26, 1884.

CHALLENGE. THE race partly arranged some time ago between Mr. William Coughlin, of Crapaud, and the undersigned, having fallen through, I since learn that Mr. Coughlin has expressed his willingness to have the same take place. I will, therefore, match my three year old colt, "Abdallah Boy," against any colt of same age which Mr. Coughlin can produce, for a mile race, best three in five, for from \$50 to \$200. To show that business is meant, the sum of \$50 has been placed in the hands of Mr. Thomas Campbell, Charlottetown. JAMES DOUGAN. Millicove, May 23, 1884.—m 26
