Federal Agency Set Up To Save Workers From Economic Junkpile

By ROBERT RICE

OTTAWA (CP)—A new federal agency is being set up to prod labor and management into a co - operative attack against the job-killing potential of technological change.

Armed with a $500,000 government fund, it will try to save thousands of workers from the economic junkpile by paying part of the cost of joint union-company studies of the likely impact of future technological innovations.

Aim of the research would be to produce a common set of facts and a common understanding of what they mean to the company and to the workers involved.

With the facts in front of them, labor and management could then bargain for a solution to the human problems resulting from the proposed changes—with further government financial help available to soften the impact on individual workers.

The program was first announced by Labor Minister MacEachen in the Commons last June. Parliament voted $586,000 for the new agency for the current fiscal year to the end of March—all but $86,000 of it to be used as incentive payments of one kind or another.

PUSH CO-OPERATION

The government agency — to be known as the manpower consultative service — will blaze several new trails in industrial relations, such as:

1. For the first time, the government will be subsidizing basic research by unions and companies on a joint, co-operative basis in the hope of finding solutions to specific manpower problems.

2. To qualify for the research incentives, companies will have to give advance warning of technological changes — something some firms seem reluctant to do.

3. By requiring a company union - partnership in pressing the research studies, the government hopes to lay the basis for continuing consultation between the two parties—thus setting collective bargaining in a new, more constructive atmosphere.

At present the government is still looking for the six specialists who will put the new agency on its feet and lead it into action.

When the Civil Service Commission opened the jobs for competition, more than 100 persons filed applications. This has been narrowed down to about 30 candidates. A three-man board will travel across the country to interview the candidates.

SEEK DIRECTOR

They will be looking for a director at a salary of between $14,800 and $15,800, two senior executive officers at about $12,000 and three intermediate executive officers at about $9,000.

The six specialists will be pioneers in a program never before tried in an industrial nation anywhere in the world. They will be writing their own rules as they go along, with each specialist seeking out, developing and following through on his own projects.

While the six-man team will be based at the start in Ottawa, the hope is to place five of them in the field—the two senior officers in Quebec and Ontario, the three intermediate officers in the Atlantic provinces, the Prairies and on the Pacific coast.

In addition to paying research incentives the new agency will also administer a new federal payment aimed at easing the cost of moving workers to new locations when they are displaced by industrial change.

The federal share of both the research program and the mobility incentive will be half of the cost. In addition, the government will insist that the other half of the cost of moving workers be met either by the employer or the province, or both.

UNIONS INQUIRE

At the same time, the new agency will dovetail its work with federal cost-sharing programs under the Technical and Vocational Training Assistance Act. Under this scheme, the federal government pays 75 per cent of the costs of retraining workers under a manpower adjustment program.

Labor department officials say a few general inquiries have already been received from unions and companies interested in the new program. They expect many more once the service is set up and the specialists are at work.

What if the response is disappointing?

W. R. Dymond, assistant deputy labor minister, says that if collective bargaining doesn't respond to the challenges of the technological era, then "governments will be required, under the pressure of public opinion, to intervene more forcefully in meeting the problems of technological change."

Visit Sparks Wheat Sale Speculation

WINNIPEG (CP)—W. C. McNamara, chief commissioner of the Canadian Wheat Board, has been reported en route to Russia, causing speculation he may talk over a new wheat deal with Soviet officials.

The visit was officially termed a "courtesy call" at the invitation of the Soviet Union's grain board.

At the same time it was expected that Mr. McNamara would likely talk over possible future wheat sales with Russian officials.

Russia bought $500,000,000 worth of Canadian wheat and flour last fall and the shipments are to be completed July 31.

One reliable report said Mr. McNamara would fit in a visit to East Germany during the trip, raising speculation that a wheat deal may be in the offing to that country.

Algoma Ponders Development Of New Ore Deposit

SAULT STE MARIE, Ont. (CP)—Algoma Steel Corp. is reported considering developing at a cost of between $30,000,000 and $35,000,000, an iron ore deposit 40 miles northeast of here.

The site reported under consideration is at the Cowie Lake property on the Goulais River.

Algoma first started exploring the property in 1941 and in 1960 started securing land in the immediate area of the richest deposits. Last October, the company reserved for a year surface rights to a 25-square-mile block of land surrounding the property.

The Algoma Central Railway has completed a preliminary engineering study of a 12-mile branch line into the area. It would join the main line just south of Mekatina.

Exploratory drilling has indicated reserves of about 150,000,000 tons at the Cowie Lake property, with much of it lying near the surface and available for open-pit mining.

Copper Pipe Price Increases In U.S.

NEW YORK (AP) — Two major U.S. manufacturers have announced price increases for copper and brass tube and pipe used primarily by the construction industry.

The increases amount to about two cents a pound or four per cent. They will go into effect Thursday for the Cerro Copper and Brass Co., division of Cerro Corp., and next Monday for Reading Tube Co.

The tube and pipe is used for plumbing, heating, air conditioning and refrigeration work.

A spokesman for Cerro said the increase is a small move toward restoration of what he called reasonable profitability in this product line.

The bidding:

South	West	North	East
2♠	Pass	1NT	Pass
4♠			

Opening lead — king of clubs.

All pairs play the same hands in duplicate bridge, but the final contracts reached vary considerably, and furthermore, even when the same contract is reached, the outcome is not always uniform.

For example, take this hand played in a pair event. At most tables the contract was four spades, a reasonable enough undertaking even though it was defeated at every table except one. Three notrump was practically ironclad on the combined North-South cards, but few pairs reached that contract.

Where four spades was the contract, the play invaria bly started the same way. West led the king of clubs and continued with the ace when East played the ten on the king. He then led another club, which East ruffed.

East returned the jack of hearts. The play now varied at different tables, but the net effect was the same. Either immediately, or eventually, these declarers caused the A - K of spades, refuting the possible finesse, and in every case but one they wound up losing a trick to the queen of spades.

The lone declarer who made four spades adopted a better method of play. He won the jack of hearts at trick four with the ace, cashed the ace of spades, entered dummy with a diamond,and then, instead of playing a spade and trying to guess whether to finesse — as most declarers had done — he played the queen of clubs.

He had no use for a discard on the queen of clubs, but wanted to give East an opportunity to make a mistake. If East ruffed — only the Q-9 of spades were missing at this point — there would be no further problem about avoiding a spade loser.

East did ruff — incorrectly — and South made four spades. But even if East had discarded, South could then reasonably have deduced that East had the queen from his failure to ruff the club with the nine.

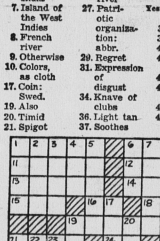
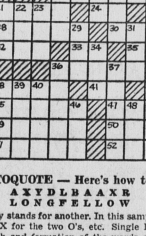
Yesterday's Answer





2-12

DAILY CRYPTOQUOTE — Here's how to work it:

A X Y D L B A A X E
is L O N G F E L L O W

One letter simply stands for another. In this sample A is used for the three L's, X for the two O's, etc. Single letters, apostrophies, the length and formation of the words are all hints. Each day the code letters are different.
