

# Dear Cadre

Is there something you do or don't like on campus? This is the place to complain or encourage. All submissions very much welcomed.

Dear Cadre :

I agree with the view expressed by Richard Bruce on the low quality of CIMN programming. There is little difference between what is played on CIMN and the programs of any commercial AM station. Right now, the only thing that is even worth listening to is Roger Simmons "Tracks 77" on Monday nights, and possibly Jim Lacey on Saturday afternoons.

As for Derek MacEwen's reply, I think it is taking too much for granted to base the majority of the music played on phone requests and

random conversations with students. The phone requests are probably from people who like Top 40 music anyway - either juveniles or the mental equivalent. How many are university students? Anyone in college should be mature enough that they would never seriously listen to the "bubble-gum" music often played on CIMN.

And why do you have to play the same dumb songs repeatedly?

Right now, the only people ignored by CIMN's programs are those who like "progressive rock" i.e. - Led Zeppelin, Queen, Pink Floyd, etc. It would be a good idea to play music off albums, and not just singles, or even a whole LP occasionally. It seems that the only way to improve your programming would be to enforce some kind of quality control on the DJs, at least for a certain time period. If as

you say, many people like Top 40 music, they can easily tune in to CFCY, who are required to play the Top 40 anyway. CIMN could become an alternate service. It all comes down to either letting a few DJs indulge themselves, or satisfying a neglected audience.

Greg Place  
Student

Editor of the Cadre:

I would like to express my thanks to the Panther Hockey Team for the superb entertainment provided to the fans this year. Over the decade that I have been closely following our hockey team, I cannot recall any team that worked together so well and tried so consistently hard. The last game at St. F.X. showed the excellent talent and determination possessed

by our hockey panthers, and team improvement over the year speaks well for the caliber of hockey we can expect next year.

Congratulations hockey panthers!

Sincerely yours,  
Daryl L. Guignon  
Ass. Prof Biology

Dear Editor,

We have decided to write this letter to the Cadre in hopes that our Profs. might read it. Our problem is this- we have four weeks remaining in this semester and to this time we have not gotten back one assignment or mid-term -not even one! We have very little idea as to where we stand in terms of marks other than the fact that we hope we are passing.

This situation is serious for we are Seniors and have jobs lined up for next year- we must pass this term. How can we know in what direction we are headed if we have not one mark upon which to evaluate our progress?

We find this situation ironical. Profs. outline the work required of us but do they outline such work schedule for themselves? Profs are "sticklers" for demanding that assignments be passed in on the due date. Why should they demand such promptness if they are not organized enough in themselves to get busy and mark those assignments as soon as they are passed in?

We are to the point now where we are asking when our assignments and mid-terms will be returned. We are always given some excuse to put us off- profs can think of better excuses than students! The sad part is, we must accept these weak excuses but they don't have to hear ours. What's with this double standard?

We hope that even if one prof. reads this letter that he will pass on our sentiments to his colleagues- we do not suggest all profs are delinquent, just the majority of the profs.

To the profs as they read this (if they do)-don't become upset by our demands. We just want to know how we are doing for if we are "border line cases", we want sometime to "Pull our socks up", Don't penalize us for wanting to graduate, just return our assignments, please.

Sincerely,  
four concerned seniors.

## Engineering is one thing. Engineering for us is quite another.

There's nothing dull about engineering your own challenge. And that's where your Engineering career in the Canadian Armed Forces begins. From there, your career possibilities are unlimited. In the Canadian Forces, the different engineering disciplines are divided into 5 major-classifications:

- Maritime Engineering
- Military Engineering
- Land Ordnance Engineering
- Aerospace Engineering
- Electronic and Communications Engineering.

You'll work with varied and sophisticated equipment on challenging projects in many parts of the world, face the responsibilities of leadership entrusted to you as an officer in the Canadian Armed Forces, and you'll enjoy the opportunity of working in all fields of engineering without being overly limited to any one.

Accepted qualified applicants will be given officer rank on entry, and an excellent salary along with many benefits. Security, promotions and opportunities for post-graduate training all add up to a worthwhile and personally rewarding career. If that's what you're looking for, it's time we got together.

Write, including your engineering qualifications to date, to the Director of Recruiting and Selection, National Defence Headquarters, Ottawa, Ontario, or visit your nearest Canadian Armed Forces Recruiting Centre, listed under "Recruiting" in the Yellow Pages.
