excepted) on arrival of day train from St.  
John, for Summerside, connecting there with  
Train for Charlottetown. Also leave Sum-  
merside for Charlottetown every Saturday  
evening, about 5 o'clock.  
By order,  
F. W. HALES,  
Charlottetown, May 15, 1883. Secretary.

**Bank of Nova Scotia.**  
ESTABLISHED 1832.  
Paid up Capital . . . \$1,000,000  
Reserve Fund . . . 325,000  
An Agency of this Bank will be opened on  
Monday next, 19th inst., in the building  
lately occupied by the Bank of Prince Edward  
Island, under the management of the under-  
signed.  
Deposits will be received on interest, and  
on current account.  
Drafts granted on the various Agencies and  
correspondents of the Bank.  
Sterling and other Exchange bought and  
old, and general banking business transacted.  
D. C. CHALMERS,  
Ch'town, June 17, 1882.—tf Agent.

**PARSONS' PURGATIVE PILLS**  
MAKE NEW RICH BLOOD.  
And will completely change the blood in the entire system in three months. Any per-  
son who will take 1 Pill each night from 1 to 12 weeks, may be restored to sound  
health, if such a thing be possible. For curing Female Complaints these PILLS have no  
equal. Physicians use them in their practice. Sold everywhere, or sent by mail for  
eight letter-stamps. Send for circular. I. S. JOHNSON & CO., BOSTON, MASS.

**DIPHTHERIA** CROUP, ASTHMA, BRONCHITIS.  
JOHNSON'S ANODYNE LINIMENT will instan-  
taneously relieve these terrible diseases, and will positively  
cure nine cases out of ten. Information that will save  
many lives sent free by mail. Don't delay a moment.  
Prevention is better than cure.  
An English Veterinary Surgeon and Chemist,  
now traveling in this country, says that most  
of the Horse and Cattle Powders sold here  
are worthless trash. He says that Sheridan's  
Condition Powders are absolutely pure and  
immensely valuable. Nothing on earth will make hens lay like Sheridan's Condition Powders. Dose, 1 tea-spoon  
full to 1 pint food. Sold everywhere, or sent by mail for 8 letter-stamps. I. S. JOHNSON & CO., BOSTON, MASS.

**LOBSTER PACKERS' SUPPLIES**

Bedroom Suits, Looking Glasses and Mirrors, Window Furniture, Picture Frames and  
Picture Mouldings.  
**JOHN NEWSON.**  
Charlottetown, Jan. 2, 1883.—ly

**CURRENT NOTES.**

Cardinal McCloskey's health is not good.  
Sir John Macdonald will spend his holi-  
days at River Du Loup.

The decrease in the public debt of Brit-  
tain for May is estimated at £3,500,000.  
In a recent speech the Prince of Wales  
said London had now about 5,000,000  
inhabitants.

It was fitting that at the meeting of the  
Universal Peace Union, President Love  
should preside.  
The Montreal Gazette is authority for the  
statement that Mr. Blake favored the salary  
grab and promised not to oppose it.

A sister of Sir J. Franklin died in Eng-  
land lately, aged 97. She had spent most  
of her means on expeditions in search of  
him.

The American Patriarch of Constantino-  
ple has received a letter bearing an Ameri-  
can postmark, and enclosing a phial con-  
taining a deadly poison.

On the strength of a communication from  
a retired English noble, the Boston Tran-  
script tells us that velvet lawns are so called  
because they must be kept "velvet."

The Corporation of London, which rescued  
Epping Forest from grasping encroachers  
and secured it to the citizens forever, has  
now bought a park in Surrey of 340 acres.

It is understood that the marriage of  
Mr. Speaker Kirkpatrick and Miss Isabella  
MacPherson daughter of Senator Mac-  
Pherson, will take place in England early in  
July.

An awful suspicion is now stealing over  
the newspaper world that Lydia Pinkham  
is not dead after all, and that all the  
obituary notices were but advertisements in  
disguise!

Mr. West estimates the decrease in the  
public debt of England for May at £3,500,000,  
the bond redemptions about £10,500,000,  
and payments on account of pensions  
£12,000,000.

A man named John Grant Mackay, sup-  
posed to be a Fenian, has been arrested at  
Cardiff, for having a quantity of explosives  
in his possession. His case has been re-  
manded for a week.

Dr. Schliemann will receive the honorary  
degree of D. C. L. at the coming Oxford  
commemoration. His degree was approved  
last year, but he could not be present in  
England to receive it.

The great decline in the death-rate  
among children in England, due to ever-  
increasing sanitary improvements, and,  
therefore, likely to be more and more  
marked, makes Malthusians tremble.

Elisha W. Steeves, who murdered John  
W. Dryden, at Elgin Corner, on the 28th  
of April, was at Cole's Island last week, and  
was conveyed to Jemseg by a party resid-  
ing in that place. It is probable that he is  
now across the line.

Boston papers say: "Mr. Frank W.  
Cram has accepted the position of superin-  
tendent of the New Brunswick railway at  
a salary of \$5,000, and will enter upon the  
duties of his office July 1. Mr. Cram will  
reside in St. John."

Justice must be beggared to find adequate  
punishment for the dastardly scoundrel at  
Belleville, who poisoned a tender child of  
four years with a foul egg mixed with paint.  
It is humiliating to have to acknowledge  
such fiends as fellow-beings.

It is mentioned that Sir Alexander Galt,  
after spending some days in Ottawa, will  
proceed to Halifax to attend the banquet to  
Sir Charles Tupper, and will thereafter ac-  
company the latter gentleman to Rimouski,  
whence Sir Charles is to sail for England on  
the 16th.

The two latest Reform stories are that  
members of Parliament sell their influence  
for money and that Ministers sell promo-  
tions in the Civil Service for cash. Of  
course these yarns would not be told to the  
Canadian public if their authors did not  
imagine that, in the language of the Globe,  
"the people will believe anything."

The Regina Leader, in its fourteenth  
number, remarks that the Government at  
Ottawa scarcely realizes the speed at which  
that country is progressing, and declares  
that the time is at hand when any Govern-  
ment, in order to be efficient, must have  
among its members at least one thoroughly  
conversant with the North-West. Mr.  
Davin stands ready for the sacrifice.

The Government offers only £70,000 for  
the Ashburnham collection. The amount  
demanded is £90,000. The Times, in a  
leading article on this subject, says:—"The  
public will learn, with keen regret that the  
negotiations for the purchase of the Ash-  
burnham collection have collapsed. Ger-  
many and the United States are eager to  
secure these literary treasures; the latter  
certainly will not allow them to pass out  
of their hands for the sake of a paltry  
\$109,000.

Among the notable arrivals at New York  
from Europe lately, were Willie Beckwith  
and his sister Agnes, who came to America  
to give exhibitions in the natural art.  
W. Beckwith is the acknowledged champion  
of Great Britain, having beaten Johnston,  
Finley and Jones. In conversation the  
champion said he was willing to swim any  
man in America, and that both he and his  
sister would soon show the American public  
what real swimming was.

**The Fisheries Exhibition.**

DISTINGUISHED CANADIANS ENTERTAINED BY  
THE PRINCE OF WALES—CANADA'S EXHIBIT  
THE MOST POPULAR THERE.

(London Canadian Gazette.)  
Scarcely any portion of the Fisheries  
Exhibition has proved more popular than  
the Canadian section, and the testimony to  
its excellence which was borne by the  
Prince of Wales on Saturday week has been  
very promptly endorsed by the general  
public. The exhibits which attract the  
most attention are the salmon hatchery,  
Mr. Wilmot's self-cleaning and self-picking  
fish egg incubator, and the refrigerators.

These are always surrounded by an admir-  
ing crowd. The comprehensive collection  
of stuffed fish also comes in for a large  
share of notice, while to the scientific  
visitor the exceptionally complete exhibit  
of insects which either form food for or are  
injurious to fish, and of algae, are specially  
interesting. Gabe Acquin and his wigwag,  
it goes without saying, have been visited  
by many persons each day. The British Col-  
umbian arrived last week; but, unfortun-  
ately, it was found that a portion of them  
had suffered somewhat from the length of  
voyage. Among other interesting features  
the contribution includes a number of fish-  
ing implements and spears used by the  
Indians in British Columbia.

Advantage is, of course, being taken of  
the opportunity which the exhibition  
affords of sowing abroad a knowledge of  
the Dominion. Outside the office of the  
Commission a large map of Canada  
has been suspended, but we understand  
that one of still larger dimensions will be  
very shortly displayed in a prominent  
position in the gallery. Pamphlets and  
other publications giving information about  
the country are freely distributed. Bear-  
ing in mind the many thousands of visitors  
who will pass through the courts before the  
exhibition closes, it appears justifiable  
to assume that much good work will be done  
in this direction. We may add that on Thurs-  
day last Sir Alexander Galt, the Hon. Mr.  
McLean, and Mr. S. Wilmot, as represent-  
ing Newfoundland, and Mr. A. Shea, as represent-  
ing Newfoundland, were among the foreign  
and colonial commissioners entertained  
at lunch by the Prince of Wales in the  
Royal pavilion.

**The Seal and Cod Fishing at  
Newfoundland.**  
The last of the sealing fleet have returned.  
Those steamers which took the Gulf of St.  
Lawrence this year, as the scene of their  
operations, were unsuccessful, the jam of  
ice there having been unprecedented, and  
the vessels being unable to penetrate the  
pack. The northern seal fishery, as I have  
already described, has been a great success.  
Altogether, the seal fishery of the year is  
over an average, although second trips were  
comparatively failures. The catch is esti-  
mated at from 400,000 to 450,000 seals for  
the season. The price of oil and skins will  
be high, as the Greenland seal fishery has  
been a disastrous failure.  
It rarely if ever happens that, at such an  
early date, the report of the cod fishery is  
so favorable as at the present. The mail  
steamer "Plover" arrived yesterday from  
the northward, and the account she brings  
of the cod fishery are most encouraging.  
The cod school have not yet appeared,  
but herring are unusually abundant, and  
the cod have made their appearance at  
nearly all the fishing centres in strong force.  
Hook-and-line men are doing well with the  
hearing bait; and, in many places, a large  
catch has been made by traps and nets.  
Some men have already taken more cod  
than they did all last summer. It has often  
been noted that the more severe the  
winter the more abundant the cod fishery,  
and, to all appearance, this  
is likely to be realized this year.  
Last winter was one of the most  
severe on record. The weather is now de-  
lightful, and the splendid opening of the  
summer fishery has given a great impetus  
to business. Supplies are lavishly given  
out. It is certain that the price of codfish  
will be high, owing to the disastrous failure  
of the Norwegian cod fishery. The salmon  
fishery too has commenced with great  
promise. Already salmon from 10 lbs to  
20 lbs in weight are selling here at ten cents  
per pound. Lobsters are also abundant.  
Altogether, the prospects of our fishery are  
at present unusually good.—Correspondence  
of Montreal Gazette.

**Irish Immigration to Canada.**  
(Lloyd's (London) Weekly, 20th May.)  
The extensive emigration project for  
Ireland which has been submitted to Gov-  
ernment by George Stephen, the chairman  
of the Canada Pacific Railway, is, no doubt,  
that to which reference has been made  
officially in the House of Commons, and of  
which we shall learn something more next  
week. It is a bold, comprehensive, and, so  
far as we are able to judge, a well-thought-  
out scheme, worthy of the occasion which  
has brought it forth. It is not emigration  
by dribbles. It deals at once with 10,000  
small farmers and their families. For the  
sum of one million sterling this number of  
agricultural families, averaging five persons  
each, can be transferred to the Canadian  
Northwest, and provided, on their arrival,  
with 160 acres of good wheat-growing lands,  
a comfortable log-house, a cow, the requisite  
agricultural implements, and the means  
of plowing and sowing a few acres for  
the first year's crop. The plan, it will  
be seen, embraces the transplanting of  
50,000 human beings, from scenes of want  
and suffering to "pastures new," where  
they may live in independent comfort. The  
capital required is to be advanced by the  
Government for ten years, by way of loan,  
and on good security. The Northwest  
Land Company propose to take a lien on  
the 160 acres granted to each family of im-  
migrants, to the extent of £100, at five per  
cent. interest. The owner of the 160 acres  
will have a right, after two years' settle-  
ment, to pay off the £100, or any part  
of it.
